Applicant estimates its 1946 construction expenditures at \$2,100,000. Its actual expenditures for additions and betterments from November 1, 1945, to October 31, 1946, amounted to \$1,596,949.04. This amount is segregated by applicant to its several departments as follows:

| Electric plant | \$ 474,088.68 |
|----------------------|------------------|
| Gas plant | 1,089,172.39 |
| Water plant | 788.28 |
| Common utility plant | <u>32,899.69</u> |
| Total | \$1,596,949-04 |

While applicant has not yet prepared its 1947 budget, it is of the opinion that its construction expenditures for that year may exceed similar expenditures for 1946.

To pay for part of its additions and betterments, applicant has borrowed on its unsecured notes \$900,000 from the American Trust Company. It intends to use the proceeds from the sale of its bonds to pay part of its indebtedness due the bank.

Applicant's outstanding bonds, amounting to \$4,557,000, are all owned by the John Hancock Mutual Life Insurance Company and by The Mutual Life Insurance Company of New York. The former has agreed to buy \$360,000 and the latter \$540,000 of applicant's 2-3/4% bonds, Series due 1975, at 99.013% of their face amount plus accrued interest, if any. At that price the effective interest rate is about 2.80%. Applicant estimates its expenses incident to the bond issue at \$4,015. It is not paying any finder's fee or commission to sell the bonds. Applicant is, in our opinion, receiving an adequate price for its bonds.

Applicant proposes to charge the bond discount and expense to Account 414, Miscellaneous debits to surplus.
