Subject: SBCRP: All Segments - Notice for MM AQ-1 Sub Tier 3/4 Equipment (Sag-Cat Equipment)
Attachments: Rental_Coordination.pdf

Evening team.

SCE is providing notification in compliance with MM AQ-1 for the use of construction equipment greater than 75 hp that will not meet Tier 3 or 4 off-road emissions standards.

As anticipated in the FEIR (Section 4.3-24, 1-9), due to the specialized equipment needs, not all construction equipment would be Tier 3 or 4. In this case, the project will be utilizing a “sag-cat with 3 winches” to support conductor pulling activities that will not meet Tier 3 or 4 off-road emissions standards.

Additionally, please see the rental company coordination demonstrating that no Tier 3 or 4 sag-cats with 3 winches are available.

Thank you.
