Decision No. 56180

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Investigation ) into the rates, rules, regulations, ) charges, allowances and practices of ) all common carriers, highway carriers) and city carriers relating to the ) transportation of sand, rock, gravel ) and related items (commodities for ) which rates are provided in Minimum ) Rate Tariff No. 7.)

Case No. 5437 Petition for Modification No. 36

### INTERIM OPINION

By this petition, filed August 2, 1957, the California Dump Truck Owners Association, Inc., seeks modification of Minimum Rate Tariff No. 7 by revisions of Items 300-B, 360-J, 361 and 362 so as to reinstitute "double factor" hourly rates in Northern Territory. On motion made at the hearing on this petition held October 16, 1957, the Commission, in its Decision No. 55859 dated November 19, 1957, ordered the consolidation of proceedings in Petition No. 36 and Petition No. 37 of the California Trucking Associations, Inc., for the limited purpose of receiving evidence and argument on the preliminary question of whether "double factor" minimum hourly rates should be established for the transportation of commodities by dump truck in Northern Territory, in Southern Territory, or in both territories.

-1-

AH

1

On October 22, 1957, petitioner filed an amendment to its petition requesting that, if "double factor" hourly rates are not established, the present "single factor" hourly rates for Northern Territory be revised to reflect the increases in drivers' wages which have become effective since the present rates were established.<sup>1</sup>

Public hearing, limited to the receiving of evidence regarding the proposed increase in "single factor" hourly rates, was held before Examiner Jack E. Thompson on December 12, 1957, at San Francisco. Evidence was adduced through the testimony of the secretary-manager of petitioner and the principal highway engineer for the Department of Public Works, State of California.

The present minimum hourly rates for the transportation of commodities in dump truck equipment in Northern Territory were established by the Commission in Decision No. 52952, dated April 24, 1955. The wage rates for drivers of dump trucks engaged in highway construction prevailing in April 1956 and in December 1957 are of record and are as follows:

-

ę

"Double factor" rates are those wherein the hourly rate for transportation is determined by adding an equipment factor rate published in the minimum rate tariff and the prevailing wage rate for the territory in which transportation is to be performed. "Single factor" rates are those in which the element of the cost of drivers' wages is included in the minimum rate itself.

Prevailing Wage Rates in Cents Per Hour Highway Construction - State of California \_\_\_\_\_\_Drivers of Dump Trucks

Column I - Bay Area District as described in Item 315, MRT-7. Column II - El Dorado District as described in Item 315, MRT-7. Column III - Kern District as described in Item 315, MRT-7. Column IV - San Luis Obispo District as described in Item 315, MRT-7.

In April 1956, overtime wages for Sunday work in the Bay Area, Kern and El Dorado districts were computed at one and one-half straight-time wages. In December 1957, overtime wages in all districts in Northern Territory for work on Sundays and holidays are double straight-time wages.

The present prevailing wages for drivers of dump trucks on highway construction projects are substantially the same as those provided in current contracts between the Associated General Contractors of America and the construction teamsters' unions. One exception is that, where the contract in force in 1956 provided for an additional 75 cents per day to be paid drivers of "double headers" and the 1957 contract provides for an additional \$1.00 per day for such work, the schedule of wages filed with the Director of Industrial

-3-

Relations as the prevailing wages to be paid to drivers on highway construction do not provide for additional wages for drivers of "double headers."

With the exception of the Bay Area and El Dorado districts' rates for trucks with capacities of 16 yards or more, petitioner requests that the minimum hourly rates for Northern Territory be increased by the exact amounts of the increases in wages. In the case of the former, petitioner requests that those rates be increased by the exact amounts of the wage increases plus an additional twelve and one-half cents per hour. The additional amount is predicated upon the assumption by petitioner that trucks with capacities of 16 yards or more operated over public highways must be double headers if carriers are to comply with the vehicular weight restrictions of the Motor Vehicle Code. This contention was not supported by the principal highway engineer of the State's Department of Public Works who described certain vehicles, not within the definition of the term "double headers," which are operated over public highways in connection with highway construction work.

It was shown that carriers are obligated to pay the increased wages and that the prevailing wages required to be paid by contractors to their employees engaged in driving dump trucks on highway construction projects are at about the same level as those required to be paid by carriers. As a result of the substantial increases in drivers' wages since the minimum rates were last adjusted, a situation exists which warrants action by the Commission prior to the completion of proceedings in this petition.

-4-

Participants in the proceeding were not opposed to an upward adjustment of the hourly rates by amounts equal to the increases in the prevailing wage rates. A number of parties objected to the additional twelve and one-half cents per hour proposed by petitioner for trucks of 16 yards or more capacity.

Upon consideration of all the facts and circumstances of record, the Commission is of the opinion that, pending further determination in this proceeding, interim increases, by amounts of the differences in the wages of drivers prevailing in December 1957 as compared with those prevailing in April 1956, in the minimum hourly rates for Northern Territory, are justified and are necessary. The additional twelve and one-half cents per hour proposed by petitioner to be applicable to the Bay Area and El Dorado districts' rates for vehicles of 16 yards or more capacity has not been justified.

## INTERIM ORDER

Based on the evidence of record and the findings and conclusions set forth in the preceding opinion,

IT IS ORDERED that Minimum Rate Tariff No. 7 (Appendix "A" of Decision No. 32566, as amended) is further amended by incorporating therein, to become effective March 2, 1958, the following revised pages, which pages are attached hereto and by this reference made a part hereof:

> Eleventh Revised Page 42 Third Revised Page 42-A First Revised Page 42-B

> > -5-

In all other respects, said Decision No. 32566, as amended, shall remain in full force and effect.

The effective date of this order shall be twenty days after the date hereof.

Dated at Francisco, California, this 25-\_, 1958. day of dent 2x ioners Commi
