Applicant is one of a group of carriers whose applications were heard in connection with those whose problems precipitated the investigation designated by the Commission as Case No. 5535. Hearings were held on this application in connection with that case. Evidence of community growth and the resulting expansion of carrier operations, as developed in Case No. 5535, was found to apply to this applicant and to have materially influenced his activities. In addition, a hearing on this application alone was held before Examiner John Power in San Francisco on October 6, 1954. On that occasion applicant presented evidence covering the history, finances, equipment, facilities and personnel of his organization.

Applicant gave operating testimony in his own behalf and through him seven exhibits were introduced. Five shipper witnesses

testified in support of the application. From these sources the facts set forth below were developed.

the second s

Applicant started in business in 1938 with one truck and his brother and himself as the only personnel. He now operates 40 pieces of equipment and employs 43 persons.

Applicant presented a balance sheet as of December 31, 1953. Another financial exhibit gave income statements for five full years (1949 through 1953). Operations in each reported year show a profit. Although a slightly unfavorable current ratio is shown, the balance sheet on the whole reveals a satisfactory financial condition. The net investment of applicant was in excess of \$49,800.

Applicant has a terminal on leased ground in San Francisco. His lease, he stated, was for five years and gives him the right to remove those buildings on the property which are owned by him. The office, dock and shop buildings are owned by applicant. He has 15,000 square feet of land under cover and about two acres for storage and operation.

Over 100 commodities had been carried by applicant. Approximately 200 consignors and consignees were served during the period from July 1, 1953, to August 31, 1954. Weights varied during the same period from less than 100 pounds to more than 100 tons per shipment.

The evidence shows that applicant has the necessary financial ability, facilities, equipment, experience and personnel to undertake the proposed service. It further shows that the growth of the San Francisco-East Bay community has increased the over-all requirements for common carrier service and has resulted in increased demand for applicant's services. Public convenience and necessity require that the application be granted. This grant will be on the condition, however, that applicant serve the whole of the San -Francisco-East Bay Cartage Zone as established in Case No. 5535.

Acceptance of the certificate herein granted will be construed as consent to this condition.

Applicant is placed upon notice that operative rights, as such, do not constitute a class of property which may be capitalized or used as an element of value in rate fixing for any amount of money in excess of that originally paid to the State as the consideration for the grant of such rights. Aside from their purely permissive aspect, such rights extend to the holder a full or partial monopoly of a class of business over a particular route. This monopoly feature may be changed or destroyed at any time by the State, which is not in any respect limited as to the number of rights which may be given.

ORDER

Application having been filed and public hearings held thereon and the Commission having considered the same and being of the opinion and finding that public convenience and necessity so require, therefore,

IT IS ORDERED:

1. That a certificate of public convenience and necessity is hereby granted to Russ Di Salvo, an individual, doing business as Di Salvo Trucking, authorizing the establishment and operation of a service as a highway common carrier, as defined in Section 213 of the Public Utilities Code, for the transportation of general commodities except petroleum products in bulk in tank vehicles, uncrated household goods, livestock and commodities of unusual value, between the points set forth in Appendix "A" attached hereto and by this reference made a part of this order.

2. That in providing service pursuant to the authority herein granted, applicant may use any and all streets, roads, highways and bridges, and shall comply with the following service regulations:
