RE: Application Completeness – Permit to Construct the Fulton-Fitch Mountain Reconductoring Project – Application No. A.15-12-005

Dear Mr. Lishman:

The California Public Utilities Commission's (CPUC) Energy Division California Environmental Quality Act (CEQA) Unit has completed a deficiency review of Pacific Gas and Electric Company's (PG&E) Application (A.15-12-005) and Proponent's Environmental Assessment (PEA) filed on December 3, 2016 for a Permit to Construct (PTC) the Fulton-Fitch Mountain Reconductoring Project.

The Energy Division finds that the Application and PEA, as supplemented with additional information provided by PG&E following the initial filing, contain sufficient information to satisfy the requirements of the CPUC's Information and Criteria List and PEA Checklist. Accordingly, the CPUC deems this Application complete.

Though the application is complete, the CPUC may request additional data, as necessary, to prepare a complete and adequate analysis of potential environmental effects associated with the proposed project and potential alternatives in accordance CEQA requirements.

Please direct questions related to this application to me at ██████████
or ██████████

Sincerely,

MJ Orsaba

Lisa Orsaba
Project Manager
