BEFORE THE RAILROAD COMMISSION
OF THE STATE OF CALIFORNIA.

TRAFFIC BUREAU OF THE MERCHANTS EXCHANGE,
Complainants,

vs.

SOUTHERN PACIFIC COMPANY (a corporation)
and ATCHISON, TOPEKA AND SANTA FE RAILWAY
COMPANY (a corporation),

Defendants,

No. 116.

DECISION.

ASSOCIATED JOBBERS OF LOS ANGELES,
STOCKTON JOBBERS AND MANUFACTURERS ASSOCIATION,
KERN COUNTY MERCHANTS ASSOCIATION,
FRESNO TRAFFIC ASSOCIATION,

Interveners.

On December 24, 1910, the Railroad Commission decided Case No. 110, wherein an adjustment of the class rates between San Francisco, Stockton, and Los Angeles and San Joaquin Valley points was made, and made the effective date of the order February 15, 1911. Before this date, the Traffic Bureau of the Merchants Exchange of San Francisco applied to the Commission for a rehearing, which application was contested by the Associated Jobbers of Los Angeles. Thereafter and before the effective date of such order, the Commission denied the application for a rehearing. On March 2, 1911, the Traffic Bureau of the Merchants Exchange of San Francisco filed a complaint against the Southern Pacific Company and the Atchison, Topeka and Santa Fe Railway Company in which complaint that portion of the order in Case No. 110, which provided that Stockton should have "the benefit of a differential under San Francisco equal to the existing class rates from San Francisco to Stockton upon all classes to all points involved" was attacked, and the complainant urged that it was "not concerned with these arbitrary additions to said rates as they existed at the time of filing this complaint and provided that the same are left to adjustment brought about by untrammelled water competition and are not in any other manner whatsoever fixed or determined." On this theory of the proper method to make rates from San Francisco into the San Joaquin Valley, the complaint attacks all class

rates from the City of Stockton to all points in the San Joaquin Valley and "charges that said rates applying from Stockton to the points named are, and each of them is, excessive, unreasonable, unjust and unlawful". Regardless of its contention, however, that the rates from San Francisco shall be left "to adjustment brought about by untrammelled water competition and are not in any other manner whatsoever fixed or determined", the complaint prays that this Commission "determine and prescribe what will be the just and reasonable rates and charges to be hereafter observed and charged for the transportation of merchandise from said Cities of San Francisco and Stockton, respectively, to points in the San Joaquin Valley". Thereafter the Southern Pacific and the Atchison, Topeka & Santa Fe Railway Company filed answers denying the material allegations of the complaint. The Associated Jobbers of Los Angeles were permitted by the Commission to intervene on the question of the reasonableness of the class rates from Los Angeles to all points in the San Joaquin Valley and from all points within the San Joaquin Valley to Los Angeles, and the Stockton Jobbers and Manufacturers Association, the Kern County Merchants Association and the Fresno Traffic Association were also permitted to intervene on the sole question of the reasonableness of the rates attacked in the complaint and by the Los Angeles intervenors. The case was tried by all parties on the theory that only main line points are involved.

We have therefore directly in issue all the rates on the main lines of these two carriers between Stockton and all points in the San Joaquin Valley and between all points within the San Joaquin Valley and all other points within the San Joaquin Valley and from Los Angeles to all points in the San Joaquin Valley and from all points within the San Joaquin Valley to Los Angeles, and after careful consideration of all the evidence presented in the case, the Commission is of the opinion and finds, as a fact, that

the rates in question, in so far as they exceed the rates set out in the schedules hereto attached and made a part hereof, are excessive, unjust and unreasonable, and the Commission sets out herein schedules of rates to be observed by these carriers, respectively, for the transportation of freight at class rates between the points named therein, and finds the rates set out in such schedules to be just and reasonable rates.

In order that there may be no misapprehension on the part of the carriers involved as to the scope of this decision, we have, as already indicated, prescribed the actual rates to be charged between all points involved, and as to such rates there can be no confusion. As to rates from and to points other than those involved in this decision in making such adjustments as may be made necessary by this decision, the carriers will, of course, bear in mind, the provisions of Article XII, Section 21 of the Constitution of this state preventing the charging of a greater compensation in the aggregate for the transportation of a like kind of property for a shorter than for a longer distance over the same line or route in the same direction, the shorter being included within the longer, and also that portion of the same section preventing the charging of any greater compensation as a through rate than the aggregate of the intermediate rates, and likewise Article XII, Section 20 of the Constitution preventing the increase of any rates without the permission of the Railroad Commission.

Two schedules of class rates are attached hereto and made a part hereof. Schedule No. 1 is hereby established as just and reasonable rates to be observed by the Southern Pacific Company and Schedule No. 2 is hereby established as just and reasonable rates to be observed by the Atchison, Topeka and Santa Fe Railway Company, both of such schedules to become effective on the 27th day of April, 1912, and

before such time the carriers are instructed to present to
this Commission, and to distribute as required by law,
printed copies of such tariffs.

Dated March 28, 1912.
San Francisco, California.

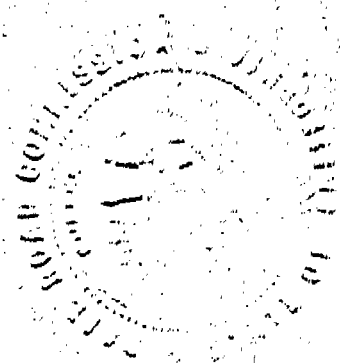

John M. Ebleman

H. D. Loveland

W. L. Gordon
Commissioners.

Attest: Copy.

Charles R. Detrick
Secretary.

5

STATEMENT NO. 1

Rates between all main line points located on the Southern Pacific Company's line from Stockton to and including Bakersfield, California.

also

Rates between Los Angeles, California, and points located on the Southern Pacific Company's lines between Stockton and Bakersfield, California.

BEFORE THE RAILROAD COMMISSION
of the
STATE OF CALIFORNIA.

DIRECTION FOR ADJUSTMENT OF RATES)
TO SAN JOAQUIN VALLEY POINTS NOT)
DIRECTLY IN QUESTION IN CASE OF)
TRAFFIC BUREAU OF THE MERCHANTS)
EXCHANGE ET AL vs. SOUTHERN PACIFIC)
COMPANY and ATCHISON, TOPEKA AND)
SANTA FE RAILWAY COMPANY, CASE 116.)

As indicated in the decision in Case No. 116, rendered today, the Traffic Bureau of the Merchants Exchange of San Francisco in its complaint urges that this Commission fix reasonable rates from Stockton to all points in the San Joaquin Valley, and that the rates between San Francisco and Stockton be "left to adjustment brought about by free and untrammelled water competition." Later in the prayer of the complaint, it is urged that this Commission "determine and prescribe what will be the just and reasonable rates and charges to be hereafter observed and charged for transportation of merchandise from said cities of San Francisco and Stockton, respectively, to points in the San Joaquin Valley." It is, of course, evident that if the Commission complies with either one of these requests it must deny the other. As we are very doubtful whether, under the allegations of the complaint and under the theory of the case advanced by the complainant, the rates from San Francisco to points within the San Joaquin Valley and from points within the San Joaquin Valley to San Francisco are in issue, we refrain, in our decision today, from fixing such rates. It becomes apparent, however, that a readjustment of all rates in the controverted territory will be necessarily brought about by our decision and, acting upon the suggestion of the complainant, defendants and intervenors and assuming, of course, that their suggestions are made in good faith and with a desire that this complicated question be settled on a comparatively permanent basis.

we herein indicate the adjustment which we think should be made on the lines of these carriers.

1. Between Los Angeles and Stockton, California, and points on the Southern Pacific Company's line between Los Angeles and Bakersfield; also branch line points in the San Joaquin Valley, and between San Francisco and points on the Southern Pacific Company's line between Stockton and Los Angeles main line and branches, as outlined in statement No. 3.

2. Between Los Angeles and Stockton, California, and points on the Atchison, Topeka and Santa Fe Railway between Kern and Mojave, also points on the Oakdale and Washtoto branches and between San Francisco, California, and points on the Atchison, Topeka and Santa Fe Railway between Stockton and Mojave main line and branches, as outlined in statement No. 4.

It is unnecessary to make any suggestion as to the adjustment of the rates on the lines of the Atchison, Topeka and Santa Fe Railway between Los Angeles and points south of Mojave, because of the circuitous route of that line between Los Angeles and Mojave.

BRANCH LINES AND CONSTRUCTION OF RATES.

Rates between main and branch line points not mentioned will be constructed as follows:

Take the actual mileage from junction point to branch line point and add 50% to this mileage. This equated mileage will be the basis for making branch line rates. The rates to or from branch line points will be the same as to a main line point equal in distance beyond the junction point on an equated mileage basis.

The following branches are to be considered as main lines on the Southern Pacific Company:

Stockton branch from Stockton to Merced, Visalia branch from Coshon to Exeter, Armona branch from Kerman to

Armona, the Alameda branch from Goshen to Alameda on rates between Fresno and north thereof and Bakersfield and south thereof, Oil City branch from Oil Junction to Porcua.

Adjustment between points not named.

Rates named between San Francisco and the various points via the Southern Pacific Company will apply, as a maximum, ^{and to} from/Oakland, Sacramento, San Jose, Agnew, Alameda, Alvarado, Alviso, Andro, Antioch, Arden, Austin, Avon, Bay Point, Bonicis, Berkeley, Bothany, Brentwood, Byron, Carlton St., Cornwall, Crockett, Decoto, Drawbridge, East Oakland, Eckley, Elmhurst, Emery, Estudillo, Fitchburg, Fleming, Fruitvale, Giant, Hall, Halvern, Hayward, Hercules, Herdlyn, Irvington, Kohler, Lewis, Livny, Lorenzo, Los Medanos, Mallard, Martinez, McAvoy, Melrose, Milpitas, Mowry, Mt. Eden, Mulford, Neroly, Nevada Dock, Newark, Newlove, Niles, Nitro, Nobel, Oakland Wharf, Oleum, Pacsteol, Paraffin, Peyton, Pinole, Port Costa, Prince, Richmond, Robert, Rodeo, Russell, , San Leandro, San Pablo, Santa Clara, Sather, Sedan, Seminary Park, Sobrante, Stoge, Stock Yards, Tillman, Torrey, Twenty-third Ave., Vallejo, Junction, Vigorit, Warm Springs, Wayne, West Berkeley, Acampo, Armstrong, Arno, Brighton, Elk Grove, El Pinal, Florin, Forest Lake, Galt, Lodi, McConnell, Pesta, Urgan.

Rates named between San Francisco and various points on the Atchison, Topeka and Santa Fe lines will apply as a maximum between such points and -- Alcatraz, Ambrose, Antioch, Avon (via Bay Point), Bay Point, Berkeley, Bixler, Blume, Burnham, Christie, Cornwall (via Diamond), Diamond, Dupont, Emeryville (Oakland), Ferry Point, Gateley, Gillis, Glen Frazer, Holt, Hooper, Knightsen, Larson, Lewis (via Bay Point), Los Medanos (via Diamond), Lazon, McAvoy (via Bay Point), Maltby, Middle River, Muir, Nichol's Spru (via Bay Point), Oakland, Oakley, Orwood, Pacheco, Peyton (via Bay Point), Pinole, Prince (via Diamond), Richmond,

-----, San Pablo, Schindler, Schmidt, Trull, Vine Hill,
Werner, Woods Crossing.

In making these adjustments the Commission has considered all of the facts brought out at the hearing, including the volume of traffic, density of population, the fact that the valley is traversed by the main lines of the defendant carriers, over which lines pass a vast amount of transcontinental traffic, in addition to the very heavy local tonnage originating at, or destined to, these points, which tends to support these lines, and the rates we have named are based on a consideration of all of these facts.

The Commission has necessarily considered the competitive conditions which have existed in the past between San Francisco and Stockton and San Francisco and Stockton to points into the San Joaquin Valley and all of the conditions which the carriers urge have forced the rates south of Stockton below a normal scale. The carriers, however, have seen fit to maintain an adjustment in this section somewhat lower (as they urge) than a normal scale of rates and the fact that this adjustment has been maintained by the carriers for a considerable length of time, with no attempt to advance the rates, leads the Commission to believe that the adjustment should be maintained considering all of the competitive features. But these adjustments, as we have said, are made with due regard to the conditions surrounding the traffic in the territory in question and are not to be taken as bases for adjustments in other localities where conditions are not similar.
