Application No. 41755

O P I N I O N

By this application, filed on December 12, 1959, The Greyhound Corporation seeks authority to reroute its service in the Vallejo area in order to utilize relocated California Highway 29 between a point near the northern city limits of Vallejo and a point approximately 3½ miles north thereof. This proposal will revise a segment of the applicant's presently authorized Route No. 7.01 between the above-mentioned points over former California Highway 29.

Said highway has been improved and relocated as a four-lane highway between the above points and, it is alleged, the use of the new road will enable the applicant's buses to avoid the traffic congestion, intersections and railroad crossings at grade, and city street speed limitations now evident on the present segment. There will be no changes in the rates, frequency of service, or the number of units of equipment to be operated. With the exception of a railroad siding tariff point, designated as Flosden, to be eliminated, the currently effective tariffs of the applicant will continue to apply.

A public hearing does not appear to be necessary. No protest to this application has been received. After full consideration of the applicant's request, the Commission finds that public convenience and necessity require that the application be granted.
