In tixis appifation，Tho Pacific Telephone ank Tele－ sraph Company requosts pemisesion to estabこ上sin a telephome exchange at Reseas，Jos ingeies County，Califormia，for service In the townos peecda ane Zelzain and cortain terxitory adjacent thereto；to mane effective therein rates for cxchange and inter－ exchonce telephone service and telegrapit service and to purchase
 Dhone property．

San Femondo Neleghone and Melocragin Comony aiks
authority to withoravk telephone service from a certain portion of its exchange territory within the area proposed to be served by The Pacitic Telephone gnd Telegraph Company gat permission to sela certeln telephone property.

A pubilc hearing in tils proceeding mas heid by Exominer Tijinems at Resede on June 5, 1928, at wich place and time the matter wes submited for decision.

The proposed exchange area would include certain territory now served Irom the Ton Nuys and Owensmouth excianees of The Pacitic Telephone and Telegraph Compony and amothersection et present a part of the San Fernando Exchange area of San Zemando Telephone end Telegraph Company. the record shows that there exists a prolic demend for the establishment of a separate exchenge to serve the territory es outlined. It is proposed to fumish comtinuous teiephone service by means of a diel system, and to charge the rates for sexvice as shown in Exhibit "\&" of the application.

The establishment of this exchange will result it certain new toll rates to the exchenges from which parts of its territory were taken; however, the rate in each case is tian minimum rate of inve (5) cents for on initiel period of Ifve minates. In some instances, silght increases in toli metes to other points will occur while in other cases the rates will be reduced. The telegraph rates otrered are skown and indicated 12 the above mentioned Exinit "A" and are those regrieriy effective in Zelzth at this time. It appears that these telephone gnd telegraph rates are not unreosonable for the contempleted sempice and are simiaar to those now eifective at other points in Cailfornia moder similar conditions of semfee.

The recore shows that two present subscribers to tele phone service in the area of the proposed exchange protested the
catainisiment of the new exchange in so far as tincir own parvicuiar telephone services would be affected thereby.
appicant, The Pactexc Telepaone and Tolezrapi Compony at the hearing state a desire to $0.0 \subset$ to tinc proposed ezchange arca a certain smail section of terxitomy now inciucod partiv in the Owencrouth Bxchenge and pertiy in tine Son Pernendo Dachange as shown in "Prinioit No. 1" presented at tio hearine.

Proper consideration ias bcen given to sil testimong favorable to and acainst tio establishment of tic proposed exciange at Reseda and we concilude that the intercste of the community wil be best conserved oy Lis estabishment to render all exchange telephone service in tine area as thom on a map tinercos in "Biniont IVo. $4^{\pi}$ gresented at the hearine.
