Application
No. 20623

BY THE COMMISSION:

ORIGINAL

O P I N I O N

By this application Union Pacific Stages of California, a corporation, seeks authority from this Commission to establish an alternate route from Los Angeles through Pasadena to South Alhambra to be used in the transportation of passengers and baggage on two of its daily eastbound schedules solely for the purpose of accommodating, on intrastate busses, interstate passengers picked up at Pasadena for transportation to points beyond the California-Nevada State Line. No local service whatsoever is contemplated over this route which will deviate from applicants present route at Los Angeles and return thereto at South Alhambra.

Inasmuch as applicant possesses certain local certificated rights between Los Angeles and points east of San Bernardino to its terminus at the California-Nevada State Line and proposes continued use of said routes upon return to same from the alternate route now sought, it appears necessary to consider the instant application in the light of an extension and enlargement

of applicants present certificated route and the addition thereto of the intermediate point of Pasadena under restrictions set forth above.

This appears to be a matter in which a public hearing is not necessary. The application will be granted.

Union Pacific Stages of California is hereby placed upon notice that "Operative rights" do not constitute a class of property which should be capitalized or used as an element of value in determining reasonable rates. Aside from their purely permissive aspect, they extend to the holder a full or partial monopoly of a class of business over a particular route. This monopoly feature may be changed or destroyed at any time by the state which is not in any respect limited to the number of rights which may be given.
