For the purpose of this proceeding, no value is recognized in the I.C.C. permit. This is a permit acquired by Wells Truckways, Ltd. from a predecessor corporation at a cost of \$30,000. About \$18,000 of the purchase price remains unpaid. In our opinion, the \$30,000 should be amortized by charges to surplus within ten years after the execution of the merger agreement. The Order will require that such be done.

For the period, January 1, 1943 to October 31, 1943, Wells Truckways, Ltd. reports operating revenues of \$209,445.68. For this period it shows a loss of \$4,110.37. Wells Transportation, Inc. for the period, December 1, 1942 to October 31, 1943, shows operating revenues of \$349,438.94 and a profit of \$27,037.87.

The merger of the two corporations will unify their operations and will make it possible to use automotive equipment more fully in that it can be distributed over all of the operations of the two companies. The present lease arrangements and insurance requirements make the ready transfer of equipment from one operation to the other expensive and time consuming. Moreover, economies in operation will result because of a decrease in everhead expenditures for accounting and effice expense. An improvement in service should follow from the merger of the two companies. It will be observed that the merger of the two companies will not result in any increase in the outstanding stock. The Commission has heretofore authorized Wells Transportation, Inc. to issue the \$20,000 of stock for which it is now proposed to substitute

\$20,000 of stock of Wells Truckways, Ltd. The assets of the merged company are sufficient to support such a stock issue.

We believe that the merger of the two companies is in the public interest and that this application should be granted subject to the provisions of this Opinion and Order. We, however, place Wells Truckways, Ltd. upon notice that operative rights as such do not constitute a class of property which may be capitalized or used as an element of value for rate fixing or for any amount of money in excess of that originally paid to the State in consideration for the granting of such right. Aside from their purely permissive aspect they extend to the holder a full or partial monopoly of a class of business over a particular route. This menopoly feature may be changed or destroyed at any time by the State which is not in any respect limited to the number of rights which may be given.

ORDER

The Commission having considered the request of Wells Transportation, Inc. and Wells Truckways, Ltd. and it being of the opinion that this is not a matter on which a hearing is necessary; that the money, property or labor to be procured or paid for by the issue of \$20,000 of capital stock by Wells Truckways, Ltd. is reasonably required by Wells Truckways, Ltd. is reasonably required by that the expenditures for said purpose herein stated, and that the expenditures for said purpose are not, in whole or in part, reasonably chargeable to operating expenses or to

condition that Wells Truckways, Ltd. shall; if said merger agreement is carried into effect, amortize, within ten years after the effective date of said merger agreement, by charges to surplus, said \$30,000 paid for said Interstate Commerce Commission permit, said charges to surplus to be not less than \$3,000 per annum.

- 6. Within thirty (30) days after the execution of said merger agreement, Wells Truckways, Ltd. shall file with the Commission two verified copies of said merger agreement together with a statement showing the amount of stock issued under the authority herein granted and to whom said stock was issued.
- 7. The authority herein granted will become effective fifteen (15) days after the date hereof.

Dated at San Francisco, California, this day of February, 1944.
