REPORT OVERVIEW

The California Public Utilities Commission (CPUC) has identified several areas where more information is needed to prepare a complete and adequate analysis of the potential environmental effects of a range of alternatives in accordance with the requirements of the California Environmental Quality Act (CEQA). Data needs are identified in bold. Clarifying information is provided below the data need.

2	Data Request #7, Response #9; and Data Request #5, Response #5	<p>Provide a wetlands delineation report covering the proposed SR-56 staging yard and the Encina Hub work areas.</p> <p>The potential exists for wetland resources to occur within or adjacent to the SR-56 staging yard and the Encina Hub work areas; however, these locations were not covered in previous wetland delineation reporting provided by SDG&E. These areas need to be included in the wetland delineation currently underway for the Black Mountain Ranch Community Park and Evergreen Nursery staging yards identified in SDG&E's focused survey schedule response to Data Request #7.</p> <p>The wetland delineation must include both the technical report and associated GIS shapefiles.</p>	<p>The Encina Hub wetland delineation memo (supplementing the Environmental Intelligence [EI] report included with the PEA) is included as Attachment ED9 – Q2(a) and the GIS data is provided as Attachment ED09 – Q2(b).</p> <p>A second wetland delineation memo (also supplementing the EI report) for all of the new areas along the main alignment, including the SR-56 yard will also be prepared and is anticipated to be completed by April 30, 2015.</p>
