for Consolidated Rock Products Company,
interested parties.
R. J. Carberry and John R. Laurie, for the
Commission staff.

O P I N I O N

Minimum Rate Tariff 17 (MRT 17) names zone and area-to-point rates and charges for the transportation of property in dump truck equipment from defined production areas to designated delivery zones and points in Southern California.^{1/} In this proceeding the California Trucking Association seeks various wage offset increases in the established minimum zone rates set forth in MRT 17 governing the dump truck transportation of (1) rock,

^{1/} Southern California production areas and delivery zones are described in the Commission's Southern California Production Area and Delivery Zone Directory 1.

sand and gravel; (2) slag; (3) asphaltic concrete; and (4) decomposed granite. Petitioner also recommends that the established rate factor for expanding the underlying cost data supporting the MRT 17 zone rates be revised.

Public hearing was held before Examiner Gagnon at Los Angeles on September 4 and 5, 1968. The matter was submitted on the latter date. No one appeared in opposition to the sought relief;

The last general wage offset adjustment in MRT 17 zone rates became effective June 8, 1968, pursuant to Decision No. 74306 of April 30, 1968. The present zone rates reflect labor and allied payroll costs in effect as of January 1, 1968. Since the zone rates for asphaltic concrete and decomposed granite were last generally adjusted a new labor contract was negotiated which resulted in an immediate increase in labor costs, with further increases in such costs becoming effective as of July 1, 1968, and in allied payroll costs as of August 1, 1968. In connection with the dump truck transportation of rock, sand, gravel and slag, there have been additional contractual increases in labor and allied costs effective September 1, 1968. Therefore, as of the latter date the CTA contends that the underlying cost data in support of the MRT 17 zone rates has been significantly increased, thereby making such rates unreasonably low and insufficient.

The CTA requests that the Commission direct its staff to modify the cost data file for the cost formulae phase of the MRT 17 zone rate computer program so as to include the increases in labor and allied payroll costs which have occurred since the zone rates were last generally adjusted. Petitioner then requests that the zone rates named in MRT 17 be republished in order to give effect to the modified cost data.

5
12/27

The Commission staff and the California Trucking Association introduced evidence showing the various increases in the wage and allied payroll costs experienced by dump truck haulers as of September 1, 1968. The staff and CTA witnesses explained that they took the existing incremental cost data underlying the present MRT 17 zone rates and substituted therein the September 1, 1968 labor and allied payroll cost factors for the previous accepted cost data. No modifications are proposed relative to the established traverse network. The record reveals that the staff and CTA proposed adjustments in the cost data file for the MRT 17 computer program are substantially the same. Adoption of the staff's proposal would give full effect to the increased wage and allied payroll costs involved.^{2/} Listed below are the dump truck cost formulae as up-dated by the staff to reflect current total incremental costs, excluding provisions for income taxes:

Staff Proposed MRT 17 Cost Formulae
as of September 1, 1968

Rock, Sand and Gravel:

$$\text{Cost per ton} = (\text{one-way miles} \times \$0.0135) + (\text{round-trip minutes} \times \$0.00535) + \$0.176$$

Slag: Cost per ton = ($\text{one-way miles} \times \0.0137) + ($\text{round-trip minutes} \times \0.00551) + \$0.200

Asphaltic Concrete:

$$\text{Cost per ton} = (\text{one-way miles} \times \$0.0234) + (96\% \text{ round-trip minutes} \times \$0.01064) + \$0.365$$

Decomposed Granite:

From All Production Areas Except Production Area 19-L

$$\text{Cost per ton} = (\text{one-way miles} \times \$0.0234) + (\text{round-trip minutes} \times \$0.01064) + \$0.178$$

From Production Area 19-L

$$\text{Cost per ton} = (\text{one-way miles} \times \$0.0139) + (\text{round-trip minutes} \times \$0.00660) + \$0.214$$

When any one of the cost formulas noted above is applied in conjunction with the traverse network time and distance prime

^{2/} With respect to indirect costs this is not consistent with the treatment of such costs as outlined for future wage offset proceedings in the Commission's advice letter to interested parties dated October 31, 1968. However, in the case at hand the effect of this treatment is not significant.

variable factors, also stored in the data file for the MRT 17 computer program, the resultant sum constitutes the total cost per ton per trip. This amount is then expanded, under the rate formula phase of the MRT 17 computer program, by a predetermined percentage ratio of costs to rates which is intended to provide dump truck haulers an equality of competitive opportunity to realize a reasonable margin of profit after payment of their income taxes.

In Decision No. 68543 (64 Cal.P.U.C. 30) the staff proposed the adoption of zone rates which would establish a ratio of approximately 91 percent in the relationship of costs to rates. In adopting the staff's rate proposal, official notice was taken of the Federal Government's Revenue Act of 1964, wherein provisions were established for reductions in federal corporate and personal income taxes and revised rules governing investment credit. Since the 91 percent cost-rate relationship initially recommended by the staff was determined in consideration of the higher 1963 income tax rates, the Commission made a 1.5 percent tax offset in the staff's originally proposed so-called profit margin of 9 percent. Such action produced a relationship of costs to rates of 92.50 percent, in lieu of the 91 percent ratio initially suggested by the staff. In order to reflect the cost-rate relationship of 92.50 percent in the zone rate structure, Decision No. 68543 directed that the total cost per ton resulting from the application of the cost formulae phase of the MRT 17 computer program be made subject to a cost expansion rate factor of 92.38 percent.

In Decision No. 73942 of April 2, 1968, in Case No. 5437, the Commission stated, in part, as follows:

"The Commission also affirms the directive of the examiner to the staff concerning the preparation of an exhibit setting forth the calculations underlying...the cost expansion factor of 92.38 percent adopted in Finding 7c of Decision No. 68543...."

In response to Decision No. 73942 the staff, on April 12, 1968, distributed a report to interested parties entitled "Development of Cost Expansion Factor of 92.38%." Subsequently, this report was revised and mailed to the parties on August 16, 1968. The revised report was received in evidence in this proceeding as Exhibit No. 2. Said exhibit contains a self-explanatory mathematical explanation of the 92.38 percent cost expansion rate factor adopted in Decision No. 68543.

A staff rate expert presented testimony wherein he recommended the adoption of a zone rate structure reflecting a differential of about 8 percent over costs. To achieve this end he proposed a percentage ratio of costs to rates of about 92 percent which would require the cost formulae phase of the MRT 17 computer program to be made subject to a cost expansion rate factor of 91.9 percent. The cost-rate relationship proposed by the staff would produce a slightly higher level of zone rates than presently obtains under the 7.50 percent rate differential over costs authorized pursuant to Decision No. 68543.

The CTA requests that MRT 17 zone rates be established about 9 percent higher than the related zone costs which, in turn, would reflect a cost-rate relationship of 91 percent as originally proposed by the staff and subsequently adopted by the Commission, subject to a 1.5 percent income tax offset. In order to give effect to the cost-rate ratio of 91 percent, the CTA requests that the total cost per ton resulting from the application of the zone cost

formulae of the MRT 17 computer program be made subject to a cost expansion rate factor of 90.85 percent.

The cost expansion factors of 91.9 percent and 90.85 percent recommended by the staff and petitioner, respectively, are substantially the same. Testimony submitted in justification of the respective rate factors was also quite similar. The staff and CTA witnesses both explained that since the 1964 reductions in federal corporate and personal income taxes and revised rules governing investment credit, as reflected in the 1.5 percent reduction in the cost-rate differential authorized in Decision No. 68543, dump truck for-hire carriers have experienced substantive increases in financial costs of operations. Since 1964 the federal and state income tax rates have been increased. Interest rates to finance required capital investment in dump truck equipment have increased substantially, especially as reflected in the short-term equipment obligations of independent dump truck owner-operators who constitute a majority of the for-hire carriers involved. The turnover in the number of dump truck permitted authorities which have been in effect for more than one year has increased significantly. Petitioner contends that this increase in the turnover of permits for dump truck operations is largely due to the rise in income taxes, higher interest charges and unattractive profit margins. Both the staff rate expert and the CTA's representative are in general agreement that the potential earning power of the minimum zone rates in question should be improved in view of the overall financial circumstances confronting the for-hire dump truck carriers.

Adoption of the CTA's proposal that zone rates be established reflecting a relationship of costs to rates of 91 percent would do no more than afford the dump truck haulers an opportunity

to earn revenues previously precluded under the 1.5 percent tax revenue decrease which this record reveals has since been negated by subsequent increases in income taxes and other related financial expenses. Since we have heretofore found that the 91 percent ratio of costs to rates is not unreasonable as a basis from which to eliminate an income tax savings from the dump truck carriers' potential operating revenues, it is deemed appropriate to restore said ratio when, as on this record, it has been demonstrated that the aforesaid tax savings has been for all practical purposes eliminated.

The staff rate witness also recommended that any increase that may be authorized in the established zone rates for rock, sand and gravel, and asphaltic concrete from Orange County production areas to San Diego County delivery zones be reflected in said rates in accordance with the method adopted in Decision No. 70759 of May 24, 1966. The staff rate witness explained that adoption of the staff's proposed wage offset rate increase would require that the differential increase of 5 percent established in Decision No. 70759 be changed to 3.2 percent for rock, sand and gravel, and 6.3 percent for asphaltic concrete. The staff proposal with respect to certain zone rates applicable to points in San Diego County is required in order not to disturb the historical relationship of such rates.

The Commission finds that:

1. The level of wages and allied payroll costs underlying the existing zone rates named in Minimum Rate Tariff 17 has increased, as of September 1, 1968, to the extent demonstrated herein by the Commission's staff and petitioner, respectively.
2. Minimum Rate Tariff 17 does not reflect the September 1, 1968 upward adjustment in wages and allied payroll costs currently

being experienced by the dump truck haulers governed by said minimum rate tariff.

3. The Commission's staff proposed modifications in the cost data file, presently utilized in the established cost formulae underlying the zone rates prescribed in Minimum Rate Tariff 17, have been shown to reflect fairly the increased labor and related payroll costs experienced by the for-hire carriers of property in dump truck equipment governed by the aforesaid minimum rate tariff.

4. The total costs per ton resulting from the application of the cost formulae phase of the computer program for Minimum Rate Tariff 17 should be made subject to a cost expansion rate factor of 90.85 percent, in lieu of the existing rate factor of 92.38 percent, to produce a relationship of costs to rates of about 91 percent.

5. The application of the Minimum Rate Tariff 17 computer program cost formulae, modified as proposed by the staff, in conjunction with established time and distance traverse network prime variable factors will result in increased total zone costs per ton which, if expanded by the rate factor of 90.85 percent referred to in paragraph 4 hereof, will produce computer print-outs of zone rates per ton that give full effect to the increases in labor and allied payroll costs involved herein and at the same time reflect a relationship of total costs to rates of approximately 91 percent.

6. The publication of the increased zone rates referred to in paragraph 5 hercelf in Minimum Rate Tariff 17 will constitute just, reasonable and nondiscriminatory minimum zone rates for the transportation governed thereby.

7. The rates in Minimum Rate Tariff 17 which apply from Orange County production areas to San Diego County delivery zones should be increased as follows:

- (a) Subtract from said rates which apply at present the current rates from corresponding production areas to Orange County delivery zone No. 30118.
- (b) Increase the resulting differences in rates for (1) rock, sand and gravel by 3.2 percent; and (2) for asphaltic concrete by 6.3 percent.
- (c) Increase the rates which are used as subtrahends in subparagraph (a) above to correspond to the rates resulting from the data processing of the Minimum Rate Tariff 17 computer program, adjusted to give effect to the revised cost formulae set forth in Staff Exhibit No. 1 and the cost expansion rate factor of 90.85 percent recommended in petitioner's Exhibit No. 7, which apply from the same production areas to Orange County delivery zone No. 30118.
- (d) Add to the increased rate differentials developed in subparagraph (b) the corresponding rates developed in subparagraph (c). The resulting totals are rates which are and will be just and reasonable minimum rates from the Orange County production areas to the San Diego County delivery zones involved.

We conclude that Petition 166, as amended, should be granted as proposed by the Commission's staff, except that petitioner's proposed cost expansion rate factor of 90.85 percent should be authorized in lieu of the alternative proposal of the staff; and that Minimum Rate Tariff 17 should be amended in accordance with the above findings.

To facilitate publication of authorized tariff changes in Minimum Rate Tariff 17, other tariff changes not directly related to this proceeding will be included with the tariff pages revised by the order herein.

O R D E R

IT IS ORDERED that:

1. Minimum Rate Tariff 17 (Appendix B of Decision No. 69469, as amended) is hereby further amended by incorporating therein, to become effective February 8, 1969, the revised pages attached hereto and listed in Appendix A, also attached hereto, which pages and appendix are made a part hereof.
2. In all other respects said Decision No. 69469, as amended, shall remain in full force and effect.
3. Except as otherwise provided herein, Petition 166, as amended, is denied.

The effective date of this order shall be twenty-four days after the date hereof.

Dated at San Francisco, California, this
27th day of DECEMBER, 1968.

William Flynns, Jr.
President
