 C. ZAVALA for authority to depart from )  
 minimum rates, rules and regulations )  
 applicable in connection with certain )  
 transportation to be performed for )  
 BASALT ROCK COMPANY, INC. )

Application No. 48533  
(Filed June 6, 1966)

OPINION AND ORDER

Each of the eighteen applicants herein holds either a radial highway common carrier or a highway contract carrier permit.<sup>1</sup> By Decision No. 69413 dated July 13, 1965, in Application No. 47627, each applicant was authorized to transport truckload shipments of building blocks from Basalt's plant at Napa or French Camp at rates less than the established minimum rates.<sup>2</sup> The current authority is scheduled to expire with July 31, 1966. By this application, applicants seek an extension of their current authorities for a further one-year period and request that the authorities be modified for clarification purposes.

---

<sup>1</sup> Minor discrepancies exist between certain applicants' names as they appear in the application and as they appear in the Commission's official records. Each applicant will be referred to by the name shown in the Commission's official records.

<sup>2</sup> The decision also authorized Robert Morgan and Bill Rackley to assess less-than-minimum rates for the transportation involved. These parties are not involved in the instant proceeding.

According to applicants, the evidence introduced to support the original rate authorities herein involved was predicated upon cost and revenue figures which encompassed power loading of equipment by the shipper with the shipper's equipment and power unloading of equipment with fork lift equipment furnished by the carrier.<sup>3</sup> Applicants state that the intent and limitation upon the rates as expressed in the original decision should be carried as a limitation in the rate schedule to clarify the application of the authorized rates.

Applicants aver that they are engaged solely in serving Basalt and that the transportation circumstances recited in the decision which justified the granting of the original rate authorities, continue to exist and require that the sought authorities be granted. As indicated in that decision, favorable transportation conditions include the loading of palletized building blocks by the shipper and the waiving of any claim by the shipper for loss or damage as the result of normal handling by the carriers involved.

Revenue and expense data submitted by each applicant indicate that the transportation involved has been profitable and reasonably may be expected to be profitable in the future.

The certificate of service shows that a copy of the application was mailed to California Trucking Association on June 3, 1966. The application was listed on the Commission's Daily Calendar of June 8, 1966. No objection to the granting of the application has been received.

---

<sup>3</sup> Decision No. 67431 dated June 23, 1964.

In the circumstances, it appears, and the Commission finds, that the proposed rates are reasonable for transportation to be performed by each of the applicants named herein. A public hearing is not necessary. The Commission concludes that the application should be granted.

In view of the impending expiration date of the current authority, the order which follows will be made effective July 31, 1966.

IT IS ORDERED that:

1. Sam Clerici, Tom E. Cramer, Frolly F. Crumpton, Helen B. Ellington, Joe I. Flax, Robert H. Guck, Marie E. Kenyon, Rudolph Maynard, Frank A. Noceti, Arthur H. Savano, Ferd E. Silva and Lloyd M. Tyler are hereby authorized to transport building blocks in truckload shipments for Basalt Rock Company, Inc., from the latter's plant at Napa to points and places in California at rates less than the established minimum rates but not less than those set forth in, and subject to the conditions specified in, Appendix A attached hereto and by this reference made a part hereof.

2. Gilbert J. Bchlen, Gertrude M. Ferrera, Andrew J. Kooker, James O. McCafferty, Edgar Stanful and Ynes C. Zavala are hereby authorized to transport building blocks in truckload shipments for Basalt Rock Company, Inc., from the latter's plant at French Camp to points and places in California at rates less than the established minimum rates but not less than those set forth in, and subject to the conditions specified in, said Appendix A.

3. The authorities granted herein shall, on and after July 31, 1966, supersede the authorities granted by Decision No. 69413 and shall expire with July 31, 1967.

This order shall become effective July 31, 1966.

Dated at San Francisco, California, this 19<sup>th</sup> day of July, 1966.

Schedule of Minimum Rates for  
the Transportation of Building Blocks  
for Basalt Rock Company, Inc.

Section 1

Item 10 Application of Rates - General

To the extent that Minimum Rate Tariff No. 2 prescribes minimum rates for the transportation of building blocks, said minimum rates, rules and regulations are applicable to all shipments except as specifically provided in Section 2.

Section 2

Item 20 Application of Rates - Commodity

Rates in this section apply to the transportation of building blocks as described in Item 32040 of National Motor Freight Classification A-8 when power loaded by shipper at origin with the shipper's equipment and power unloaded by carrier at destination with a forklift which carrier may furnish.

Item 30 Application of Rates - Territory

Rates in this section apply only between the plants of Basalt Rock Company at Napa and at French Camp, on the one hand, and points and places in California, on the other hand.

Item 40 Surcharges

Rates in this section are subject to the provisions set forth in Supplement No. 63, or any reissue thereof, to Minimum Rate Tariff No. 2.

Item 50 Rates in Cents Per 100 Pounds  
Minimum Weight 40,000 Pounds
