BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Application of TANNER MOTOR TOURS, LTD., for an in-lieu certificate of public convenience and necessity to conduct race track and miscellaneous services (other than sightseeing) as a passenger stage corporation.

Application No. 42447

Gordon, Knapp, Gill & Hibbert by Karl K. Roos,
for applicant.

Musick, Peeler & Garrett by Charles H. Tillinghast
for Los Angeles Metropolitan Transit Authority,
interested party.

Howard Meyerson, appearing for Charter Bus Transportation System, protestant.

J. R. Britton for Airport Service, Inc., protestant.

W. F. Hibbard, for the Commission staff.

OPINION

Tamer Motor Tours, Ltd. is a passenger stage corporation operating under authority of various certificates of public convenience and necessity issued by this Commission. It holds authority to transport persons to and from various Southern California race tracks, special events, airline terminals, steamship docks and other miscellaneous points. Tamer seeks, by this application, a certificate of public convenience and necessity redefining and consolidating its present operating rights except those pertaining to its sight-seeing service.

A duly noticed public hearing was held in this matter before Examiner Donald B. Jarvis at Los Angeles on September 30, 1960. The matter was submitted subject to the late filing of an exhibit which has been received and the matter is now ready for decision.

Tammer's operating revenues for the first seven months of 1960 totaled \$1,457,185. Its total capital and retained earnings

as of July 31, 1960 amounted to \$491,693. The Commission finds that Tanner has the experience and financial ability to continue its present operations as well as conduct operations under any additional operating rights which may be herein authorized.

Some of Tanner's present certificates authorize it to pick up and discharge passengers at specified points while other certificates provide for the pickup and discharge of passengers within the bounds of authorized territorial areas. Sometimes Tanner is authorized a territorial area for one type of service and specific points within the territorial area for another type of service. One of the things which Tanner seeks by this application is the establishment of uniform service territories to apply to each type of service authorized. Tanner also seeks authorization to delete from its operating rights certain route requirements and to be permitted to take any appropriate route between authorized termini.

Witnesses on behalf of Tanner testified that the company and its predecessors had been in business for 54 years; that the various certificates of public convenience and necessity acquired during this period contain duplicate and overlapping rights which cause Tanner confusion in conducting its operations; that the construction of new freeways and designation of one-way streets in the Los Angeles area have created different operating conditions than those which existed when the aforesaid certificates were issued; and that the public and Tanner would benefit if the rights here under consideration were consolidated in a new in-lieu certificate of public convenience and necessity.

No protestant offered any evidence in the proceeding. Protestant, Charter Bus Transportation System opposed that portion of the application in which Tancer proposed to utilize a North Hollywood territorial description, rather than specific points in North Hollywood, as a terminus area for rendering service to Santa Anita and Hollywood Park. Charter objected upon the ground that the proposed territorial area included portions of its operating area for the same racetrack service. Tanner requested leave to amend the application to change the territorial description to eliminate any conflict in operating authority with Charter, and permission to do so was granted. In view of the amendment, Charter withdrew its protest to the application.

A witness for the Commission staff analyzed the application and indicated the extent to which Tanner's operating rights would be enlarged if the application were granted.

The Commission has carefully examined the proposed operating territories to ascertain whether they are substantially similar to Tanner's present operating rights and to be sure that Tanner has not attempted to preempt any area for which no need for service has been established and which it presently does not intend to serve. The Commission is of the opinion that Tanner should be allowed to establish the operating territories as hereinafter set forth. The Commission is further of the opinion that, in view of the constantly changing traffic pattern in the Los Angeles area, Tanner should be authorized to operate between termini wherever possible over the most convenient and expeditious route.

Tammer also requests authority to serve San Ysidro (Agua Caliente Race Track) from the Beverly Hills, Hollywood, Long Beach, Los Angeles, Pasadena, and Santa Monica territories.

The record discloses that Tanner has been operating this service for some time. Tanner holds from the Interstate Commerce Commission, certificate of public convenience and necessity.

No. MC 37625 which, among other things, authorizes it to conduct operations "from San Diego, California to ports of entry in California on the boundary of the United States and Mexico." The certificate also

authorizes Tanner to operate "from points and places in los Angeles commercial zone, as defined in Los Angeles, California, Commercial Zone, 3 M.C.C. 248 to points and places in Arizona, California and Nevada, and return." Tanner contends that these combined authorities authorize it to operate from the Los Angeles area to the Agua Caliente race track which is located in the Republic of Mexico. We do not pass upon this point and assume it to be correct for the purposes of this opinion. It appears, however, that Tapper in the actual conduct of its operations does not operate its equipment beyond the Mexican border. Tanner's traffic manager testified that the company believed that its actual operations were being properly conducted under its I.C.C. operating rights until recent decisions of this Commission indicated that similar operations conducted entirely within the State of California required a certificate of public convenience and necessity issued by this Commission. In view of these decisions, Tanner desires to submit to the jurisdiction of this Commission and has requested a certificate for the operations in question.

It appears that Tabher has conducted its Agua Caliente operation in good faith under the assumption that it was covered by its I.C.C. operating authority. No one has protested the granting of this authority. In the circumstances, the Commission is of the opinion that the requested Agua Caliente rights should be granted.

Tapper also seeks to have cancelled three certificates of public convenience and necessity which it asserts are obsolete.

Two of these certificates were granted during World War II and authorized Tanner to serve various military facilities. The other certificate authorized Tanner to provide limousine service to the Pan American China Clipper at Cabrillo Beach. No service has been conducted under these certificates for many years and it appears that there is no need to continue these operating rights.

A. 42447 GH* The Commission finds that public convenience and necessity require the granting of the application to the extent hereafter set forth. ORDER An application having been filed, a public hearing having been held and based upon the evidence therein adduced, IT IS ORDERED that: 1. A certificate of public convenience and necessity is granted to Tanner Motor Tours, Ltd., a corporation, authorizing it to operate as a passenger stage corporation as defined in Section 226 of the Public Utilities Code between the points as more particularly set forth in Appendix A attached hereto and made a part hereof. In providing service pursuant to the certificate hereingranted, applicant shall comply with and observe the following service regulations: (a) Within thirty days after the effective date hereof, applicant shall file a written acceptance of the certificate herein granted. By accepting the certificate of public con-venience and necessity herein granted, appli-cant is placed on notice that it will be required, among other things, to file annual reports of its operations and to comply with and observe the safety rules and other regulations of the Commission's General Order No. 98 and insurance requirements of the Commission's General Order No. 101-A. to file such reports, in such form and at such time as the Commission may direct, or to comply with and observe the provisions of General Orders Nos. 98 and 101-A, may result in a cancellation of the operating authority granted by this decision. Within one hundred twenty days after the effective date hereof, and on not less than ten days' notice to the Commission and the public, applicant shall establish the service herein authorized and file in triplicate and concurrently make effective, tariffs and timetables satisfactory to the Commission. 3. The certificate of public convenience and necessity granted in paragraph 1 of this order supersedes the certificates of public convenience and necessity granted by Decisions set forth

in Appendix B attached hereto and made a part hereof, which certificates are hereby canceled and revoked, said revocation to become effective concurrently with the effective date of the tariff filings required by paragraph 2(b) hereof.

The effective date of this order shall be twenty days after the date hereof.
