**SOUTHERN CALIFORNIA EDISON COMPANY’S (U 338-E) RESPONSE TO THE
DEFICIENCY REPORT FOR THE RIVERSIDE TRANSMISSION RELIABILITY
PROJECT APPLICATION (A.15-04-013) AND NOTICE OF AVAILABILITY
REGARDING SAME**

On April 15, 2015, Southern California Edison Company (“SCE”) filed Application No. 15-04-013 for a Certificate of Public Convenience and Necessity (“CPCN”) to permit SCE to construct a portion of the Riverside Transmission Reliability Project (“RTRP” or “Project”). SCE’s CPCN Application was subsequently amended on April 30, 2015.

On or about May 22, 2015, SCE received correspondence from the California Public Utilities Commission (CPUC) identifying certain deficiencies in SCE’s CPCN Application. These deficiencies were summarized in a *Deficiency Report For The Riverside Transmission Reliability Project Application (A.15-04-013)* (“Deficiency Report”). SCE’s *Response To The California Public Utilities Commissions’ Deficiency Report For The Riverside Transmission Reliability Project Application (A.15-04-013)* (“Response”) is attached hereto as Attachment 1.

SCE hereby files this Response and Notice of Availability in response to the Deficiency Report and accompanying CPUC correspondence, which specifies that

Information provided by SCE in response to the Energy Division's finding of deficiency should be filed as supplements to Application A. 15-04-013. One set of responses should be sent to the Energy Division and one to our consultant Panorama Environmental, in both hardcopy and electronic format. We request that SCE respond to this report no later than July 21, 2015 (emphasis in original).

Pursuant to Commission's Rules of Practice and Procedure 1.9(d)(4) and 1.6(a), SCE has made this Response available online. SCE's Notice of Availability is attached hereto as Attachment 2.

Respectfully submitted,

IAN M. FORREST

/s/ Ian Forrest
