

Decision No. 58885**ORIGINAL**

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Investigation to establish rules and
 procedures to facilitate administration
 of 1957 amendment of Vehicle Code
 sections 576 and 576.5 relating to
 requirement that certain motor vehicles
 must stop at railway grade crossings.

Case No. 5979

(Appearances are listed in Appendix C)

O P I N I O N

Prior to the legislative session of 1957, certain types of vehicles were required to stop at all railroad crossings regardless of the nature of the use of the crossing. The types of vehicles that were required to stop were those carrying passengers for hire, school buses, tank vehicles carrying flammable liquids or liquefied petroleum gas and trucks carrying explosives.

Relief from the operation of this law (section 576 of the Vehicle Code) could be had only by a formal application to the Commission in a specific case by an affected carrier. The procedure was cumbersome and expensive and was therefore used infrequently. It might be appropriate here to say that crossings of main and branch line tracks present no problem. It is clear that vehicles of the types noted above should stop at such crossings. The problem arises chiefly in connection with industry spur tracks which in some cases are very little used.

The 1957 Legislature amended section 576 and enacted section 576.5 of the Vehicle Code in an effort to deal with this situation. The latter section applies to a single case and will not be included in the rest of this discussion.

Section 576, as amended, requires the Commission to implement the Legislature's intent in certain ways. First, to define the

term "industrial or spur track"; second, to approve a design for an appropriate sign; third, to determine where and by whom, the sign is to be installed and maintained; fourth, to determine those crossings at which stops need not be made, and fifth, to set up procedures for the administration of the statute.

The present investigation was instituted on September 10, 1957 to carry out this mandate. Because of the extensive field work that had to be done, hearings were delayed until January, 1959. Two were held before Examiner John Power, in San Francisco on the 27th and in Los Angeles on the 29th of that month.

The staff presented two engineers from the traffic, operations and safety branch of its Transportation Division, one being the principal engineer in charge. Other witnesses testified for the Private Truck Owners' Bureau, the State Division of Highways and the cities of San Francisco, Los Angeles and Long Beach. Representatives of the City of Alhambra and the State Highway Patrol made statements. The staff presented an exhibit in San Francisco and expanded it in Los Angeles. The City of Los Angeles also presented an exhibit.

The first requirement is that of a definition. The staff recommended that the definition of "industrial or spur track" be "any track other than a main or branch line track". No objections were entered to this definition and it will be adopted.

The staff proposed a sign including the word "exempt" and the crossing number, illustrated opposite page 2 of Exhibit No. 1. The proposed colors were white on black. This sign would be attached to the standards on which the State Highway Division's sign W47R-- "railroad advance warning sign"--is placed. The Highway Division's sign expert recommended that the sign be yellow on black. This color scheme reverses that on the present W47R sign which is black on yellow. The staff had no objection and yellow on black will be adopted.

The City of Los Angeles proposed that the same sign be used to designate inoperative crossings and crossings of tracks not operated by common carriers. A nonoperative crossing is one in which the crossing track has been disconnected from operative railroad trackage. Thus, there is actually no crossing at all, just useless rails in a street. Such rails can be covered or removed at any time. Non-common carrier crossings have no special rights in a street and are subject to municipal police regulation.

It is important to both enforcement officers and drivers that the meanings of road signs be kept as simple as possible. Therefore, the section 576 "exempt" sign should be restricted to the precise purpose for which it is intended.

Los Angeles also suggested, supported by San Bernardino County and by certain evidence, that the crossing numbers be omitted from the sign. Firstly, it was contended, such omission will make the sign less expensive. Secondly, it will reduce the amount of stock that the public bodies will have to maintain for replacement purposes. The staff would prefer to have the crossing number on the sign. This would tend to prevent misuse of the signs, either through inadvertence or design. While the Commission is impressed with both arguments, the one for inclusion of the numbers seems the weightier.

Section 469 of the Vehicle Code requires that the railroad warning approach sign (W47R) shall be installed by the public authority which controls the road. In the Commission's opinion the "exempt" sign should, when practical, be placed on the post of the W47R sign just below the disc. It is in the interest of good administration that the attachment of "exempt" signs be left to the public authority that controls the W47R sign.

All spur or industrial crossings in the State (some 3,000 in all) have been surveyed by the staff in connection with this investigation. A list of crossings was developed from these surveys at which exempt signs might be displayed. Such list appears as Appendix B to Exhibit No. 1 and Appendix B to Exhibit No. 1A. Since the last hearing the staff has certain corrections to make in the appendices mentioned. It also has certain additions resulting from surveys made since Exhibit No. 1A was prepared. From all these sources the list attached as Appendix B to the following order has been made up. This will be established as the original list of exempt crossings.

In surveying all of the spur and industrial track crossings in the State, a few cases were found wherein crossings authorized by prior decisions of the Commission as "exempt" crossings were no longer deemed to be suitable for such exemptions due to changed conditions of traffic volumes, railroad operations, neighborhood development and other reasons. Such crossings are not contained in Appendix B. They are listed together with the reference to the formal proceedings which authorized them in the following order and it appears that such authorization should now be revoked and the signs removed.

A major purpose of the Legislature was to simplify the procedure for eliminating unnecessary stops at industrial track crossings. To accomplish this the staff's recommendation on page 2 of Exhibit No. 1 will be adopted. An interested party may file a request with the Commission by letter, with copies to each railroad and public agency affected, requesting that the crossing, or crossings, listed in the letter be added to, or deleted from, Appendix B.

We further find that except as provided by paragraphs (b) and (c) drivers of vehicles listed in paragraph (a) of section 576 of the California Vehicle Code must stop at all industrial or spur

track crossings in this State except at those crossings at which, with the approval of the Commission, distinctive signs are displayed indicating that no stop need be made. Stops shall be made, however, when a train, locomotive, or other vehicle is approaching the crossing upon the tracks or occupying the crossing or when for any reason the driver cannot see or read such sign from the driver's position.

O R D E R

Investigation having been instituted, public hearings held, and the Commission basing its decision upon the findings set forth in the foregoing opinion,

IT IS ORDERED that:

1. The definition of "industrial or spur track" shall be "any track other than a main or branch line track".
2. Stops shall be made at all industrial or spur track crossings except as provided in paragraphs (b) and (c) by drivers of vehicles listed in paragraph (a) of section 576 of the California Vehicle Code, except at those crossings at which the "exempt" sign described herein has been installed with the approval of the Commission. Stops shall be made, however, at such crossings when a train, locomotive, or other railroad equipment is approaching the crossing upon the tracks or occupying the crossing or when for any reason the driver cannot see or read such sign from the driver's position.
3. The distinctive sign or device as described herein shall be erected in the manner set forth in Appendix A at those industrial or spur track crossings listed in Appendix B where no stops need be made.
4. The Commission hereby establishes the following specifications for the distinctive sign or device required by section 576, paragraph (e) of the Vehicle Code:
 - A. Material: Eighteen gauge steel shall be used.

- B. Size: The size of the sign shall be not less than fifteen inches in length by nine inches in width.
- C. Design: The plate shall have a black background with a yellow border set in $\frac{1}{2}$ inch from the edge of the plate. Within the border there shall be placed the word "exempt" in addition to the crossing number assigned by this Commission to the crossing which the sign governs in yellow letters. The letters in the word "exempt" shall be 2 inches in height with lines of $\frac{5}{16}$ inch stroke and the letters and numerals of the assigned crossing number shall be $1\frac{1}{2}$ inches in height with line of $\frac{1}{2}$ inch stroke.

5. Each and every public agency having control of any roadway listed in Appendix B to this order shall, after the effective date hereof and in any event within six months after said effective date, install a sign, or signs, of the type described in Appendix A and thereafter maintain the same in the manner provided by Appendix A of this order, at each such listed crossing under its control. Said Appendix B is hereby incorporated by reference in this order the same as if it were fully set forth herein.

6. Crossings may be added to or deleted from the list in Appendix B hereto, by the Commission:

- A. Upon its own motion.
- B. By written request of any interested party. Such request may be made by letter. A copy of such request shall be sent to the affected railroad, or railroads, and to the public agency, or agencies, controlling an affected road. Such inclusion or deletion may be granted with or without a hearing or, in the case of requests affecting more than one crossing, partially with and partially without a hearing, by supplemental order herein.

7. The public agency controlling any roadway on which a bus stop exempt sign of the type heretofore in use, under authority of this Commission, has been installed, shall remove the same within six months after the effective date of this order.

8. The decisions listed below, insofar as they refer to the crossings listed, are hereby revoked:

Crossing No.	Jurisdiction	Street and Location	Proceeding Authorizing Installation of "Exempt" Sign	Dec.No. : Appl.No.
A-6.11-C	City & State	Cypress & 18th, Oakland	31726	22494
A-6.54-C	City & State	State #69 - 26th St., Oakland	29349	20866

*75-30.1	City & State	"C" Street, Modesto	26885	19249

*Spur track only.

9. The Secretary shall cause a copy of this order to be served by mail upon each and every railroad, passenger stage corporation, petroleum irregular route carrier, petroleum contract carrier and highway common carrier having authority to transport petroleum products in bulk in tank vehicles, subject to the jurisdiction of this Commission.

The effective date of this order shall be twenty days after the date hereof.

Dated at San Francisco, California, this 18th day of August, 1959.

Commissioners

Commissioner Matthew J. Dooley, being necessarily absent, did not participate in the disposition of this proceeding.

DESCRIPTION AND MANNER OF INSTALLATION OF SIGNS TO BE
 ERECTED AT SPUR AND INDUSTRIAL TRACK CROSSINGS WHERE
 NO STOP NEED BE MADE BY CERTAIN VEHICLES AS SET FORTH
 IN SECTION 576 AND 576.5 OF THE VEHICLE CODE.

DESCRIPTION OF SIGN

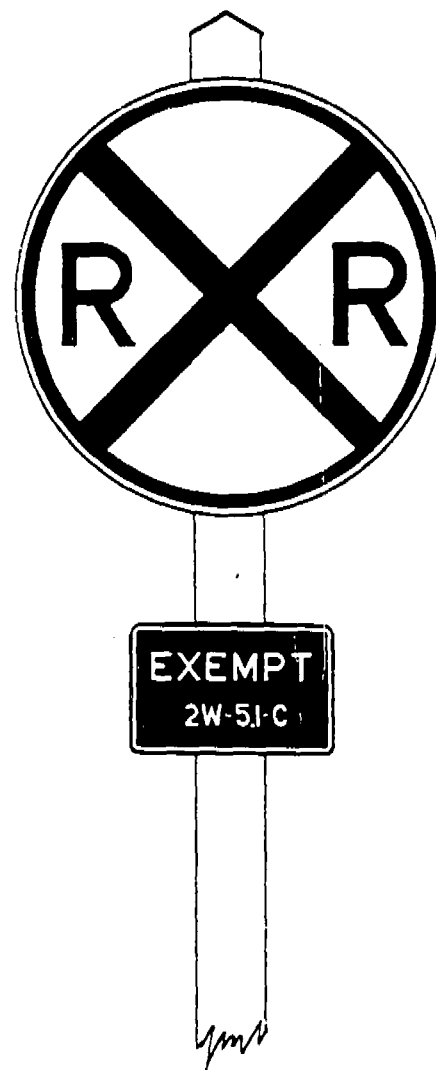

A METAL PLATE, OF 18 GAUGE STEEL OR HEAVIER, HAVING A
 BLACK FIELD WITH YELLOW BORDER AND YELLOW LETTERS AND NUMERALS
 HAVING APPROXIMATELY THE FOLLOWING DIMENSIONS:

WIDTH OF PLATE.....9 INCHES
 LENGTH OF PLATE.....15 INCHES
 WIDTH OF BORDER..... $\frac{1}{2}$ INCH, SET IN $\frac{1}{2}$ INCH
 FROM OUTSIDE OF PLATE

DISPLAYING THE WORD "EXEMPT" IN ADDITION TO THE CROSSING
 NUMBER ASSIGNED BY THIS COMMISSION TO THE CROSSING WHICH THE
 SIGN GOVERNS, WITH THE LETTERS IN THE WORD "EXEMPT" TWO
 INCHES IN HEIGHT AND LINES OF FIVE-SIXTEENTHS OF AN INCH STROKE,
 AND WITH LETTERS AND NUMERALS OF THE ASSIGNED CROSSING NUMBER ON
 ONE AND ONE-HALF INCHES IN HEIGHT AND LINES OF ONE-QUARTER INCH
 STROKE.

MANNER OF INSTALLATION

1. A MINIMUM OF TWO EXEMPT SIGNS SHOULD BE INSTALLED,
 ONE TO BE PLACED ON EACH APPROACH TO THE CROSSING OVER WHICH
 MOTOR VEHICLES OPERATE (EXCEPT WHERE VEHICULAR TRAFFIC MOVES
 IN ONE DIRECTION ONLY, ONLY ONE SIGN WILL BE REQUIRED), TO BE
 LOCATED IN ADVANCE OF THE TRACK AND ON THE RIGHT SIDE OF ROAD
 OR STREET.
2. FOR NORMAL INSTALLATION, EXEMPT SIGNS SHOULD BE
 ATTACHED TO THE SAME STANDARDS USED FOR RAILROAD WARNING
 APPROACH SIGNS (DESIGNATED AS W-47R BY THE DEPARTMENT OF
 PUBLIC WORKS), IMMEDIATELY BELOW THE LATTER.
3. IF RAILROAD WARNING APPROACH SIGNS ARE NOT AT
 SUITABLE LOCATIONS, EXEMPT SIGNS SHOULD BE INSTALLED ON OTHER
 STANDARDS, AT A HEIGHT BETWEEN FIVE AND SIX FEET ABOVE GROUND,
 SUCH STANDARDS SHOULD BE NOT CLOSER THAN 50 FEET OR MORE THAN
 400 FEET FROM THE NEAREST RAIL OF THE EXEMPT CROSSING.
4. EXEMPT SIGNS SHOULD NOT BE PLACED ON CROSSING
 PROTECTION DEVICES SUCH AS CROSSING SIGNS, WIGWAGS, FLASHING
 LIGHT SIGNALS OR CROSSING GATES.
5. WHEN A RAILROAD PARALLELS A STREET OR ROAD AND AN
 EXEMPT SIGN IS INSTALLED NEAR THE CURB OR SIDE THEREFO, NO
 PART OF THE SIGN SHOULD BE PLACED CLOSER THAN SIX FEET SIX
 INCHES TO THE NEAREST RAIL OF SUCH RAILROAD TRACK.

APPENDIX B

List of industrial or spur track grade crossings at which it is recommended distinctive signs or devices as described in Appendix "A" of this exhibit be displayed indicating that no stop need be made by those vehicles described in Section 576 of the Vehicle Code as amended.
