Application No. 36181

O P I N I O N

Jack Thompson is a highway carrier engaged in the transportation of property in California pursuant to a permit issued him by this Commission.

He seeks an order authorizing him to conduct service as a highway common carrier for the transportation of oilfield drilling mud and oil well mud treating compound, generally between Santa Rosa and Williams, on the north, and San Diego, on the south, including intermediate points on main and intersecting highways.

Notice of filing of the application was given all common carriers subject to the jurisdiction of this Commission.

Upon consideration of the allegations of the application and the representations filed pursuant to the above-mentioned notice, it appears that as of the date of the filing of the application applicant was conducting his operations within the scope of the permitted authority heretofore issued by this Commission. Such operations not having constituted highway common carriage, the sought certificate of public convenience and necessity is not a requisite for their continuance. The application will therefore be denied.

IT IS ORDERED that Application No. 36181 is denied.
