Subject: Reconditioning Segment Pole Height
Date: Tuesday, December 15, 2020 1:55:00 PM

Horizon Team,

Following today's presentation I have additional questions regarding the final pole height of the Reconditioning Segment north of the Paso Robles Substation. The diagrams in Section 2 of the proposal summarize the pole features as noted in fig 2-17. However, no information is provided for the existing or proposed pole heights. Also, do the proposed pole heights also apply to the River Road section between HWY 46 and Wellsona Rd.?

Best Regards,
