

MEMORANDUM

Date: November 30, 2016

To: Jennifer L. Kaminsky, SDG&E

From: Doug Maher, Icon Building Supplies

Re: Disposal of Organic Matter - Assembly Bill 1826

ICON Building Supplies will be performing Third Party Logistics services to San Diego Gas & Electric and will be managing the construction staging yards for the Sycamore to Penasquitos 230kV Transmission Line Project. This memorandum is intended to inform you of our proposed disposal method for organic material generated by SDG&E and handled by Icon Building Supplies at the staging yards in compliance with Mitigation Measure GHG-1, which states:

Disposal of Organic Matter. In accordance with requirements in Assembly Bill 1826, SDG&E shall dispose of organic waste (defined in PRC Section 42649.8(c) as food waste, green waste, landscape and pruning waste, nonhazardous wood waste, and food-soiled paper waste that is mixed in with food waste) removed on and after April 1, 2016 by means other than transporting to a landfill if the amount of organic waste meets or exceeds eight cubic yards per week. On and after January 1, 2017, SDG&E shall dispose of organic waste by means other than transporting to a landfill if the amount of organic waste meets or exceeds four cubic yards per week. Options for non-landfill disposal may include composting on previously disturbed SDG&E land, self-hauling organic waste for recycling, or participating in a green waste recycling program in accordance with subdivision (b) of AB 1826. SDG&E shall notify the CPUC of the disposal method at least 30 days prior to construction.

ICON Building Supplies will ensure that all organic waste generated in excess of eight (8) cubic yards, prior to January 1st 2017 and all organic waste generated in excess of four (4) cubic yards after January 1st 2017 will be disposed of by means other than transportation to a landfill. ICON Building Supplies will participate in a recycling program for any organic waste in excess of the volumes listed in Assembly Bill 1826. Any wood wastes, in particular pallets used to deliver materials to staging yards, are anticipated to be reused or recycled by the manufacturer. ICON Building Supplies will maintain a log of all organic waste generated to track compliance with Assembly Bill 1826.
