lect transportation charges based)
on units of measurement and rates)
different from and in some instances)
lower than the minimum rates hereto-)
fore established by the Commission.)

Application No. 50741
(Filed December 11, 1968)

O P I N I O N

Applicant requests authority, as a highway contract carrier, to transport tomato plants and empty carriers returning for I.K.I. Farms between Mecca and points in central California, at flat rates per crate. The transportation will be performed during the 1969 tomato plant season, which extends over approximately an eight-week period between February 15 and June 30.

Applicant previously has been authorized to deviate from the rates in Minimum Rate Tariff No. 2 for transportation of tomato plants for I.K.I. Farms. The latest such authority covered the 1968 tomato plant season (Decision No. 73663, dated January 30, 1968). By this application, authority is sought to assess and collect rates on the same units of measurement, and at the same level as previously authorized, during the 1969 tomato plant season.

Applicant alleges that the shipper of the traffic embraced in this application desires that applicant be in a position to render the proposed service at the requested rates as soon after February 15, 1969, as possible. Therefore, it requests that the authority be granted without hearing.

The application states that, for accounting and sales reasons, I.K.I. Farms desires to continue to pay transportation charges on a system of flat rates per crate rather than upon a system of varying rates per 100 pounds. The application further states that the proposed rates and charges for the entire season's movement are expected to result in an operating profit to applicant, and will produce substantially more revenues to applicant than otherwise would accrue during this slack season.

The application contains revenue and expense data for operations conducted during the 1968 season, and projected revenue and expense data for the 1969 season. Such data show that 1968 operations resulted in a deficit, which was occasioned primarily by extraordinary non-recurring expenses. The projection for the 1969 season indicates that operations for the forthcoming season will be profitable.

The certificate of service shows that copies of the application were mailed to the shipper and to California Trucking Association on December 11, 1968. The application was listed on the Commission's Daily Calendar of December 12, 1968. No objection to the granting of the application has been received.

In the circumstances, the Commission finds that the proposed rates are reasonable. A public hearing is not necessary. The Commission concludes the application should be granted.

O R D E R

IT IS ORDERED that:

1. Karlson Bros. Trucking Service, a corporation, is authorized to transport tomato plants, in crates, with a declared valuation of \$5.00 per 100 pounds, and empty crates returning, for I.K.I. Farms, at rates different from the minimum rates but not less than those set forth in Appendix A attached hereto and by this reference made a part hereof.

2. The authority herein granted shall expire with July 30, 1969.

The effective date of this order shall be twenty days after the date hereof.

Dated at San Francisco, California, this 21st day of JANUARY, 1969.
