ORDER REVOKING DECISION NO. 63041

By Decision No. 63041 dated January 9, 1962, in this proceeding, applicant's certificate of public convenience and necessity authorizing operations as a highway common carrier was amended to exclude the transportation of commodities requiring temperature control service and subject to the application of temperature control charges. This amendment was made pursuant to a letter from the carrier dated July 7, 1961, stating that it had no objection to the revision of its certificate to make the commodity exclusion consistent with the application of the temperature control charges.

By letter dated January 26, 1962, the carrier has informed the Commission that upon further study it has concluded that the amendment made by Decision No. 63041 would be a disadvantageous restriction and that it wishes restoration of its rights as originally granted. Charges for temperature control service have been published in tariffs to which the carrier is a party.
