RE: Application Completeness - Certificate of Public Convenience and Necessity for the Riverside Transmission Reliability Project – Application No. A.15-04-013

Dear Mr. Forrest:

The California Public Utilities Commission's (CPUC) Energy Division CEQA Unit has completed its review of Southern California Edison's (SCE's) Application (A. 15-04-013) for a Certificate of Public Convenience and Necessity (CPCN) for the Riverside Transmission Reliability Project (RTRP) and responses to CPUC's Deficiency Reports #1, #2, #3, and #4.

Section 15100 of the California Environmental Quality Act (CEQA) requires the agency responsible for the certification of a proposed project to assess the completeness of the project proponent's application. The Energy Division uses CPUC's Information and Criteria List and PEA Checklist as the guide for determining the adequacy of project applications.

The Energy Division finds that the application including SCE's responses to deficiency reports contain sufficient information to satisfy the requirements of the Commission's Information and Criteria List and PEA Checklist and therefore deems this application complete.

Though the Energy Division deems this application complete, the Energy Division reserves the right to request additional information at any point in the application proceeding when needed to support either the proceeding or the CEQA process.

Please direct any questions or comments to me at (415) 703-5484 or Jensen.Uchida@cpuc.ca.gov.

Sincerely,

A handwritten signature in blue ink that reads "Jensen Uchida".

Jensen Uchida
Project Manager

Energy Division, CEQA Unit
