RE: Review of Gill Ranch Storage Company's Application (A. 08-07-032) and Pacific Gas and Electric Company's Application (A. 08-07-033) for a Certificate of Public Convenience and Necessity for the Gill Ranch Gas Storage Project.

The Energy Division of the California Public Utilities Commission is continuing its review of Gill Ranch Storage Company's (GRS) project application (A. 08-07-032) and Pacific Gas and Electric Company's (PG&E) project application (A. 08-07-033).

Section 15100 of the California Environmental Quality Act requires the agency responsible for the certification of a proposed project to assess the completeness of the project proponent's application. The Energy Division uses the Commission's Information and Criteria List as the basic guide for determining the adequacy of project applications.

The applicant submitted a substantial amount of new information to address the deficiencies related to impacts to Geology, Air Quality, Biological Resources, Hazards and Hazardous Materials, Land Use, Agriculture, and Mineral Resources on October 17, 2008. The Energy Division will continue its review to assess the adequacy of the data submitted. A determination of the adequacy of the application will once again be issued within the next 10 business days.

The Energy Division reserves the right to request additional information at any point in the process. Questions relating to the project should be directed to Eric Chiang at (415) 703-1956.

Sincerely,

A handwritten signature in blue ink, appearing to read "Eric Chiang".
