Dated: 03/09/2016

Question 06-Suppl:

Table 1: SCE Riverside Transmission Reliability Project Application 15-04-013 Data Needs

Biological Resources

Provide a complete report for the Delhi Sands flower-loving fly surveys that includes Appendices B, C, and D and species location information in Table 2.

The report for the Delhi Sands flower-loving fly surveys, dated November 4, 2006, which is provided as an Appendix to the Biological Resources Technical report is incomplete.

The report does not include Appendix B, C, or D and the location column in Table 2 of the report has not been filled in.

Supplemental Question (issued August 17, 2016): A partial response was provided to this item. We did receive Appendices B, C, and D of the Biological Resources Technical Report; however, Table 2 in the report remains incomplete.

Response to Question 06-Suppl:

Please see the revised Table 2, attached hereto.

Note, of the 12 areas studied in the 2006 Delhi Sands Flower Loving Fly (DSFLF) survey, only areas 8 and 10 overlap with the currently proposed RTRP project transmission route. Please refer to the attached image "2006 DSFLF Aerial.PDF."

In 2006, positive DSFLF detections were limited to areas near Aqua Mansa near Crestmore, San Bernardino Co. (Areas 1 and 2), which are not within the proposed RTRP footprint. The 2016 DSFLF surveys were completed in late September and indicate no positive detections in any studied areas, including Areas 8 and 10.
