DECOTO, Commissioner:-

D P I X I O N

The above entitled application, as amended, is one of a series of proceedings instituted by Pacific Greyhound Lines, Inc., designed to clarify the operating rights of numerous automotive passenger stage lines whose operating rights have, through successive orders of the Railroad Commission, passed to the ownership of Pacific Greyhound Lines, Inc., applicant herein. Aside from such clarification, the immediate aim of the instant proceeding is to assemble in a single certificate of public convenience and necessity all of said operating rights through the issuance to Pacific Greyhound Lines, Inc., of one certificate of public convenience and necessity in lieu of all previously granted or acquired certificates or rights, authorizing the operation by applicant of auto stage service for the transportation of passengers, baggage and express uniform in its performance throughout the entire system, subject to such restrictions as the Commission may find it necessary to impose in the light of the present day needs and necessities of the traveling public and the fact that all of the rights involved are now owned by applicant. Applicant also asks that it be authorized to make certain extensions, route changes, and service changes; to abandon its freight service between Chinese Station and Mather; also to temporarily discontinue a part of its service in the Lost Hills territory and to change its year round service between Santa Rosa and Monte Rio and between Morced and Los Banos to a seasonal service.

A public hearing was held in this matter at San Francisco, evidence heard and an order of submission made. It is now ready for decision.

San Diego Electric Railway Company, The Atchison, Topeka & Santa Fe Railway Company, River Auto Stages and California Nevada Stages, Inc., Peerless Stages, Inc., and O. C. & N. Stages, Southern Pacific Company, San Francisco, Napa & Calistoga Railway and Napa Valley Bus Company, Pacific Electric, Railway Company, Los Angeles Motor Coach Company and Motor Transit Company, Sacramento Northern Railway and Original Stage Lines protested the granting of the application.

The protest of Sacramento Northern Railway was withdrawn when counsel for applicant stipulated that through service between Sacramento and Chico, via Red Bluff, or between San Francisco or Oakland, on the one hand, and Chico, via Red Bluff, on the other, would not be performed. River Auto Stages and California Nevada Stages, Inc., also withdrew their protests, as did also San Diego Electric Railway Company, counsel for applicant pointing out and declaring that their respective operations were protected by restrictions set forth in the application. O. C. & N. Stages and Peerless Stages also withdrew as protestants, counsel for applicant having stipulated as follows:

"Applicant stipulates that no local tariff may be issued naming a fare between Oakland on the one hand and Palo Alto, Los Gatos or Santa Cruz on the other hand, nor between Oakland on the one hand and San Jose and Los Angeles, via San Jose, both points inclusive and/or intermediate points thereto, on the other hand, with routing via San Francisco in each instance."

The protest of Southern Pacific Company was withdrawn when applicant stipulated that it would eliminate from the instant proceeding its request to consolidate its Truckee-Tahoe right with the rest of its system.

Subsequent to the date of submission, as evidenced by a written statement filed with the papers in this proceeding, protestants Pacific Electric Railway Company, Motor Transit Company and Los Angeles Motor Coach Company, Los Angeles Railway Corporation, as an interested party concurring, withdrew their

protests, applicant having agreed to amend its application by proposing the following restrictions on its operations in the vicinity of Los Angeles:

No passengers, baggage or express shall be transported locally over any of the routes of the applicant within the territory bounded as follows: Las Flores, Hollywood, San Fernando, San Bernardino, Riverside, Redlands, Santa Ana, Newport Beach, Long Beach, Santa Monica nor between any of said points including points intermediate thereto, subject only to the following exceptions:

1. Local service may be rendered between Long Beach and Newport Beach and intermediate points.
2. Local service may be rendered between Los Angeles and San Fernando, and all intermediate points via Hollywood on through cars destined to or arriving from points north of Saugus or Oxnard except between Los Angeles and Hollywood.
3. The right to transport passengers, baggage, and express to or from points in said restricted territory from or to points outside of said restricted territory is not to be by this restriction affected.

Written and telegraphic protests against the consolidation of rights and the consequent removal of restrictions proposed by applicant in the Vallejo-Napa district were received from several Napa and St. Helena business men and residents, Napa City Council, the Napa and St. Helena Chambers of Commerce, St. Helena Sanatorium, Napa Central Labor Council, Calistoga Grange and Napa and Lake County Grange, and others, including the Veterans' Home at Yountville, and Unity Post, G.I.R., of Yountville. The Board of Public Utilities and Transportation of the City of Los Angeles suggested that no certificate be granted to carry local passengers between Hollywood and Los Angeles or any other local passengers within the city limits of Los Angeles where lines of transportation are already in operation.

Applicant now possesses, the records of the Commission show, the right to transport persons and property over highway routes generally extending from the California-Oregon line on

the north over the Pacific Highway and the Redwood Highway to San Francisco and over the Pacific Highway to Sacramento; also between San Francisco and the Nevada-California state line via Vallejo, Sacramento, Colfax and Truckee; also between Sacramento and San Francisco on the one hand and Los Angeles on the other hand, with branch lines to various points in the territory served by the main lines; also between Oxnard and San Diego via Long Beach; between Los Angeles and San Diego via both the coast and inland routes; also between Los Angeles and the California-Arizona state line opposite Ehrenberg, and also between Los Angeles and the California-Arizona state line near Yuma, Arizona, and between San Diego and the California-Arizona state line near Yuma via El Centro, with various branch lines in this territory.

Supporting its request for a consolidation of all the above described rights, officials and employees of Pacific Greyhound Lines, Inc., testified that operation under separate certificates or rights militated, because of the variance in said rights, against the performance by applicant of a service to the public fully satisfying, adequate and efficient, caused confusion among the traveling public, and made it difficult for applicant to establish proper schedules. As an instance in point, applicant's operation between Vallejo and Napa was cited. To Southern Pacific Motor Transport Company was granted an unrestricted right between Vallejo and Napa and intermediate points. To California Transit Co. was granted a right to operate between Vallejo and Napa with a provision preventing through local service between the terminals, the effect of which is to compel passengers using former California Transit schedules to change cars at a point known as the Wye, while other passengers on equipment operated by the same company between the same points and over the same roads make the trip without change. It is claimed that as both rights are now owned by applicant, there exists no further need for the restriction, and that it

should be removed by consolidating the rights.

There are, according to the testimony of applicant and the Commission's records, several other instances of a restricted operation and an unrestricted one between the same points, service under both being performed by the same operator, such as between Sacramento and Woodland and San Francisco and Santa Rita, and San Francisco, Oakland and Richmond.

Company witnesses also testified as to the need for the changes in routes and service proposed, most of such changes being of minor importance. They also testified as to the need for the service extensions applied for, stating that each extension was desirable and necessary, not only from the operating standpoint, but as an added convenience to the traveling public.

As to the proposed suspensions of service, it was stated that during the winter months, service between Los Banos and Merced did not return out-of-pocket cost of operation, likewise the service between Santa Rosa and Monte Rio. Exhibits 2 and 3, containing a traffic check over both routes, show a very light patronage with a corresponding financial return. Traffic conditions in the oil fields, it was said, were such that temporary suspension of service, until traffic conditions demand resumption, between Reward Junction, a point north of McKittrick, and Lost Hills, is justified. As to the abandonment of freight/between Chinese Station and Mather, and the substitution of express service without limits as to weight or vehicle between said points, testimony was offered to the effect that no freight had been carried for many months, and that under the authority herein sought applicant can efficiently and adequately meet demands for property transportation in said territory. The express rates appear to be reasonable.

Thoroughly reviewing all of the evidence in this proceeding, I am of the opinion and find as a fact that public convenience and necessity require all of the service changes proposed, the reroutings and the extensions sought, the consolidations (except the Tahoe-Truckee right), the abandonments, the temporary suspensions of service and the removal, by consolidation of the various rights involved of the existing contradictory and confusing restrictions. I can find no particular merit in the protests, at this time, against the proposed consolidation. Applicant herein is not asking for any but minor changes in the rights it now owns, and under which all of the stage lines it has acquired have operated over a period of years, the question of their extent, scope and validity having been heretofore determined, after public hearings. The lesser rights are now proposed to be merged with the larger rights, so that uniform service may be performed. The only enlargement of rights, if it may be so described, is that which naturally results from consolidation of the various rights into a single certificate or right.

The granting of this application will make for a better and more efficient passenger stage service in territory already served by applicant, with due regard, as is apparent from the restrictions imposed, for the local rights of the protesting carriers. This proceeding is a progressive step in the development of a common carrier service over the highways of California, state-wide in its scope, rather than local, as is evidenced by the restrictions and limitations imposed. From the testimony, it is apparent that the traveling and shipping public will be benefited by the issuance of the order sought.

I find as a further fact that public convenience and necessity will best be served by an order authorizing the issuance to Pacific Greyhound Lines, Inc., of a single certificate of public convenience and necessity authorizing said Pacific Greyhound Lines, Inc., to operate an automotive service for the transportation of

passengers, baggage and express, between the points and over the routes set forth in the order following this opinion, subject to the restrictions imposed and set forth in said order, said certificate to be in lieu of all certificates and operating rights heretofore granted to or acquired by applicant Pacific Greyhound Lines, Inc., or its predecessors in interest.

Pacific Greyhound Lines, Inc., is hereby placed upon notice that "operative rights" do not constitute a class of property which should be capitalized or used as an element of value in determining reasonable rates. Aside from their purely permissive aspect, they extend to the holder a full or partial monopoly of a class of business over a particular route. This monopoly feature may be changed or destroyed at any time by the state which is not in any respect limited to the number of rights which may be given.

The following form of order is recommended:

O R D E R

A public hearing having been held in the above entitled proceeding, an order of submission made and the Commission being fully advised;

IT IS HEREBY ORDERED that the application of Pacific Greyhound Lines, Inc. for an order of the Railroad Commission authorizing the reroutings, consolidation (except Truckee-Tahoe right), suspensions, extensions and abandonments and the service changes proposed in the application herein be, and the same is hereby granted, subject, with respect to operations involved in Applications Nos. 14912, 15517 and 16564, to the Commission's orders in its decisions on said applications.

THE RAILROAD COMMISSION OF THE STATE OF CALIFORNIA HEREBY DECLARIES that public convenience and necessity require the operation by Pacific Greyhound Lines, Inc., of an automotive passenger stage service for the transportation of passengers,

baggage and express between and serving the following named termini and all intermediate points, except as herein specifically restricted and limited, over the following described routes:

31- For all of the operations herein authorized, the tariffs of the applicant as now on file with the Commission governing the transportation of passengers, baggage and express with their rules and regulations, as affected by those offered at the hearing of this application, or as the same may be changed from time to time under the general orders, rules and regulations of this Commission, shall apply.

The right to transport express is subject to the restriction that no single package shall be accepted for shipment that weighs in excess of one hundred pounds, and all express must be transported on passenger vehicles only, except as to property transported for or through the agency of Railway Express Agency, Inc., and milk and cream and empty containers of such commodities when being transported to or from a rail junction point in connection with rail transportation thereof, to which said restrictions as to weight and vehicle shall not apply.

IT IS HEREBY FURTHER ORDERED that Pacific Greyhound Lines, Inc. shall:

1- Within a period not to exceed fifteen (15) days from the date of the order herein, file an acceptance of the certificate herein granted, which acceptance shall contain a declaration that the rights and certificate herein granted are accepted as rights and a certificate in lieu of, and not in addition to, rights and certificates heretofore granted to applicant or its predecessors in interest or established by them through operation prior to May 1, 1917.

2- Within sixty (60) days from the date hereof, shall make such tariff filings as are necessary or required by General Orders Nos. 79 and 80 of the Railroad Commission, to insure full compliance with the order herein, which tariffs shall in form and substance be identical with the tariffs now on file with the Railroad Commission in the name of applicant; also tariffs covering service extensions and changes herein authorized which shall conform in form and substance with tariffs attached to the application herein and those submitted at the public hearing herein and marked Exhibit No.7.

3- Within sixty (60) days from the date hereof, file time schedules covering service herein authorized, which time schedules shall be satisfactory in form and substance to the Railroad Commission.

4- The rights and privileges herein authorized may not be discontinued, sold, leased, transferred nor assigned unless the written consent of the Railroad Commission to such discontinuance, sale, lease, transfer or assignment has first been secured.

5- No vehicle may be operated by applicant herein unless such a vehicle is owned by said applicant or is leased by it under a contract or agreement on a basis satisfactory to the Railroad Commission.

IT IS HEREBY FURTHER ORDERED that for the general operation of its system, on reconstruction or relocation of highways not affecting intermediate points named in the tariffs of the company, Pacific Greyhound Lines, Inc., may follow such reconstructed or relocated highways, provided that said Pacific Greyhound Lines, Inc., shall first advise the Commission, in writing, of said highway change, said notice to be accompanied by a sketch or map showing highways involved and,

IT IS HEREBY FURTHER ORDERED that the certificate of public convenience and necessity authorizing applicant herein to transport freight between Chinese Station and Mather and intermediate points be, and the same is hereby revoked and annulled.

IT IS HEREBY FURTHER ORDERED that Pacific Greyhound Lines, Inc., cancel freight tariffs and time schedules on file in its name with the Railroad Commission covering said freight service between Chinese Station and Mather and intermediate points.

For all other purposes, the effective date of this order shall be twenty (20) days from the date hereof:

The above opinion and order are hereby approved and ordered adopted as the opinion and order of the Railroad Commission of the State of California.

Dated at San Francisco, California, this 3rd day of
December 1930.
