Decision No. 65560

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application of BRENTWOOD PARK WATER CO., a California corporation, to construct and operate extensions of its water system in Tuolumne County, and to establish rates.)

Application No. 44623 (Filed July 11, 1962)

ORDER MODIFYING DECISION NO. 64932

Decision No. 64932, dated February 13, 1963, provides, in part, as follows:

"6. Applicant is authorized to deviate from the Commission's General Order No. 103 insofar as the proposed length of non-circulating 2-inch main to serve the Reinitz<sup>1/</sup> and Borba residences is concerned. No additional customers shall be connected to this main without further authorization of this Commission."

By letter dated April 2, 1963, applicant seeks authority to serve from said main the premises of an additional resident named Peterson. Applicant's engineer has calculated that, assuming full development of the service area, a pressure of 27 p.s.i. would be available at the Peterson residence during a period of maximum demand. This pressure meets the requirements of General Order No. 103.

The Commission finds that applicant's request is reasonable and should be granted.

1/ Incorrectly shown as Rcintz in Decision No. 64932.

IT IS ORDERED that ordering paragraph 6 of Decision No. 64932 is amended to read as follows:

6. Applicant is authorized to deviate from the Commission's General Order No. 103 insofar as the proposed length of non-circulating 2-inch main to serve the Reinitz, Borba and Peterson residences is concerned. No additional customers shall be connected to this main without further authorization of this Commission.

Except as hereinabove modified, Decision No. 64932 shall remain in full force and effect.

The order herein shall become effective on the date hereof.

Dated at San Francisco, California, this 18<sup>th</sup> day of JUNE, 1963.

George G. Traver  
President
