Application No. 49314
(Filed April 26, 1967)

OPINION AND ORDER

Applicant holds highway contract carrier and city carrier permits. By Decision No. 71004 dated July 19, 1966, in Application No. 48424, Keeney Truck Lines, Inc., was authorized to assess monthly vehicle unit rates and charges which are less than the minimum rates and charges otherwise applicable for the transportation of all commodities between specified points in southern California for General Mills, Inc. The current authority is scheduled to expire with July 31, 1967.

By this application, applicant seeks authority to continue to charge less than the established minimum rates and to increase the monthly vehicle unit rate for a tractor semi-trailer combination from \$1,510 to \$1,555 per month.¹

Since 1938, applicant and its predecessors have been authorized to perform the transportation services involved herein

¹ No authority for the increase is required inasmuch as applicant performs this transportation as a permit carrier for which only minimum rates have been established.

at vehicle unit rates which are less than those otherwise applicable as minimum. The authorization has been extended annually since then, with periodic increases and revisions in the rates and charges as necessary.

The application shows that the increased monthly vehicle unit rate proposed herein has been assessed since September 1, 1966. Applicant declares that this rate authorization differs from the established minimum rates with respect to the actual amount of charges assessed, the scope of the operations involved and the billing procedures utilized. Applicant alleges that the transportation services involved are profitable and that the rate authority has been beneficial to shipper and carrier alike.

Revenue and expense data submitted by applicant indicate that the transportation involved has been profitable and reasonably may be expected to be profitable during the ensuing year.

The certificate of service shows that a copy of the verified application was mailed to California Trucking Association on April 25, 1967. The application was listed on the Commission's Daily Calendar of April 27, 1967. No objection to the granting of the application has been received.

In the circumstances, it appears, and the Commission finds, that the proposed rates and charges are reasonable and consistent with the public interest. A public hearing is not necessary. The Commission concludes that the application should be granted. Since the conditions surrounding the transportation involved may change, the authority granted herein will be made to expire at the end of one year.

IT IS ORDERED that:

1. Keeney Truck Lines, Inc., is hereby authorized to depart from the provisions of the minimum rate orders otherwise applicable to the services which it performs for General Mills, Inc., to the extent specifically provided in Appendix A attached hereto and by this reference made a part hereof, and to assess rates and charges less than the minimum rates and charges otherwise applicable for such services but not less than those specified, and subject to the conditions shown, in said Appendix A.

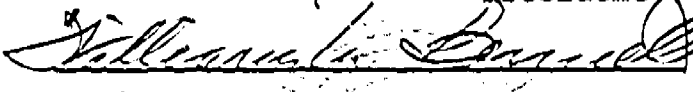

2. The authority granted herein shall, on and after July 31, 1967, supersede the authority granted by Decision No. 71004 and shall expire with July 31, 1968.

This order shall become effective twenty days after the date hereof.

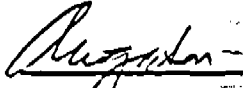

Dated at San Francisco, California, this 6th day of June, 1967.
