68036 Decision No.

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the matter of the investigation into the rates, rules and regulations, charges, allowances and practices of all common carriers, highway carriers,) and city carriers relating to the transportation of) any and all commodities between and within all ) Case No.5432 )Petition for Modpoints and places in the State of California (in-)ification No. 355 )(Filed August 17, cluding but not limited to, transportation for which rates are provided in Minimum Rate Tariff 1964) No. 2).

In the Matter of the Investigation for the purpose of considering and determining revisions in or reissues of Exception Ratings Tariff No. 1.

Case No. 7858

355

#### OPINION AND ORDER

By this petition the American Partition Company (a division of Standard Brands Incorporated) seeks the establishment of a truckload exception rating of Class "A", minimum weight 30,000 pounds for movements subject to the provisions of Minimum Rate Tariff No. 2 of:

"Partitions, NOI fibreboard, paper or wood pulp, not corrugated, flat, KD flat, folded flat or nested solid, in packages."

Under the governing provisions of Minimum Rate Tariff No. 2, the class ratings and minimum weights on Fibreboard Partitions, corrugated and not corrugated are set forth in Items Nos. 54800 and 54830, respectively, of the National Motor Freight Classification A-7 (Cal.).<sup>1</sup> Item No. 54800 provides a truckload rating of fifth class, minimum weight 24,000 pounds, on corrugated partitions, regardless of the form of shipment and Item No. 54830 of the Classification also provides a truckload rating of fifth class on partitions, not corrugated, subject to a minimum weight of 36,000 pounds, regardless of the form of shipment.

1 Hereinafter referred to as the Classification.

GH

C. 5432 Pet. 355, C.7858 GH

Petitioner states that the commodity, for which it seeks the establishment of an exception rating, is manufactured at its plant located at Merced, California. It alleges that the density of this product, as shipped, is considerably higher than corrugated fibreboard partitions, for which like ratings are named in Item No. 54800 of the Classification, and should, therefore, normally entitle the product in question to a more favorable rating. The petitioner alleges that it conducted a study for a ten-month period in 1963 which revealed that its shipments of Fibreboard Partitions, not corrugated, in the volume category, ranged from 10,000 pounds to over 30,000 pounds. Petitioner states that the shipments in lots of 10,000 pounds and 30,000 pounds reflect its customers' trade patterns which are apparently recognized on a nationwide basis since class ratings are provided for shipments in lots of 15,000, 24,000, and 36,000 pounds, respectively. In Exhibit "A", attached to the subject petition, a comparison is made of several interstate and intrastate common carrier tariffs which contain commodity rates or class ratings on Fibreboard Partitions, not corrugated, as well as other related paper products, equal to or lower in volume or effect, when transported in lots of 30,000 pounds or less, than currently applicable to the intrastate highway carrier traffic involved herein.<sup>3</sup>

While petitioner alleges that shipments within California are being penalized by higher less-truckload class ratings, no

<sup>2</sup> Petitioner alleges a load factor of approximately 1500 pounds per linear foot of trailer length, densities of 25 pounds per cubic foot and greater, and an almost non-existent claim ratio.

<sup>3</sup> Petitioner draws particular attention to the fifth class, minimum weight 24,000 pounds, and the fifth class, minimum weight 30,000 pounds exception ratings on certain related paper products set forth in Items Nos. 500 and 780 of the Commission's Exception Ratings Tariff No. 1.

C. 5432 Pet. 355, C. 7858 GH

adjustment in such ratings is being sought at this time. What petitioner allegedly requires, in order to meet its customers' trade policies, is an intermediate 30,000-pound truckload rating to alternate with the present fifth class 36,000-pound rating. In order to insure the establishment of an intermediate truckload minimum weight of 30,000 pounds, which will have little or no effect upon carrier revenues, petitioner requests that such intermediate truckload minimum weight be made subject to the Class "A" rather than the current fifth class truckload rating.

Petitioner states that its major movements are to Los Angeles and San Francisco at which points are also located petitioner's main competitors. Finally, petitioner avers that while it does not expect to alter the geographical advantage of its competitors, it feels it may reasonably request the opportunity to ship in lots of 30,000 pounds without having to pay for deficit weight.

Assertedly the proposed exception rating is desired by both shippers and carriers. The proposal will have but minor effect upon the resulting carrier freight charges. Ex parte action is requested.

Copies of the verified petition were mailed to various carriers, shippers, and associations known by petitioner to be interested, The California Trucking Association and Fibreboard Paper Products Corporation have informed the Commission by letter that they have no objection to the handling of the matter on an ex parte basis. In addition, Fibreboard specifically supports petitioner's proposal.

In the circumstances, it appears, and the Commission finds, that petitioner's proposal is reasonable and justified, and that the resulting minimum rates and charges will be just, reasonable and nondiscriminatory minimum rates and charges for the transportation of the commodity herein involved. A public hearing is not necessary. The petition will be granted.

-3-

C. 5432 Pet. 355, C. 7858 GH

### IT IS ORDERED that:

1. Exception Ratings Tariff No. 1 (Appendix A to Decision No. 66195, as amended) is hereby further amended by incorporating therein, to become effective November 21, 1964, Fourth Revised Page 3 and First Revised Page 24, which pages are attached hereto and by this reference made a part hereof.

2. Tariff publications required to be made by common carriers as a result of the order herein may be made effective not earlier than the tenth day after the effective date of this order on not less than ten days' notice to the Commission and to the public and such tariff publications shall be made effective not later than November 21, 1964; and the tariff publications which are authorized but not required to be made by common carriers as a result of the order herein may be made effective not earlier than the tenth day after the effective date of this order, and may be made effective on not less than ten days' notice to the Commission and to the public if filed not later than sixty days after the effective date of the minimum rate tariff pages incorporated in this order.

3. Common carriers, in establishing and maintaining the rates authorized hereinabove, are hereby authorized to depart from the provisions of Section 460 of the Public Utilities Code to the extent necessary to adjust long- and short-haul departures now maintained under outstanding authorizations; such outstanding authorizations are hereby modified only to the extent necessary to comply with this order; and schedules containing the rates published under this authority shall make reference to the prior orders authorizing long- and short-haul departures and to this order.

-4-

C. 5432 Pet. 355, C. 7858 GH

4. In all other respects said Decision No. 66195, as amended, shall remain in full force and effect.

The effective date of this order shall be twenty days after the date hereof.

Dated at	San Francisco	, California, this
13 The day of	(toba), 1964.
