

## Wildfire Technology Innovation Summit Agenda Guiding Principles and Speaker Selection Criteria

The goal of the Wildfire Technology Innovation Summit is to initiate an ongoing dialogue between the technology industry, academic researchers, utilities, and government on the needs and tools to address wildfire challenges.

### Agenda Guiding Principles

- Develop a dialogue around challenges, potential solutions and technology enablers
- Introduce galvanizing ideas that inspire
- Discuss the art of the possible while maintaining focus on substantive, realistic solutions
- Maintain diversity of opinion and balance between policy, industry and technical points of view

### Speaker Selection Criteria

- Ability to contribute substantively to the discussion
- Proven expertise in their field
- Direct role in developing or implementing policy, industry or technical solutions going forward
- Offering a unique perspective

### Process for Agenda Development and Finalization

- Wildfire Technology Innovation Summit steering committee developed initial Agenda concept based on overall goals and objectives
- Policy, industry and technology stakeholders made various recommendations and proposals after Wildfire Technology Innovation Summit announcement
- Overall Agenda broken into tracks, with different steering committee members assigned to lead different tracks based on their core capabilities and expertise
- Each track lead is responsible for reaching out to potential speakers, evaluating them based on speaker selection criteria and putting together panels and presentations that align with the overall guiding principles of the Wildfire Technology Innovation Summit
- The final Agenda is to be reviewed for conformance with Agenda Guiding Principles and Speaker Selection Criteria and approved by all steering committee

*Note: Selection of speakers for participation in the Wildfire Technology Innovation Summit does not constitute endorsement of their ideas, proposals or technologies by any of the members of the Wildfire Technology Innovation Summit steering committee members and organizers. There will be no substantive discussions of proceedings that are currently open at the California Public Utilities Commission. Selection of a representative from a technology company to participate as a speaker at the Wildfire Technology Innovation Summit does not indicate endorsement of corresponding technologies.*
