Decision No. 44366

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application)
 of MOTORWAYS TRANSPORT COMPANY for)
 a certificate of public convenience)
 and necessity as a petroleum irre-) Application No. 31090
 gular route carrier for the trans-)
 portation of petroleum products in)
 tank trucks and tank trailers over)
 the highways of the State of Cali-)
 fornia.)

O P I N I O N

Applicant herein requests a certificate of public convenience and necessity to operate as a petroleum irregular route carrier throughout the state for the transportation of petroleum and petroleum products in tank trucks and tank trailers, pursuant to the provisions of Section 50-3/4 of the Public Utilities Act, as amended by Statutes 1949, Chapter 1399.

The amendment referred to provides, among other things, that in the event a petroleum irregular route carrier was on September 1, 1949, and thereafter operating under a permit as a radial highway common carrier, and shall file an application within 180 days after the amendment takes effect, the Commission shall issue a certificate of public convenience and necessity without further proceedings, and such certificate shall authorize the carrier to engage in such operations as it was authorized to conduct on September 1, 1949.

Applicant alleges in its verified application that on September 1, 1949, and continuously thereafter it was a petroleum

irregular route carrier operating under a permit issued by this Commission as a radial highway common carrier. The application was filed within 180 days after said amendment became effective.

By Decision No. 42623, dated March 15, 1949, as amended by Decision No. 43049, dated June 28, 1949, this applicant was granted a certificate as a highway common carrier for the transportation of liquefied petroleum gases in all of their forms, including butane, propane, isopropyl, normal butane, natural gasoline, and casinghead gasoline, upon and along the following described routes, including all intermediate points, with the right to make lateral departures therefrom within a radius of fifty (50) miles of said routes:

1. U. S. 101 and U. S. 101 By-Pass between San Francisco and the California-Mexico Line;
2. U. S. 99 between Sacramento and the California-Mexico Line;
3. U. S. 40 between San Francisco and the Nevada-California State Line;
4. U.S. 50 between Sacramento and the California-Nevada State Line;
5. U. S. 395 between the California-Nevada State Line at Topaz Lake and Junction U. S. 66;
6. U. S. 66 between Los Angeles and Needles;
7. U. S. 60 between Los Angeles and the California-Arizona State Line;
8. U. S. 91 and 466 between Barstow and Nevada-California State Line;
9. State Highway 127 between Baker and Nevada-California State Line;
10. U. S. Highway 80 between San Diego and the California-Arizona border.

A public hearing does not appear to be necessary.

Upon the facts set forth hereinabove, we find that public convenience and necessity require that Motorways Transport Company, a corporation, establish and operate service as a

petroleum irregular route carrier to the extent set forth in the ensuing order.

Motorways Transport Company, a corporation, is hereby placed upon notice that operative rights, as such, do not constitute a class of property which may be used as an element of value in rate-fixing, for any amount of money in excess of that originally paid to the state as the consideration for the granting of such rights. Aside from their purely permissive aspect, they extend to the holder a full or partial monopoly of a class of business over a particular route. This monopoly feature may be changed or destroyed at any time by the state, which is not, in any respect, limited to the number of rights which may be given.

O R D E R

Application as above entitled having been filed and the Commission having found that public convenience and necessity so require,

IT IS ORDERED:

(1) That a certificate of public convenience and necessity be and it is hereby granted to Motorways Transport Company, a corporation, authorizing the establishment and operation of a service as a petroleum irregular route carrier, as defined in Section 2-3/4 of the Public Utilities Act, for the transportation of (a) all petroleum and petroleum products, except liquefied petroleum gases in any form, including butane, propane, isoprophyl, normal butane, natural gasoline, and casinghead gasoline, in tank trucks and tank trailers between all points and places in the State of California, and (b) liquefied petroleum gases in all of

their forms, including butane, propane, isoprophyl, normal butane, natural gasoline, and casinghead gasoline, between all points and places in the State of California, except the points and places now authorized to be served by it as a highway common carrier pursuant to Decision No. 42623, dated March 15, 1949, as amended by Decision No. 43049, dated June 28, 1949.

(2) That in providing service pursuant to the certificate herein granted, applicant shall comply with and observe the following service regulations.

- (a) Applicant shall file a written acceptance of the certificate herein granted within a period of not to exceed thirty (30) days from the effective date hereof.
- (b) Within sixty (60) days from the effective date hereof and on not less than five (5) days' notice to the Commission and the public, applicant shall establish the service herein authorized and comply with the provisions of General Order No. 80 and Part IV of General Order No. 93-A, by filing in triplicate and concurrently making effective, appropriate tariffs and time tables.

The effective date of this order shall be twenty (20) days after the date hereof.

Dated at San Francisco, California, this 20th day of June, 1950.
