

**ORIGINAL**

Decision No. 46022

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Investigation )  
into the rates, rules, regulations, )  
charges, allowances and practices ) Case No. 4808  
of all common carriers, highway )  
carriers and city carriers relating )  
to the transportation of property. )

Appearances

(The appearances are listed in Appendix "A" to the  
Proposed Report of Examiner James W. Mulgrew, filed  
March 6, 1951, in this proceeding.)

O P I N I O N

In December, 1945, we instituted this investigation. Our purpose was explained in the Order of Investigation. The order stated:

"It appears that due to present abnormal conditions in the transportation industry, and in order to insure adequate and economical transportation facilities during and subsequent to the transition period in which industry and agriculture are adjusting their activities to postwar economic conditions, the public interest requires that an investigation be conducted into the rates, rules, regulations, charges, allowances, and practices of all agencies of transportation engaged in the carriage of property for hire within the State of California."

We subsequently found it necessary to issue numerous orders covering various matters within the wide sweep of this investigation. With respect to the transportation of so-called "general commodities" (commodities for which rates are provided in Highway Carriers' Tariff No. 2), the orders relating to class rate levels and governing rules and regulations were interim orders. The interim order method was used awaiting the submission of the results of the thorough and complete studies which the staff of our transportation department was directed to make, and awaiting the submission of such

other studies as the parties desired to present. It was repeatedly pointed out that the adjustments made by the interim orders were temporary adjustments and that they were to be reviewed in the light of the full record. All interested parties were urged to participate in the development of that record.

Extensive public hearings were held to receive evidence relating to class rates and rules and regulations for general commodities. Extensive hearings were also held to receive evidence relating to constructive mileages governing rate determinations for the transportation of general commodities, as well as rate determinations for the transportation of livestock, used household goods, bulk petroleum and petroleum products, fresh fruits and vegetables, and cement. A public hearing was also held on a proposed reclassification of dry cell batteries. Before these hearings were completed, interested parties requested that the issues be covered by proposed reports. We granted their requests and so directed the examiner. On March 6, 1951, he filed a report covering the matters involved. Exceptions to his recommendations were submitted by shipper and carrier interests. The record was closed on May 10, 1951, upon the filing of replies thereto.

The background of the investigation, the history of the rates, rules and regulations, the current mileage, rate and classification structures, the proposed changes in these structures, and the development of the record thereon were discussed at some length in the examiner's report. No useful purpose would be served by repeating those discussions in full. Our treatment of the matters in issue will fall into the following categories: (1) class rate levels, (2) constructive mileages, (3) classification ratings, (4) rules and regulations, and (5) general conclusions and findings. The discussions which follow will be in that order.

Class Rate Levels

The interim class rate levels were last adjusted by Decision No. 45429 of March 6, 1951, in this proceeding. By this decision we made further interim increases in the rates for less-truckload and less-carload traffic. These increases were limited to short hauls. The rates theretofore in effect for such traffic, it was found, were not generally adequate in the face of increased expenses experienced by the carriers and in the face of their operating experience. We refused to increase the rates for truckload and carload short-haul operations or to increase any of the rates for long hauls.

The record on which the rate adjustments above referred to were based was made at public hearings held subsequent to the close of the hearings in the general inquiry covered by the examiner's report and by this opinion. On the basis of the older record, the examiner recommended lower less-truckload and less-carload rates and higher truckload and carload rates for short-haul traffic than the corresponding Decision No. 45429 interim rates for that traffic. He recommended reductions in all long-haul rates.

Exceptions to the examiner's recommendations on the class rate levels were numerous. The shippers claimed that the record was too inadequate and too stale to justify the recommended increases; the carriers claimed that it was too inadequate and too stale to justify the recommended reductions. They advanced these contentions notwithstanding the comprehensive cost and rate studies submitted by witnesses from our transportation department and the extensive testimony and the various studies of shipper and carrier witnesses, and notwithstanding the relatively recent close of the series of hearings at which this evidence was received. Both shipper and carrier interests strongly urged, in their exceptions, that the rate levels

C.4808 IB \*

not be adjusted without further and more current information. Shippers and carriers alike requested that specific further inquiries be made into particular rate problems.

In Decision No. 45429, supra, it was pointed out that, and in this opinion we take official notice that, there were "substantial increases in wage costs and in costs for materials and supplies, including sharp increases in the cost of tires" since the close of the series of hearings at which the testimony and exhibits discussed in the examiner's report and in this opinion were received. The Decision No. 45429 record, therefore, reflects current carrier experience and other circumstances and conditions covered by that record more closely than the record under consideration here. We are impressed by the unanimity of shipper and carrier opinion that any general adjustment of the existing class rate scales should be built on a more up-to-date factual foundation. The interim class rates, based on a less comprehensive but more recent record and reflecting the stresses and strains of rapidly changing economic conditions, are shown to be more appropriate than the rates recommended by the examiner based on a more complete but less up-to-date record. Further or future inquiries into the class rate levels should await the filing of requests therefor and reasonable assurance from such petitioners that they will supply the record with necessary current information.

In the circumstances, we will not adopt the examiner's recommendations with respect to adjusting the class rate scales. Instead, these scales will be continued at their present levels.

In view of these conclusions, it is not necessary to discuss various additional contentions of the parties with respect to the rate levels.

Constructive Mileages

The governing distances for the mileage rate determinations hereinbefore referred to are the constructive mileages set forth in our Distance Table No. 3. These mileages have been in effect, without revision, for more than ten years. They were bottomed on a broad and careful study made by our transportation department's engineers. This mileage structure was adopted after full hearing and after full consideration of the many problems involved. These constructive mileages are the actual mileages which prevailed at the time the department's study was made, increased where, and to the extent, found necessary to give effect to adverse conditions such as grades, curvatures, poor road surfaces, traffic congestion and bridge and ferry tolls. For the general investigation proceeding covered by this opinion, the engineers restudied the constructive mileages. They found, after the interval of more than ten years between their studies, that congestion had generally increased, that many highways had been realigned, that some toll charges had been reduced and others had been canceled, and that in other respects the mileages required substantial revision in order to reflect current highway and traffic conditions. The recommendations for changes in constructive mileages were set forth in proposed Distance Table No. 4, designed to supersede Distance Table No. 3.

The engineer who explained the proposed changes at the hearings underwent extensive cross-examination. Shipper and carrier representatives questioned him particularly with respect to the congestion which had been found along various highways and the treatment of that factor in the proposed mileage revisions. Thereupon, a further study of congestion was made and the proposed mileages revised somewhat upon the basis of that study. Nevertheless, not all of the parties were satisfied with the proposed mileages. Shipper

interests insisted that many of these distances were too high and carrier interests were equally insistent that many were too low. No counterproposals covering constructive mileages were submitted. However, shippers and carriers expressed concern with the rate adjustments which would follow from adoption of the recommended distances. Some of the former were alarmed by the resulting increases; some of the latter were apprehensive of the resulting decreases.

The examiner recommended that the proposed revised constructive mileages be adopted. He said that they were the result of a disinterested but thoroughgoing study of the problems involved and that they gave reasonable effect to the physical condition of the highways and to their use. With regard to the effect the revised mileages would have on rates, the examiner said that he had given consideration to those mileages in reaching his recommended class rate levels for general commodities. In regard to the use of the adjusted mileages in connection with other rates, the examiner likewise proposed that the new mileages be adopted. He said that if any of the parties considered that the resulting rates and charges would be unjust, unreasonable, discriminatory, or otherwise improper in any specific situation, the matter might be brought to the Commission's attention for such adjustment in the rates involved as might be considered necessary.

On exception, shipper interests claimed that improved highways had reduced transit time and traffic congestion. Increases proposed by the department's engineers, they asserted, were unjustified. Those shippers urged that a further study be made to bring the staff information up to date. Some of them assailed the use of mileages exceeding actual mileages. The rates themselves, these shippers asserted, should take care of such factors as terminal

delays and traffic congestion. Other shippers opposed any change in mileages at least until a further study was made.

In addition to the foregoing general exceptions, the San Francisco Chamber of Commerce attacked the constructive mileages proposed between San Francisco and points south of that city. Its contention was that the proposals submitted by the department's witness failed to give effect to marked improvements in Highway 101 running south to San Jose and points beyond. The chamber, the canners' league, the dried fruit association, and certain individual shippers stressed the importance of the consequences of increases in mileages between San Francisco and San Jose and vicinity, as proposed, without a corresponding adjustment of Oakland-San Jose mileages. They pointed out that rate parity for San Francisco-San Jose and Oakland-San Jose traffic would be disrupted. This rate parity, they said, was one of long standing. They insisted that its continuation was necessary to avoid unwarranted diversion of traffic away from San Francisco.

The Tank Truck Operators Association excepted to the use of constructive mileages computed via the San Francisco-Oakland Bay Bridge, the Golden Gate Bridge, the Richmond-San Rafael Ferry, or the Coronado Ferry, in connection with determining rates for the transportation of bulk petroleum or petroleum products. Such commodities, the association alleged, were not permitted to be hauled over these bridges or by these ferries.

The only reply to the foregoing exceptions was that filed jointly by The Truck Owners Association of California and Motor Truck Association of Southern California. They stated that they believed that the proposed distance table provided constructive mileages conforming more closely with present highway and traffic conditions than the present table. On the other hand, they claimed,

the proposals were not free from defects and might to advantage be supplemented by more up-to-date information and further adjustment.

The studies made by our staff were full and careful appraisals of the distance problem. We believe that these studies and the examiner's recommendations based thereon give reasonable effect to current highway conditions and traffic. The proposed new distance table should be adopted. With the two exceptions herein-after mentioned, the examiner's recommendations will be followed. Clerical errors discovered in the proposed new distance table will be corrected.

With respect to uniformity of rates between San Francisco and Oakland, on the one hand, and the San Jose area, on the other, the average of the San Francisco and Oakland mileages is now applicable where distances from both San Francisco and Oakland exceed 70 miles. The rate uniformity in San Francisco-San Jose and Oakland-San Jose rates may be maintained by reducing the range of the applicability of the average mileage provisions from 70 to 40 miles. No one disputed that there was a need for continuing the rate equality in question. From and to other similarly situated points, like rate equality should be maintained or achieved. We will make the necessary adjustment of the average distance provisions.

The sought mileage exception on bulk petroleum and petroleum products is well founded. Mileages over routes via the restricted bridges and ferries specified in the exceptions will be excluded from use in rate-making determinations under the bulk petroleum tariff.

The readjustment of constructive mileages herein found necessary will require extensive tariff work by common carriers. The revised mileages will, therefore, not be made operative until January 1, 1952. According to the record, such time is necessary for the common carriers to do their tariff work. Meanwhile, any

interested parties believing that adjustments of the minimum rates themselves are necessary in any respect due to the adoption of the new constructive mileages should make their proposals in sufficient time to permit consideration and disposition of such matters prior to the effectiveness of the new distances.

Classification Ratings

The department's rate witness and carrier witnesses proposed that extensive exception ratings higher than the corresponding classification ratings be established for numerous light and bulky articles. Carrier witnesses also proposed the establishment of higher ratings for various other commodities because of unfavorable transportation characteristics they attributed to those commodities. Some of the carrier witnesses proposed further that, if the higher ratings sought were not approved, a so-called "cubic foot rule" be established while proper classification ratings were given further study. Shippers of dry cell batteries sought a lower rating for that commodity.

Shipper interests vigorously opposed the higher ratings submitted by the staff and carrier witnesses. They pointed out that historically exception ratings were established to provide lower rather than higher bases. They also pointed out that the Interstate Commerce Commission had rejected proposals for exception ratings higher than the governing classification for interstate traffic and that it had suggested that carriers seek amendment of the classification when they considered higher ratings necessary. Shippers of linoleum, cork, glass bottles, furniture and other commodities offered evidence contradicting carrier evidence submitted in support of the proposed higher ratings.

The examiner pointed out that, while the proposed exceptions embraced many articles which the witnesses considered as having

adverse transportation characteristics, they admittedly did not cover all articles which the witnesses believed possessed such characteristics. There was contradictory evidence, he stated, with respect to the transportation characteristics of certain of the commodities. The Interstate Commerce Commission had, and still has, the general classification ratings under nation-wide study in its Docket No. 28310, Consolidated Freight Classification. The examiner said further that all the parties had agreed that the revisions of interstate ratings would require further consideration of the ratings for California intrastate traffic. He concluded that the prospect of substantial changes in California ratings being thus made necessary must be faced and that in the circumstances extensive changes at this time were not warranted. With respect to the proposal that a cubic foot rule be established, the examiner said that such a rule had not been shown to be appropriate or justified for application in connection with minimum rates. He recommended that certain carrier proposals on wine and honey be adopted. The wine proposal was represented as being merely a clarification of the present basis, and the honey proposal as being a necessary means of offsetting susceptibility to damage and resulting carrier liability.

On exception, carrier interests objected to the examiner's conclusions that higher exception ratings were not supported by the record, and that a cubic foot rule had not been justified. They stated that there was no assurance as to when revised interstate classification ratings might be approved by the Interstate Commerce Commission, and that the establishment of higher intrastate exception ratings should not await disposition of that Commission's Docket No. 28310, supra. The truck association said that, if the record was considered incomplete on this phase, the matter should be set for further hearing, and that, in the meantime, a cubic foot rule should

be established. Finally, the truck associations urged the Commission to investigate further the matter of classification ratings.

Dissatisfaction with classification ratings assigned to articles claimed to have adverse transportation characteristics is no new development. The root of this matter is in the classifications themselves. The National Motor Freight Classification, widely used throughout the Nation but not in California in connection with highway carrier traffic, treats freight such as that in controversy here in substantially the same manner as the Western Classification. The latter classification generally governs the ratings under our minimum rates. The problems with which the California carriers are faced are not peculiar to this State. The drastic remedies proposed on this record would be limited to California traffic. Moreover, these remedies would be used for some but not for all articles considered to have unfavorable transportation characteristics. The foregoing, coupled with the fact that nation-wide classification ratings are now under scrutiny by the Interstate Commerce Commission, impels the conclusion that the increased classification rating proposals are not justified at this time. In regard to the cubic foot rule proposal, the record does not show that this type of rule is an adequate temporary solution of the problem or that it is appropriate for a minimum rate tariff.

As hereinbefore noted, the revision of the rating on wine was a carrier proposal which the examiner recommended be adopted on the ground that the revision would merely clarify the application of the rating. On exception, the Wine Institute claimed that the proposal would substantially increase charges for certain wines and other vinous liquors. The record made is not sufficient to establish that higher rates are necessary. The examiner's recommendations will not be adopted.

The propriety of the recommended change in the description of honey although not challenged on exception will not be approved for the reason that changes of this character should be deferred until the scope of such general classification changes as may become necessary is established.

Reclassification of dry cell batteries in less-carload and less-truckload quantities from a 3rd class to a 4th class rating, as proposed by the shippers, was recommended by the examiner. He said that petitioners had shown that the transportation characteristics of this commodity were similar to and in some cases more favorable than articles accorded the 4th class basis. He said further that the sought rating would give appropriate effect to density, value and other rate-making and classification considerations.

Rail line respondents took exception to the foregoing recommendation. They claimed that the showing made by petitioners was inadequate. They had offered no opposition to the proposal at the hearing.

Petitioners' showing is not inadequate, as claimed by the rail respondents. The reduced rating will be established.

#### Rules and Regulations

Highway Carriers' Tariff No. 2, the general commodity tariff referred to at the outset of this opinion, contains rules and regulations governing the application of the class and commodity rates provided therein. At the hearings the rate witness from our transportation department, and shipper and carrier witnesses, proposed numerous revisions in the rules and regulations. Their proposals were covered in considerable detail in the examiner's proposed report. His recommendations were specifically set forth in that report. For the most part the propriety of these recommendations was not questioned on exception. Only those matters which remain in

controversy require further discussion in this opinion. These controversial matters are the tank truck exemption, the deductions for freight not accorded pickup or delivery service, the split pickup and delivery provisions, the bill of lading requirements, the so-called "liberalized" packing rule, and the minimum charges.

All commodities transported in bulk in tank equipment are exempted from the Tariff No. 2 rates under the existing exception. In the interest of clarity, the staff rate witness proposed that concrete transported in vehicles equipped for mechanical mixing in transit be specifically exempted. A carrier representative, while not opposing this proposal, urged that such exemptions be generally restricted to liquid commodities. These sought changes were not opposed at the hearings.

The examiner recommended that the foregoing proposals be adopted on the grounds that this would more definitely state, and properly limit, the scope of the exemptions.

The Tank Truck Operators Association, on exception, proposed that either the existing unqualified exemption be retained or that the following provision be adopted in its place:

"Liquids, compressed gases, commodities in semi-plastic form and commodities in suspension in liquids in bulk, in tank trucks, tank trailers, tank semi-trailers or a combination of such highway vehicles."

The association claimed that, under the recommended exemptions, commodities not now subject to Tariff No. 2 and for which the rates in that tariff were not designed would be made subject thereto. The alternative proposal, it said, would continue the exemptions in such cases. It did not oppose the recommended exemption for concrete.

The association's alternative proposal will be adopted for the reasons advanced. The specific exemption on concrete likewise will be adopted.

Tariff No. 2 now provides that no deduction from rates specifically named therein shall be made on shipments transported for persons, companies or corporations on whose premises depots from or to which the transportation is performed are located. A carrier witness proposed that similarly no deduction be made on shipments originating from storage on the same premises on which the carrier's depot is located, or on shipments originating from rail cars which have been unloaded on the same premises on which a carrier's depot is located. The witness claimed that carriers which maintained depots and warehouses located on the same premises, or carriers which performed pool car distribution on depot premises, had an unfair and unreasonable advantage over their competitors.

At the hearings, shippers offered no objection to the proposed restriction.

The examiner stated that the amendment appeared justified in order to bring about equality of carrier opportunity.

On exception the Los Angeles Chamber of Commerce contended that no pickup service was required on shipments originating from storage or originating from pool cars unloaded on the carrier's premises, and that shippers should not be required to pay for service not performed.

The circumstances and conditions surrounding the transportation in question have not been fully developed on the record as it now stands. In view of the controversy which has developed, and the inadequacy of the record in the face of this dispute, the proposal will not be adopted.

In the split pickup and delivery rules, the staff rate witness proposed that the minimum weight for split shipments be increased from 4,000 to 10,000 pounds, and that the number of component parts, at present not subject to any restrictions, be limited to ten. He also proposed some clarifying changes in the language covering application of the rules.

A carrier witness urged that charges for split shipments be revised so as to vary with the aggregate weight of the consignment and with the distance involved. This, he said, would give effect to cost characteristics of such shipments as disclosed by the experience of his lines. He also proposed that the existing provision permitting the treatment of any component part as a separate shipment when a lower charge results be canceled.

Shippers strenuously opposed the staff and carrier proposals. They claimed that adoption of these restrictions would not be in harmony with established distribution methods; that retention of the existing rules was, from an economic standpoint, vital; and that these rules should not be limited without substantial reasons therefor.

The examiner concluded that the proposals, except for the proposed changes in language submitted by the staff witness for clarity, should not be adopted. He so recommended.

On exception, the truck interests objected to the examiner's recommendations. They claimed that substantial changes should be made in the rules. They urged that, if such changes were not considered justified on the present record, the Commission investigate the matter further.

The record shows that split pickup and delivery service is an important link in the distribution methods used by certain shippers. The carriers recognize that further study may be advisable. In the circumstances, we will adopt at this time only the changes in language designed to clarify the existing rules.

A witness for the rail lines proposed that the carriers be prohibited from issuing a bill of lading covering a shipment which the carrier will be unable to move in its entirety from the consignor's premises on the same date as the date of the shipping document.

The examiner concluded that such a proposal was a radical departure from a competitive arrangement which had been in effect since the inception of permitted carrier rate regulation. He stated that adoption of a proposal of this kind would hamper small carriers in competing with large carriers, and that its propriety under the circumstances seemed highly questionable.

The rail lines, on exception, contended that the fact that small carriers would be hampered in competing with larger carriers was not a factor to be considered if the practice engaged in was either improper or unlawful, and that no more consideration should be given to this viewpoint than where small carriers engaging in unlawful practices hamper large carriers.

As in the case of the split pickup and delivery rules just discussed, the record is not sufficient to justify us in making a change in a long-standing shipping practice. It has not been established that this practice is unlawful or improper. In the circumstances the examiner's recommendation will be adopted.

The so-called "liberalized" packing rule in Tariff No. 2 provides that articles may be accepted for transportation in any container or any shipping form which will render the transportation of the freight reasonably safe and practicable. It also provides that if two or more ratings are provided for an article in the form in which it is shipped, subject to different packing rules, the lowest of such ratings will apply.

The staff rate witness proposed that a change be made in the language for clarification but that otherwise the present rule be retained. The more stringent Western Classification rules, he said, were not suitable for use in connection with a highway carrier minimum rate structure.

A witness for one of the truck associations said that carrier members favored elimination or revision of the present rule.

He offered no specific proposal as to how it should be changed. Other carrier witnesses urged the adoption of the packing requirements contained in the Western Classification.

The examiner concluded that the Western Classification requirements or similar provisions should not be adopted for highway carrier transportation. He recommended that the proposal of the staff rate witness be adopted. He said, however, that further study of the rule and its impact upon the carrier practices, costs and revenues would be advantageous.

On exception, the carriers agreed that a further study should be made. They contended, however, that the existing rule was discriminatory and that it should not be continued unless further restrictions were adopted or the rule clarified. They did not state what restrictions should be made nor the changes deemed necessary for clarification. The rail lines also contended that conditions had substantially changed since the present rule was established. They believed that the rule no longer served a useful purpose and that it should be canceled.

There is no specific proposal before us other than the clarification proposal submitted by the staff rate witness and the cancellation proposal of certain of the carriers. We will adopt the staff proposal, as recommended by the examiner, and otherwise make no change in the rule.

We turn now to the matter of the minimum charges. Different bases of minimum charges are provided for northern and southern California traffic. As an exception to the northern California basis, special minimum charges apply to transportation between San Francisco and East Bay cities. Other exceptions to the general bases are minimum charges applicable to shipments moving to or from steamship wharfs or docks within the Los Angeles Harbor area and to shipments transported beyond public highways to or from oil well and gas well sites.

The examiner pointed out that the northern California basis had recently been established on a separate record dealing specifically and entirely with the subject. He said that rate-making considerations in northern and southern California were not sufficiently different to justify different rate treatment. Therefore, he recommended that the northern California basis be extended state-wide without special provision for the Los Angeles Harbor area or the oil well and gas well traffic. The transbay exception, he also said, had been made after recent consideration of that problem specifically and should be retained.

On exception, some of the shippers claimed that the northern scale had been established on a record in which southern California interests had not participated and in which no information on southern California traffic had been supplied. Other shippers objected to the recommended retention of the lower transbay minimum charge scale on the grounds that these charges did not reflect costs and were discriminatory. The truck associations objected to eliminating the higher specific charges applicable to the Los Angeles Harbor area traffic and to transportation to or from oil or gas well sites. They urged that the examiner's recommended charges be raised to the existing level. Other carriers objected to extending the northern California basis state-wide. They claimed that the costs under which the northern basis was established were developed only for that territory.

Our last interim adjustment of the class rates also provided for an increase in the minimum charges. The existing minimum charge arrangements will not be disturbed on the basis of the record here as it now stands.

Noncontroversial rule changes recommended by the examiner will be adopted for the reasons set forth in his report.

General Conclusions and Findings

In considering this record as a whole, it is apparent that a further broad and sweeping inquiry is not warranted at this time. It is likewise apparent that under rapidly changing circumstances and conditions further investigations of specific matters herein should await the showing of a need therefor.

Interested parties may file petitions seeking such adjustments as they may deem necessary and justified. They should be prepared to make adequate and complete showings based on current information in support of the adjustments sought.

There are pending in this proceeding petitions of California Fruit Growers Exchange seeking modification of the minimum rate provisions relating to the alternative use of rail rates; of California State Brewers Institute seeking modification of the minimum rates on malt liquors; of the Draymen's Association of Alameda County, and others, seeking to establish increased minimum rates in a "San Francisco Bay Metropolitan Area"; and of the Common Carrier Conference of the Truck Owners Association of California seeking modification of the minimum rates for transportation between Bay area points on the one hand and points north of San Francisco on U.S. Highway 101 on the other. The Fruit Growers Exchange seeks substantially the same adjustment of the provisions involved as the adjustment recommended by the examiner which will be made herein. The petition on malt liquors has been partially heard and is scheduled for further hearing. The other two matters will be scheduled for hearing as soon as interested parties advise us of their readiness to proceed.

The revision of the minimum rate tariffs covered by the conclusions hereinbefore reached and the adoption of the proposed new distance table involve related adjustments of minor consequence. Various changes clarifying the tariff provisions will be made, as

well as other changes desirable in the interest of tariff uniformity. Limitation of the distribution of copies of such tariff revisions to the parties affected by the changes will save a considerable amount of money and avoid confusion. A separate order will be issued covering each of the tariffs involved.

Certain of the parties requested oral argument before the Commission in bank. In view of the conclusions hereinbefore reached in regard to the rate levels and other controversial matters, such argument is not necessary. The requests are denied.

Upon consideration of all of the facts and circumstances of record, we are of the opinion and hereby find that modification of the existing rates, classifications, constructive highway distances and rules and regulations, is justified to the extent hereinbefore indicated; and that, in all other respects, the proposals and recommendations considered herein are not justified.

O R D E R

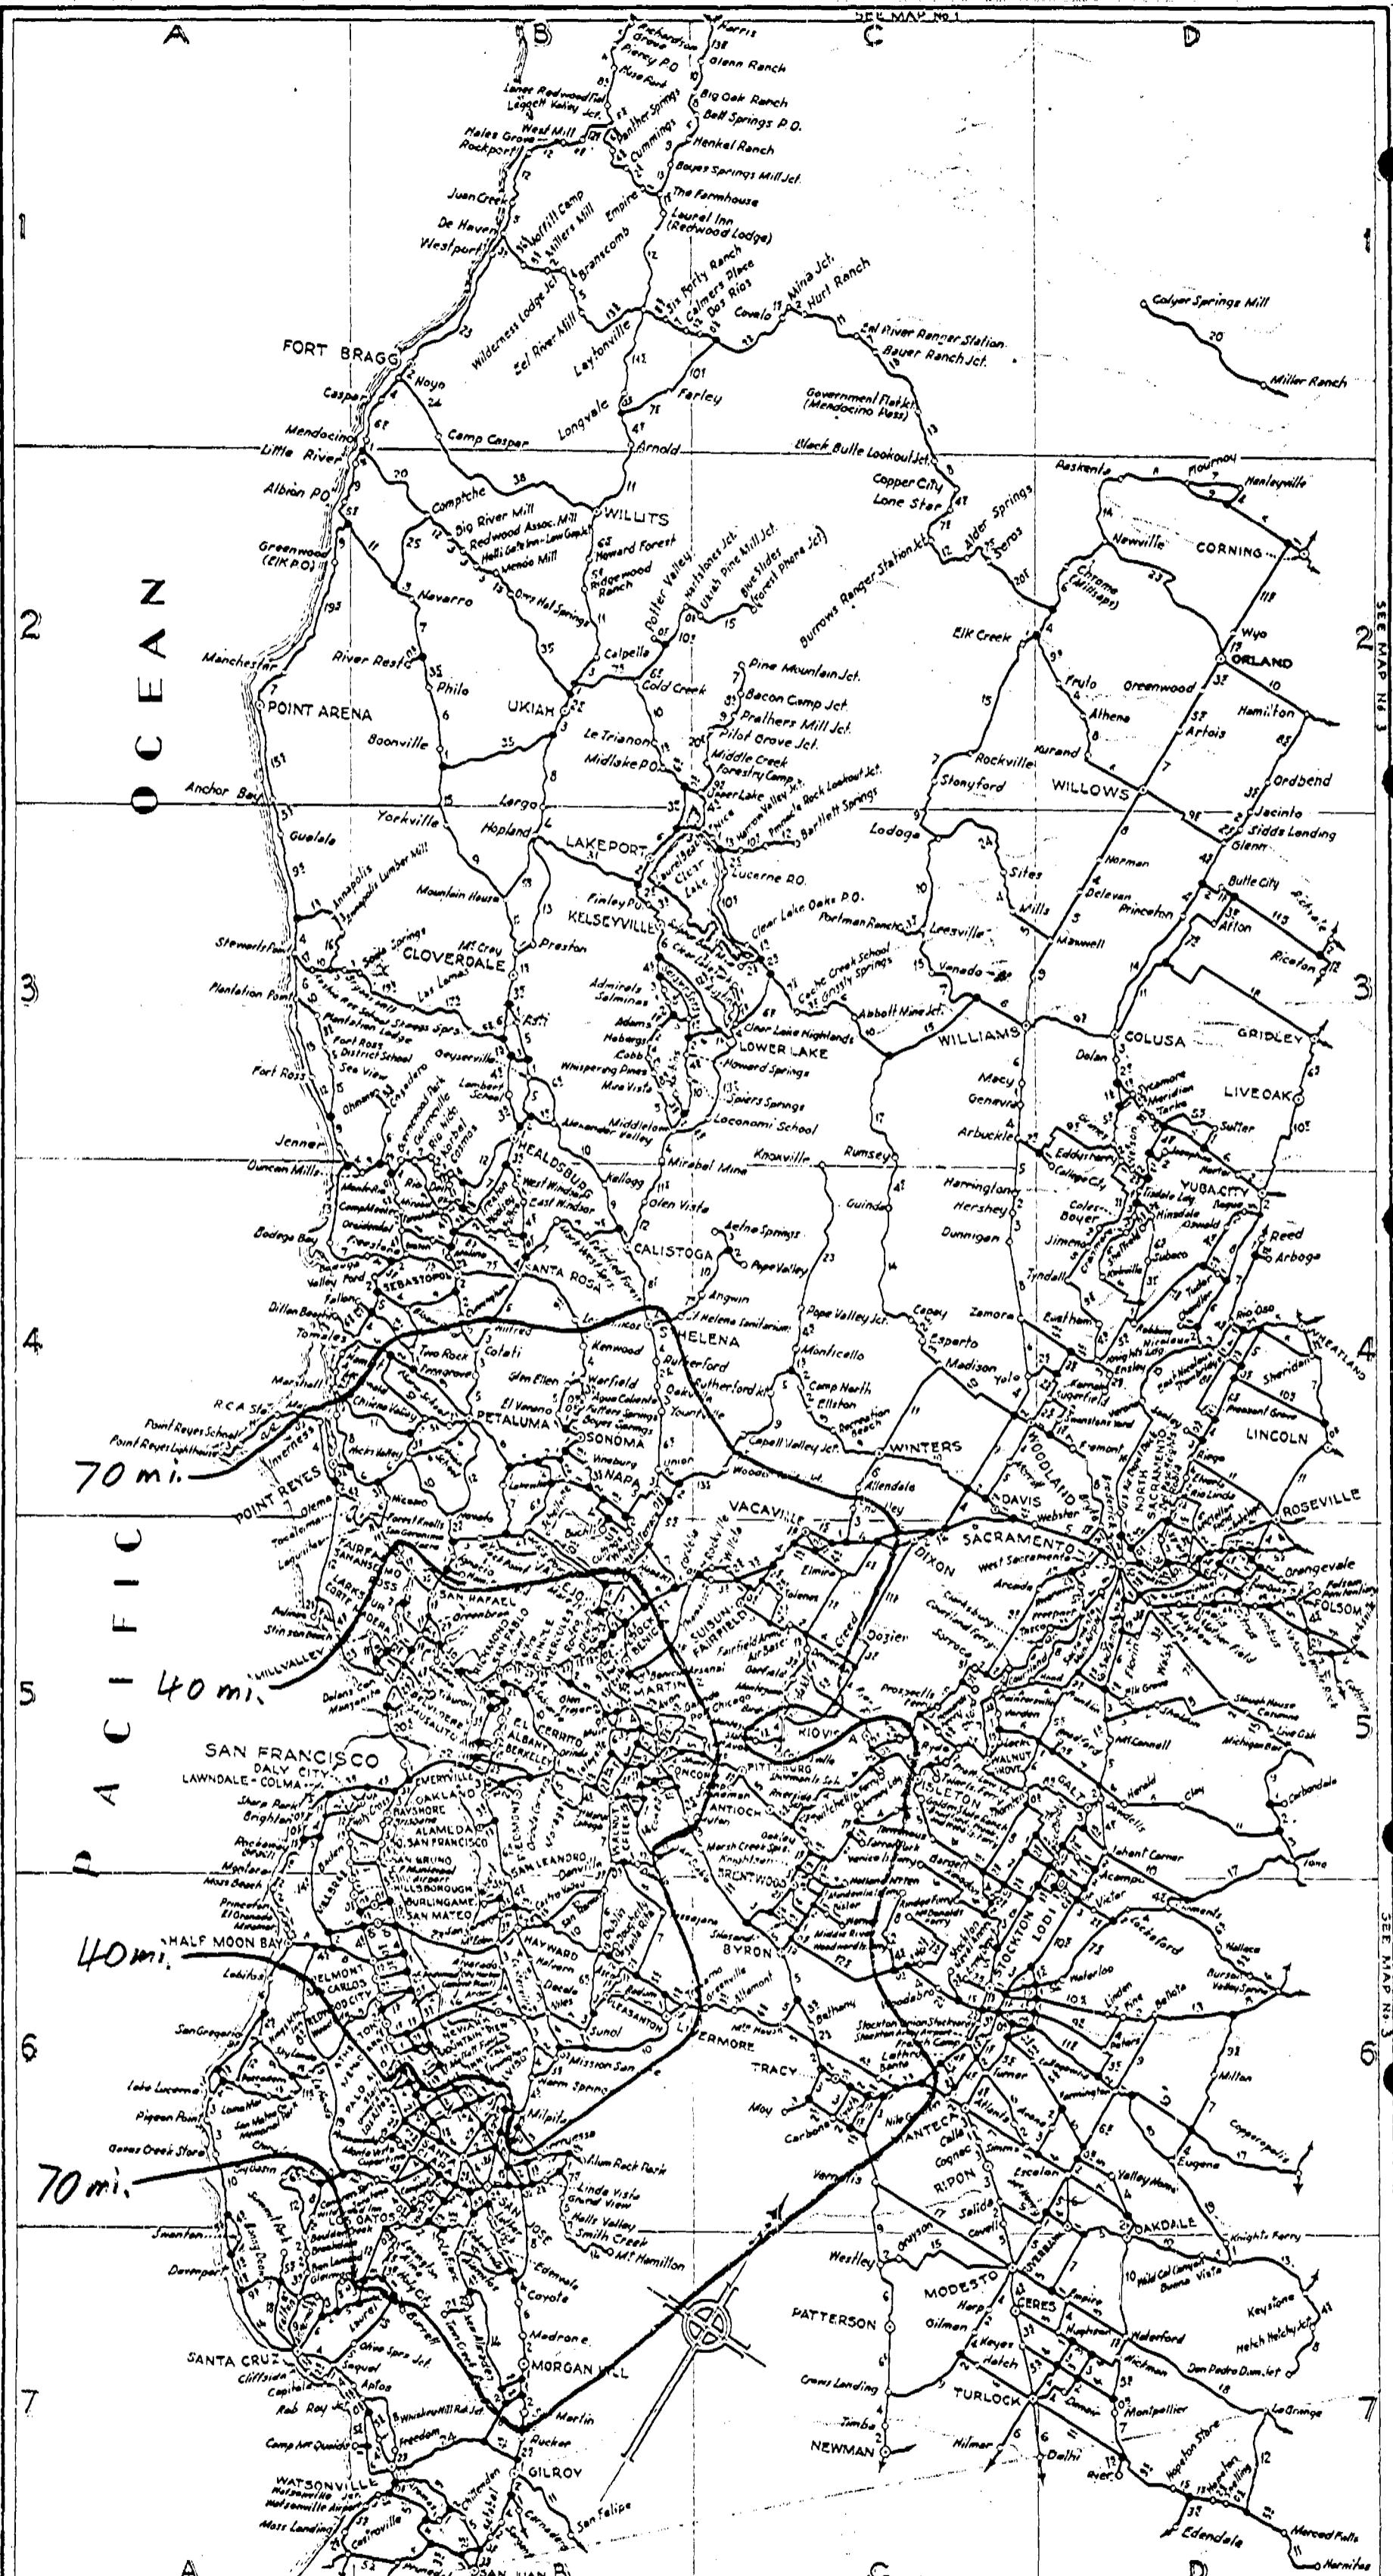

Based on the evidence of record, and on the conclusions and findings set forth in the preceding opinion,

IT IS HEREBY ORDERED that the milcages, maps, rules and regulations and other provisions established by Decision No. 31605, as amended, in Case No. 4088, Part "N," Case No. 4145, and Case No. 4246, and as set forth in Distance Table No. 3, be and they are hereby superseded, effective January 1, 1952, by the provisions contained in Distance Table No. 4 cancels Distance Table No. 3, attached hereto as Appendix "A" and by this reference made a part hereof.

This order shall become effective thirty (30) days after the date hereof.

Dated at San Francisco, California, this 31<sup>st</sup> day of July, 1951.

ISSUED BY THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA, SAN FRANCISCO, CALIFORNIA.

ITEM NO.	SECTION 1
10	<p style="text-align: center;"><u>DEFINITIONS</u></p> <p>CONSTRUCTIVE MILEAGE IS THAT MILEAGE USED FOR RATE-MAKING PURPOSES IN THE TRANSPORTATION OF PROPERTY, AND IS DETERMINED IN ACCORDANCE WITH THE RULES HEREIN.</p> <p>A POINT MEANS THE PRECISE LOCATION TO OR FROM WHICH CONSTRUCTIVE MILEAGE DISTANCE IS TO BE DETERMINED.</p> <p>MILEAGE BASING POINT MEANS THE PRECISE LOCATION DESIGNATED TO REPRESENT A NAMED COMMUNITY OR UNNAMED HIGHWAY JUNCTION POINT SHOWN ON THE MAPS IN SECTION 4, AS FOLLOWS:</p> <ul style="list-style-type: none"> <li>○ INDICATES MILEAGE BASING POINTS FOR COMMUNITIES NAMED IN RED ON THE MAPS IN SECTION 4 (SEE RULE 3). CONSTRUCTIVE MILEAGE DISTANCES BETWEEN THESE MILEAGE BASING POINTS APPAR. IN SECTIONS 2 OR 3.</li> <li>○ INDICATES MILEAGE BASING POINTS FOR COMMUNITIES NAMED IN BLACK ON THE MAPS IN SECTION 4 (SEE RULE 3).</li> <li>● INDICATES UNNAMED HIGHWAY JUNCTION POINTS SHOWN ON THE MAPS IN SECTION 4.</li> </ul> <p>ACTUAL HIGHWAY MILEAGE BETWEEN TWO POINTS, AS USED HEREIN, MEANS THE LOWEST ACTUAL HIGHWAY DISTANCE ALONG THE SHORTEST USABLE ROUTE CONNECTING THE POINTS.</p> <p>A SEGMENT OF HIGHWAY MEANS THAT PORTION OF A HIGHWAY BETWEEN TWO CONSECUTIVE MILEAGE BASING POINTS AS SHOWN ON THE MAPS IN SECTION 4.</p>
20	<p style="text-align: center;"><u>RULES</u></p> <p><b>RULE 1</b></p> <p>CONSTRUCTIVE MILEAGE DISTANCES BETWEEN MILEAGE BASING POINTS FOR COMMUNITIES NAMED IN RED ON THE MAPS IN SECTION 4 (SEE ITEM NO. 30) SHALL BE THE DISTANCES SET FORTH IN SECTION 2 OR 3 WHICH SHALL TAKE PRECEDENCE OVER ANY CONSTRUCTIVE MILEAGE DISTANCES OTHERWISE DEVELOPED BETWEEN SUCH MILEAGE BASING POINTS. IF ANY CONSTRUCTIVE MILEAGE DISTANCE SHOWN IN SECTION 2 DIFFERS FROM THE CORRESPONDING DISTANCE IN SECTION 3, THE SECTION 3 DISTANCE SHALL APPLY.</p> <p><b>RULE 2</b></p> <p>CONSTRUCTIVE MILEAGE DISTANCE BETWEEN ANY TWO MILEAGE BASING POINTS SHALL BE THE TOTAL OF THE MILEAGES SHOWN ON THE MAPS IN SECTION 4 ALONG THE CONTINUOUS ROUTE WHICH RESULTS IN THE LEAST CONSTRUCTIVE MILEAGE DISTANCE BETWEEN SAID POINTS. DISTANCES DETERMINED IN ACCORDANCE WITH THE PROVISIONS OF RULE 1 SHALL BE EMPLOYED BETWEEN MILEAGE BASING POINTS FOR COMMUNITIES NAMED IN RED ON SAID MAPS WHICH ARE LOCATED ALONG THE CONTINUOUS ROUTE.</p> <p><b>RULE 3</b></p> <p>MILEAGE BASING POINTS FOR THE COMMUNITIES NAMED IN RED ON THE MAPS IN SECTION 4 SHALL BE THOSE SHOWN IN ITEM 30. FOR ALL COMMUNITIES NAMED IN BLACK ON THE MAPS IN SECTION 4 THE MILEAGE BASING POINT SHALL BE AN ESTABLISHED RAILROAD DEPOT, OR IF THERE BE NO SUCH DEPOT IT SHALL BE THE POST OFFICE, OR IF THERE BE NO SUCH POST OFFICE IT SHALL BE THE CENTER OF THE COMMUNITY.</p> <p><b>RULE 4</b></p> <p>(A) WHEN A POINT FALLS WITHIN THE LIMITS OF AN INCORPORATED CITY, OR WITHIN A MILE RADIUS OF THE MILEAGE BASING POINT FOR THAT CITY (COMMUNITY), THE MILEAGE BASING POINT SHALL BE USED AS A TERMINAL POINT IN CONSTRUCTIVE MILEAGE DETERMINATION, WITH THE EXCEPTION OF POINTS FALLING WITHIN THE BOUNDARY OF ANY LOS ANGELES ZONE DESCRIBED IN ITEM 40.</p>

ISSUED BY THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA, SAN FRANCISCO, CALIFORNIA.

ITEM NO.

## SECTION 1

RULES (CONT.)

## RULE 4 (CONT.)

(B) WHEN A POINT FALLS WITHIN THE BOUNDARY OF A LOS ANGELES ZONE, AS DESCRIBED IN ITEM 40, THE MILEAGE BASING POINT FOR THAT ZONE SHALL BE USED AS A TERMINAL POINT IN CONSTRUCTIVE MILEAGE DETERMINATION. THE LOS ANGELES ZONES ENBRACE ALL POINTS WITHIN THEIR RESPECTIVE BOUNDARIES AND INCLUDE BOTH SIDES OF STREETS, BOULEVARDS, ROADS, AVENUES OR HIGHWAYS NAMED. THE MILEAGE BASING POINTS FOR THE FOLLOWING COMMUNITIES SHALL BE USED AS MILEAGE BASING POINTS FOR THE LOS ANGELES ZONES INDICATED:

ZONE 1	LOS ANGELES	ZONE 11	GLENDALE
• 2	CANOGA PARK	• 12	HIGHLAND PARK

(C) WHEN A POINT FALLS WITHIN A MILE RADIUS OF THE MILEAGE BASING POINT OF A NAMED COMMUNITY APPEARING ON THE MAPS IN SECTION 4, WITH THE EXCEPTION OF POINTS WITHIN INCORPORATED CITIES OR LOS ANGELES ZONES, THE MILEAGE BASING POINT SHALL BE USED AS A TERMINAL POINT IN CONSTRUCTIVE MILEAGE DETERMINATION. THE NEAREST MILEAGE BASING POINT SHALL BE USED IF THE POINT FALLS WITHIN AN OVERLAP OF MILE RADIUS AREAS.

(D) WHEN A POINT FALLS WITHIN A MILE RADIUS OF AN UNNAMED HIGHWAY JUNCTION POINT APPEARING ON THE MAPS IN SECTION 4, WITH THE EXCEPTION OF POINTS WITHIN INCORPORATED CITIES, LOS ANGELES ZONES, OR WITHIN A MILE RADIUS OF ANY NAMED COMMUNITY APPEARING ON THE MAPS IN SECTION 4, THE JUNCTION POINT SHALL BE USED AS A TERMINAL POINT IN CONSTRUCTIVE MILEAGE DETERMINATION. THE NEAREST UNNAMED JUNCTION POINT SHALL BE USED IF THE POINT FALLS WITHIN AN OVERLAP OF SUCH MILE RADIUS AREAS.

20  
(CONT.)

## RULE 5

(A) THIS RULE SHALL APPLY ONLY WHEN THE LOCATION OF A POINT IS OTHER THAN THAT DESCRIBED IN RULE 4.

(B) CONSTRUCTIVE MILEAGE DEVELOPED BY THE FOLLOWING METHODS SHALL BE USED IN THE SAME MANNER AS HIGHWAY SEGMENT CONSTRUCTIVE MILEAGES IN THE APPLICATION OF RULE 2:

- (1) THE CONSTRUCTIVE MILEAGE FOR ANY PORTION LESS THAN THE TOTAL LENGTH OF A SEGMENT OF HIGHWAYS AS SHOWN ON THE MAPS IN SECTION 4 SHALL BE THE ACTUAL HIGHWAY MILEAGE.
- (2) THE CONSTRUCTIVE MILEAGE ALONG ANY HIGHWAY NOT SHOWN ON THE MAPS IN SECTION 4 SHALL BE THE ACTUAL HIGHWAY MILEAGE ALONG SAID HIGHWAY.
- (3) THE CONSTRUCTIVE MILEAGE ALONG A RAILROAD WHICH CONTACTS NON-HIGHWAY POINT OR POINTS SHALL BE THE RAIL MILEAGE BETWEEN NON-HIGHWAY POINT AND FIRST HIGHWAY CONTACT, OR SHALL BE THE RAIL MILEAGE BETWEEN NON-HIGHWAY POINTS IF NO HIGHWAY CONTACT IS MADE BETWEEN THE POINTS.

(C) NO PORTION OF THE CONTINUOUS ROUTE BETWEEN POINTS USED UNDER THIS RULE SHALL HAVE A CONSTRUCTIVE MILEAGE DISTANCE LESS THAN THAT DEVELOPED BETWEEN THE SAME POINTS UNDER THE PROVISIONS OF RULES 2, 3, AND 4, OR UNDER THE COMBINATION OF THE PROVISIONS OF PARAGRAPH (B) PART (1) OF THIS RULE WITH RULES 2, 3, AND 4.
