RE: Application for a Permit to Construct the TL 695 and 6971 Reconductoring Project (A.16-04-022) Deemed Complete

Dear Ms. Giles:

The Energy Division of the California Public Utilities Commission (CPUC) has completed its review of San Diego Gas and Electric Company's (SDG&E) application (A. 16-04-022) and Proponent's Environmental Assessment for a Permit to Construct the TL 695 and 6971 Reconductoring Project.

Section 15100 of the California Environmental Quality Act (CEQA) requires the agency responsible for the certification of a proposed project to assess the completeness of the project proponent's application. The Energy Division uses CPUC's Information and Criteria List and PEA Checklist as the guide for determining the adequacy of project applications. The Energy Division finds that the Application and PEA, as supplemented by information contained in SDG&E's responses to deficiency reports, contain sufficient information to satisfy the requirements of the Commission's Information and Criteria List and PEA Checklist. Accordingly, the CPUC deems this Application complete.

Though the Energy Division deems this application complete, the CPUC may request additional data, as necessary, to prepare a complete and adequate analysis of potential environmental effects associated with this proposed project in accordance with the requirements of CEQA.

Please direct questions related to this application to me at 415-703-2642 or william.maguire@cpuc.ca.gov.

Sincerely,

A handwritten signature in black ink that reads "William Maguire".

William Maguire
Project Manager
Energy Division, CEQA Unit
