NB

$\underline{O P I N I O N}$

Subsequent to the filing of petitions by the California Trucking Association (CTA), the Commission authorized so-called wage offset increases in the rates and charges contained in several of its Minimum Rate Tariffs (MRT). The specific tariffs involved are MRT 1-B (East Bay Drayage); MRT 2 (Statewide-General Commodities); MRT 5 (Los Angeles Drayage); MRT 9 (San Diego Drayage); MRT 15 (Statewide-Vehicle Unit Rates); and MRT 19 (San Francisco Drayage).¹ At the initial series of hearings in the various cost offset proceedings questions were raised as to what elements of expense, other than direct labor costs specifically changed by labor agreements (including changes responsive to statutory requirements) which are identifiable in the underlying basic cost development, are to be considered inappropriate justification for cost offset minimum rate adjustments. It was decided that such determination should be made the subject of further adjourned hearings.²

1 The wage offset increases in minimum rates were authorized, effective May 10, 1969" by the following Commission decisions:

| MRT's | Decision Number | Date | Case No. | Petition <u>Number</u> |
|--|----------------------------------|------------------------------------|------------------------------|---------------------------|
| 1-B, 2 (pool ship- ments only), and 19 | 75516 75517 75518 | 41-69 41-69 41-69 | 5432, 5441 5432 5441 | 524,154 524 154 |
| 2 (other than pool shipments) 5 9 15 | 75520 75521 75511 75492 | 41-69 41-69 41-69 3-25-69 | 5432 5435 5439 7783 | 523 114 83 17 |

* MRT 1.5 rate increase effective May 1, 1969.

2 Interim decisions were issued in all proceedings pending further adjourned hearings except in Petitions for Modification Nos. 524 and 154, in Cases Nos. 5432 and 5441, respectively (Dec.No.75516, et al.). In the latter instance the matter was reopened for further hearing by Commission order in Decision No. 75550 of April 9, 1969.

Since the issue to be resolved was common to all proceedings involved, the matters were consolidated for hearing on a common record.

Public hearings were held before Examiner Gagnon at San Francisco on April 30 and May 1, 1969. Evidence was presented by the Commission's Transportation Division staff and the CTA. In addition to presenting evidence concerning the expense elements to be reflected in a cost offset proceeding, the trucking association also introduced supplementary evidence in support of its amended request for further sought increases in the minimum rates to offset the asserted impact of recent increases in federal and state taxes. The matter was submitted subject to a late-filed statement of position by the California Manufacturers Association which was received on May 7, 1969.

Cost Offset Rate Adjustments

The minimum rates prescribed for the California intrastate transportation of property by for-hire motor carriers were established in the light of extensive highway carrier performance, cost and rate economic studies. In view of the time and expense required to make such full-scale studies, they are normally developed at intervals of about 10 years. In the interim, certain cost and performance factors of the basic studies are held to be a reasonable reflection of the actual operating experiences of the for-hire carriers involved. A like assumption cannot be made with respect to labor and other allied payroll expenses of record, which constitute a major portion of the total highway carrier transportation costs, because such costs have been changing materially at an annual rate.

During the intervening period, when new full-scale cost and rate studies are not available nor expected to be completed in the near future, it has been the Commission's practice to reflect

-3-

periodic and substantive increases in labor and related payroll expenses in its various minimum rate tariffs by a method commonly referred to as the "cost offset" or datum plane procedure for adjusting rates. Under this procedure the current labor and allied payroll cost factors are substituted for those previously found reasonable and used in support of the established minimum rates. The total estimated costs of operations are then recalculated and from such revised cost calculations the percentage increases over the prior total estimated cost experiences are determined. The resulting percentage increases in total costs are then utilized as the datum plane for increasing the particular minimum rates involved.

Under the cost offset method for adjusting minimum rates the hypothesis must first be accepted that certain underlying performance, cost and rate factors, together with the rationale and expertise utilized in their application, contained in the original cost and rate presentations are representative of the actual conditions found in the current dynamic transportation environment. The factors held to remain relatively constant in offset proceedings include the following major elements:

- 1. Fixed Investment and Depreciation;
- Vehicle Use Factors; Performance and Weighting Factors; 3.
- 4. Ratio of Constructive to Actual Miles; Ratio of Indirect to Direct Costs;
- 5.
- Relationship of Rates to Cost Estimates; 6.
- Rate Relationships; Traffic Flow.
- 8.

Consideration of changes in direct cost items, such as maintenance and repairs, tire costs, and fuel and oil costs may also be deferred until basic full-scale studies are developed.

In view of the overall lack of particularity and definitiveness involved in a cost offset rate adjustment, it is evident that such method for up-dating minimum rates was never designed nor intended to replace or be accepted as a completely satisfactory

-4-

(AA)

alternative for thorough full-scale studies. It should also be clear that any cost offset method of rate making, premised upon the theory that a percentage increase (decrease) in rates should be the same as experienced in the supporting costs, assumes an economic margin for error which, the facts of record permitting, may be reasonable to accept for relatively short periods of time.

When the original cost and rate studies have been up-dated over the years by successive offset adjustments, the resulting cost and rate information tends to become vulnerable to an attack upon its continued competency to represent actual for-hire carrier operating experience. At this time, full-scale cost and rate presentations are imperative to a thorough evaluation of the reasonableness of existing minimum rates. While it may be argued that the cost offset adjustments in minimum rates have been consistently found to be a just, reasonable and expeditious method for enabling the carriers to recover significant increases in their wage and allied payroll costs, the obvious limitations of this offset procedure should not be overlooked.

Suggested Guidelines (Direct Wage Offset)

The cost factors contained in full-scale cost studies are generally accumulated into the following three major categories:

F.

1. Direct Costs cover those items of expense which are treated directly in the cost development, excluding certain factors which are handled as a gross revenue expense. In order for a cost increment to be considered as a direct cost, it should be readily measurable in relation to the particular transportation and be of some significance in the overall cost of providing the service under consideration. The direct costs are set forth in the cost study as Labor Costs, Vehicle Fixed and Depreciation Costs, Vehicle Running Costs, and at times Billing and Collecting Costs.

-5-

- 2. Indirect Expenses include all elements of expense in a cost presentation which are neither treated directly nor developed as a percentage of gross revenue. In the original full-scale cost presentation indirect expenses are treated cumulatively as ratios or percentages of the total direct costs or of the total of direct and indirect costs. Indirect expenses include the wages and salaries of nonoperating personnel and general administrative expenses (legal, auditing, communications, rents, certain depreciation expense items, property taxes and certain insurance expense items).
- 3. <u>Gross Revenue Expenses include Board of Equaliza-</u> tion taxes and Cal. P.U.C. Transportation Rate Fund fees. Vehicle and cargo insurance costs have also been developed as a percentage of gross revenue in most of the cost studies underlying the rates involved in this matter.

The changes which occur in direct costs are readily measurable and present no real problem when developing a revised estimate of total direct costs for subsequent use as part of a percentage datum plane cost offset rate adjustment. The real difficulty in a cost offset adjustment in rates is how to reflect changes in cost factors that have been treated cumulatively as indirect expense ratios or percentages of gross revenue in the original fullscale cost presentation. In the past, changes in indirect expenses have been reflected in cost offset proceedings by the following methods:

- 1. <u>Wage (Cost) Offset:</u> Indirect expense ratios established in the original full-scale cost study are applied to the up-dated direct costs determined for the wage offset adjustment. This method assumes that indirect expense items have, or will, increase proportionately with direct costs.
- 2. <u>Wage Offset</u>: The percentage increase in direct labor is multiplied by the percentage of salaries and wages included in the indirect expenses of the original full-scale cost study and the resulting factor is applied to the dollar amount of indirect expenses included in the original cost presentation. This method assumes that only those expenses included in the indirect expense ratios related to salaries and wages will increase proportionately with the increases in direct labor costs.

-6-

3. <u>Direct Wage Offset</u>: Indirect expenses are held constant and no allowance for changes in indirects is made in the cost offset adjustment in rates.

Gross revenue expenses are expressed as a percentage of total revenue. The percentage factors are generally utilized in cost offset proceedings in conjunction with the adjusted total direct and indirect expenses.

California Trucking Association and the Commission's Transportation Division staff initially utilized the first cost offset method noted above. The staff, however, adopted the second procedure in 1963; whereas CTA has continued to employ the first method in its cost offset presentations. In an effort to ameliorate the contrasting positions, so vigorously advanced by the CTA and the staff, the Commission, on October 31, 1968, addressed an advisory letter "To Interested Parties" which suggested an expansion of the third method referred to above for future cost offset adjustments in minimum rates. Pertinent portions of the letter are set forth below:³

"TO INTERESTED PARTIES:

"WAGE OFFSET RATE PROCEEDINGS

"In wage offset proceedings, only labor costs specifically changed by labor agreements (including changes responsive to statutory requirements) which are identifiable in the cost development should be measured for proposed rate adjustments.

"Elements of expense other than direct labor, as well as labor costs changed by agreement but not set forth specifically in the original cost presentation, are not deemed appropriate justification for rate adjustments in wage offset proceedings.

"The Commission has approved the foregoing statement."

While the above statement was intended to be only advisory in nature, it has been the subject of considerable controversy.

³ Hereinafter sometimes referred to as the 'Direct Wage Offset" method.

It should be made clear that, in the absence of formal action by the Commission to the contrary, the aforementioned statement was not made for the purpose of foreclosing the employment of other methods for seeking cost offset adjustments in minimum rates, providing compelling evidence in justification thereof was presented. The Staff Wage Offset Proposal

The Commission's Transportation Division staff recommended that the following procedure be adopted for cost offset adjustments in minimum rates. Costs not specifically noted below are to be modified only in full-scale cost study:

- I. Direct Costs
 - A. Labor Costs

Adjust to reflect the following:

- 1. Changes in wages and fringe benefits under labor agreements.
- 2. Changes in payroll taxes.
- 3. Changes in the "manual" rate for Workmen's Compensation Insurance.
- B. Vehicle Fixed and Depreciation Costs

Adjust to reflect changes in vehicle license taxes and fees including:

1. Registration fees.

- 2. Weight fees.
- 3. License fees.
- 4. Highway use tax.
- C. Vehicle Running Costs

Adjust to reflect changes in fuel tax rates.

D. Transport Clearings Charges

Adjust only if identifiable in the origingl study and the charges related to individual weight groups.

II. Indirect Expenses

Adjust to reflect increases in the labor cost portion of indirect expenses by:

- 1. Analyzing indirect expenses to determine the percent labor in the original cost presentation.
- 2. Determining the average percent increase in direct labor costs over the level of the original cost presentation.
- 3. Multiply factor 1 by factor 2 and apply to the dollar amount of indirect expense in the original study.
- NOTE: For studies in which indirect expenses have not previously been adjusted by the above method, determine the dollar amount of indirect expense from the last study of record. The last study of record then becomes the original study of record for this purpose.

If data is not available for determination of the labor cost portion of indirect expense, assume to be 50 percent.

III. <u>Gross Revenue Expenses</u>

Adjust to reflect changes in amounts payable for Board of Equalization taxes and Cal. P.U.C. Transportation Rate Fund Fees.

When insurance expense is initially developed as a percentage of gross revenue, carry forward the dollar amount from the original study or from the last study of record. Do not adjust for changes in revenue.

The CTA Wage (Cost) Offset Proposal

The director of CTA's Division of Transportation Economics expressed the view that any interested party has the right to come before the Commission and assume the burden of proof concerning

alleged changes which have occurred in the various cost factors supporting the established minimum rates; and, in view of such alleged cost changes, suggest cost offset adjustments in the minimum rates involved. CTA and the Commission staff employ practically the same offset procedure with respect to the direct cost phase of the original cost presentation. The CTA's treatment of indirects and insurance expense factors differs materially, however, from the method recommended by the staff.

The CTA's cost offset proposal employs the theory, initially utilized by both the staff and the CTA, that "indirects follow direct costs." Under this procedure, indirect expense ratios, previously found reasonable, are applied to the adjusted direct costs and the resulting adjusted indirects thereby reflect the same proportionate change as computed for the direct costs. The staff, on the other hand, now takes the position that only that portion of indirect expenses related to wages and salaries should be treated in a cost offset minimum rate adjustment. This contention is predicated upon the view that certain overhead costs, other than wages and salaries, do not change at either the same time or by the same ratio as the for-hire carriers' direct costs.

The trucking association makes the observation that, if the staff opinion concerning indirect expenses is correct, one may reasonably expect to find (from a purely mathematical point of view) the established indirect expense ratios to be gradually decreasing over the past years. The CTA's director contends, however, that a review of cost presentations by both the staff and the CTA over the past 20 years has disclosed no situation wherein comparable indirect expense ratios have decreased. To further substantiate this latter contention, the director refers to a pending

-10-

67

proceeding involving the Los Angeles Drayage MRT 5 rates (Order Setting Hearing, Decision No. 74991, in Cases Nos. 6322, 5435, et al.) wherein the Commission staff has introduced a cost study into evidence in which the direct costs reflect labor and allied payroll costs, effective as of April 1, 1969; whereas indirect costs are based upon indirect expense ratios developed by the staff in 1966 and subsequently found by them to be proper for their current 1969 Los Angeles Drayage cost study. The CTA concludes that over the past 20 years indirect expenses in total have experienced the same magnitude of cost increases which can be theoretically attributed to "labor-related" indirect expense items only.

With respect to the treatment of insurance expense, the CTA urges that, where this cost factor is expressed in the original cost presentation as a percentage of gross revenue, such percentage factor also be used in the adjustment of gross revenue expense in a cost offset proceeding. The witness for CTA explained that the lowest and most effective insurance coverage is based on a percentage of the carriers' gross revenues; only relatively small truck operators obtain insurance at truck rates. The CTA witness explained that while insurance rates based on the carriers' gross revenues may not have changed, the actual cost of insurance has increased. To date, the increased cost of such insurance coverage has been offset by the application of the established percentage rates to the carriers' increased gross revenues.

The CTA witness stated that it was the trucking association's policy to request cost offset minimum rate adjustments only when major changes occur in the carriers' costs of operations. At this time, other relatively minor cost changes which have accumulated over the period since the rates were last revised are included in a single cost offset rate proposal. The threat of unfavorable

-11-

shipper reaction also tends to limit the number of sought adjustments in the for-hire carriers' level of rates. However, the CTA witness submits that, if cost offset adjustments in minimum rates are to be restricted to changes in major cost items only as suggested by the staff, more frequent petitions for minimum rate adjustments will be required to cover changes in underlying cost items not otherwise included in the cost offset rate adjustments. This latter course of action, the CTA witness submits, would not be in the public interest and should be avoided. Finally, it should be noted that the California Manufacturers Association filed the following qualified statement in support of the CTA's cost offset rate proposal:

> "... it is the position of this Association that the California Trucking Association must be prepared to justify all changes in costs, but that such changes can be handled at the same time C.T.A. elects to petition for any wage offset increase."

Summary Discussion - Cost Offset

It is well established that rate making, including cost offset minimum rate adjustments, is not reducible to an exact science but, at best, may be considered a refined art. Efforts to cloak cost offset rate adjustments with a degree of factual objectivity and exactness, that basic full-scale cost and rate studies do not claim or have, are largely responsible for the existing controversy as to the proper methodology for cost offset rate adjustments.

In a dynamic transportation environment basic full-scale cost and rate studies, including subsequent cost offset adjustments thereof, suffer a credibility gap with the passing of time. When this essential quality is lost it is imperative that new basic fullscale cost and rate studies be made in order to maintain and insure a continuing minimum reasonable rate structure. In the interim

-12-

. .

period, between the presentation of full-scale cost and rate studies, the Commission has recognized the temporary capacity of cost offset procedures to measure, with a reasonable degree of accuracy, the rate differential necessary to offset like changes which have occurred in certain cost items of the original basic cost presentation.

Since the accuracy and reliability of cost offsets are highest when conducted within the proximity of the original cost and rate presentations, the precise method or mechanics for developing a cost offset at a given period of time might well vary according to the conditions and circumstances surrounding the transportation involved. Initially, the wage (cost) offset method employed by CTA might well prove to be completely satisfactory. However, as successive cost offsets are employed with the passing of time and the likelihood that new full-scale studies may be in the offing, the more restrictive wage offset method proposed by the staff or the direct cost offset procedure suggested as a guideline in the Commission's letter of October 31, 1968, may be the only appropriate methods to employ. The ultimate burden of proof as to the proper cost offset method to use in any given situation should rest, in the first instance, with the party presenting the cost offset rate proposal. The Commission should not rigidly harness itself to any single cost offset procedure for adjusting its minimum rates and thereby preclude the presentation of evidence in justification of other desired cost offset proposals.

CTA Proposed Tax Offset

By the California Trucking Association's first amendment to its various petitions involved herein, a supplementary tax offset increase of approximately .65 percent is sought in the various minimum rates to offset a recent increase in the federal and state

-13-

taxes paid by for-hire carriers. Petitioner makes reference to a 10 percent surcharge applicable on all federal income taxes established by the Revenue and Expenditure Control Act of 1968. The CTA also makes note of the increases in the California state income taxes and corporation franchise taxes, established by legislation enacted during the 1967 legislative session amending the Revenue and Taxation Code (Statutes 1967, Chapter 963).

Petitioner explains that it did not include the impact of such tax increases in its original petitions due to questions regarding the permanency of such tax adjustments. The CTA now believes that the "temporary" federal tax surcharge will be of some duration, and that the state income and franchise tax increases will remain in effect. The CTA also implies that its sought supplementary increase is responsive to the Commission's "invitation" as expressed in its "Interested Party" letter of October 31, 1968.

In justification for the sought tax offset, the CTA directs attention to the Commission's prior reduction in minimum rates to reflect the income tax reductions authorized by the Federal Revenue Act of 1964.⁴ In order that the Commission may make similar findings as to appropriate rate increases in the instant circumstances, where tax levels have increased, the CTA abstracted pertinent provisions of the revised tax provisions and has made calculations of the asserted impact upon carrier revenues similar to those presented

-14-

Decision No. 67443, dated June 26, 1964, in Case No. 5432 (Unreported). Decision No. 67767, dated August 25, 1964, in Case No. 7783 (63 Cal. P.U.C. 282, 283). Decision No. 68848, dated April 6, 1965, in Case No. 5330 (64 Cal. P.U.C. 231, 232). Decision No. 68543, dated February 3, 1965, in Case No. 5437 (64 Cal. P.U.C. 30, 40, 41).

in support of prior tax reductions. The computations indicate an overall tax offset adjustment of approximately .65 percent.

The CTA having vigorously opposed the suggested direct wage offset proposal of October 31, 1968, on both practical and legal grounds, now cites the direct wage offset proposal as support for its sought further increase in rates. Such justification is certainly not of the quality that would cause the Commission to move in the direction desired by petitioner in this particular instance.

In establishing the Commission's various minimum rates, effort is made to afford the for-hire carriers regulated thereby an equality of competitive opportunity to realize a reasonable margin of profit. Whether the carriers actually experienced profitable operations depends largely upon the entrepreneural ingenuity of the individual carrier and not the largess of the Commission. It is for this reason, among others, that we are in total agreement with the CTA's view that it has the right and burden to prove a desired cost offset adjustment in minimum rates to be just and reasonable. We are not prepared to accept, however, that a mere recitation of prior Commission action and a method for assertedly duplicating such action constitute sufficient proof that the existing level of minimum rates impairs the carriers' opportunity to realize a reasonable margin of profit from their operations.⁵

The Commission staff recommends that no tax offset adjustment be made in the rates contained in MRT 1-B (East Bay Drayage), MRT 2 (Statewide-General Commodities), MRT 5 (Los Angeles Drayage) and MRT 19 (San Francisco Drayage). With respect to the rates contained in MRT 9-B (San Diego Drayage) and MRT 15 (Statewide-Vehicle

-15-

⁵ Decision No. 75979, dated July 29, 1969, in Case No. 5330, et al., (Petition for Modification No. 40, et al.).

Unit Rates), the staff recommends a tax offset increase in rates of 0.26 percent and 0.40 percent, respectively. The tax offset method employed by the staff in the latter two instances is comparable to the procedure employed by the CTA. The staff did not develop a tax offset for MRT Nos. 1-B, 2, 5 and 19. Had it chosen to do so, percentage adjustment factors, similar to those calculated for MRT 9 and 15, would have been produced as a sheer result of the mathematical interplay of selected expense and revenue computations. Such exercise in arithmetic, as in the like presentation of the CTA, is insufficient proof as to any impairment in for-hire carriers' capacity to earn a just and reasonable profit under the existing level of rates. The carriers involved in the San Diego Drayage Area (MRT 9-B) are extremely minor when compared to the number of carriers involved in statewide trucking operations. As for MRT 15, this tariff applies only under the mutual consent of the carrier and shipper; when such agreement exists, the otherwise governing minimum rate tariffs do not apply.

Finally, it should be noted that, as in prior similar circumstances, highway common carriers who believe their tariff rates are inadequate have ample statutory provisions for seeking appropriate relief. Permitted carriers need no additional authority from this Commission to observe rates higher than the otherwise applicable minimum rates. Petitioner's sought further amended relief has not been shown, in this particular instance, to be a just and reasonable basis for further increases in the minimum rates involved.

Disposition of Interim Cost Offset Rate Adjustments

1. <u>Minimum Rate Tariff No. 2</u>: By the Commission's interim order in Decision No. 75520 the CTA's sought increase in MRT 2

-16-

rates was partially granted, thereby reflecting the direct wage offset method suggested in the Commission's advisory letter of October 31, 1968. From the additional evidence now before us, it is clear that the wage (cost) offset procedure utilized by the CTA will, in this particular instance, result in appropriate upward adjustments in the rates contained in MRT 2. Therefore, that portion of the CTA's sought increase not granted by Decision No.75520 should be authorized.

2. <u>Minimum Rate Tariff No. 15</u>: By Decision No. 75492 the vehicle unit rates contained in MRT 15 were increased in accordance with the direct wage offset procedure, pending further hearing. The Commission staff has reevaluated its original rate proposal and now recommends that the interim increase in MRT 15 rates granted by Decision No. 75492 be recalculated under the wage offset method proposed by the staff. The resulting increase in rates under the staff revised proposal is higher than the interim cost offset increase previously authorized.

The vehicle unit rates contained in MRT 15 were initially established by Decision No. 65072 of March 12, 1963 (60 Cal. P.U.C. 624). Said decision found indirect expense ratios of 13 percent for monthly rates and 12 percent for yearly rates to be reasonable. From the record in this proceeding one may draw the conclusion that either the basic indirect expense ratios noted above have not changed or, alternatively, changes which may have occurred would reflect the same trend which can be generally attributed to the labor cost factors as of April 1, 1969.

The record in Decision No. 75492 indicates that the direct wage offset interim increase in MRT 15 rates ranges from approximately 3.5 to 4 percent (Exhibit No. 17-3). In view of the aforementioned indirect expense ratios and the interim increase in rates presently

-17-

authorized, an overall further increase of .5 of 1 percent in MRT 15 rates would reflect a wage (cost) offset adjustment in such rates deemed appropriate in the light of the evidence now before us. Such increase in MRT 15 rates would be slightly higher than that proposed by the staff.

3.

Minimum Rate Tariffs Nos. 1-B, 9-B and 19: The Commission staff recommends that the interim increases granted by Decisions Nos. 75516 (MRT 1-B, East Bay Drayage) and 75518 (MRT 19, San Francisco Drayage) be recalculated to reflect the staff's proposed wage offset method for adjusting minimum rates. Under this latter amended proposal the increase in rates would be slightly higher than the interim increase in such rates previously authorized.

In view of the rather extensive period of time that the original cost and rate presentations underlying the minimum rates for the San Francisco and East Bay Drayage Areas have been in effect, the more restrictive wage offset procedure proposed by the staff has merit and should be adopted.

The Commission staff made no specific proposal relative to the interim cost offset adjustment in the minimum rates contained in MRT 9-B (San Diego Drayage Area). However, the longevity and overall competency of the basic cost and rate information supporting the rates in MRT 9-B are similar to that existing for the San Francisco and East Bay Drayage Areas. In authorizing an interim increase in MRT 9-B rates, Decision No. 75511 stated "... if no provision is made for indirect costs, the rate proposal of petitioner would be reduced by approximately 0.7 to 0.8 percent". If we now restore 50 percent or approximately .4 of 1 percent of CTA's original sought increase, not previously reflected in the interim increase granted by Decision No. 75511, the resulting increase in

-18-

MRT 9-B rates would reflect the staff's recommended wage offset method. Such action would be similar to that proposed to be adopted herein for the San Francisco and East Bay Drayage Areas and would constitute an equitable disposition of CTA's rate proposal for the San Diego Drayage Area.

4. <u>Minimum Rate Tariff No. 5</u>: By Decision No. 75521 an interim increase of approximately 4.6 percent, in lieu of the 5.6 percent increase sought by the CTA, was granted in the minimum rates for the Los Angeles Drayage Area. The position of the Commission's staff relative to CTA's sought wage (cost) offset increase in MRT 5 rates is summarized in said decision as follows:

> "The Commission staff argued as follows: Full-scale studies and a proposal for a new rate structure reflecting current conditions are now available, and will be presented to the Commission in Case No. 6322, Case No. 5435, and related cases, under Order Setting Hearing, Decision No. 74991. Hearings are scheduled beginning February 18. The staff has made full-scale cost, rate and traffic flow studies leading toward the establishment of a single minimum rate tariff in a larger area in Los Angeles and Orange Counties between the San Gabriel Mountains and the Pacific Ocean, in response to the Commission's determina-tion in Decision No. 69533 (61 Cal. P.U.C. No. 633). Proposed exhibits reflecting the staff studies toward this end are ready for presentation. Prior decisions in Case No. 5435 labor offset petitions Prior explain fully and completely that there are no data of record upon which any significant reliance can be placed in the calculation of present transportation costs. Decision No. 72942 of August 22, 1967, is illustrative of this point. The staff believes that the Commission would desire to have before it full-scale studies relating to minimum rates in the area of Los Angeles and its environs before deciding the issues in this proceeding.

"The Commission staff requested that the disposition of Petition No. 114, Case No. 5435, in whole or in part, be deferred until the staff proposals are put before the Commission in the hearing set for February 18, and that the record made in Petition No. 114 be considered with the record to be made pursuant to Order Setting Hearing, Decision No. 74991."

It is well established that the transportation characteristics and conditions within the so-called Los Angeles Drayage Area have materially changed since the basic cost and rate information underlying MRT 5 rates were developed. New full-scale cost and rate studies for the transportation of property now governed by the provisions of MRT 5 are urgently required. Such studies are now in the process of being formally presented to the Commission for its consideration. In the circumstances, increases beyond the direct wage offset increase granted by Decision No. 75521 should not be authorized.

Findings

The Commission finds that:

1. The minimum rates prescribed by the Commission to govern the California intrastate transportation of property by for-hire highway carriers are established on the basis of extensive fullscale cost and rate economic studies.

2. The wage and allied payroll costs of for-hire carriers, which constitute a major portion of their total operating costs, have been materially increasing at an annual rate.

3. The cost offset or datum plane method for adjusting rates has been shown to be an appropriate procedure for reflecting in the established minimum rates periodic changes in the cost factors, such as indicated in paragraph 2 above, underlying the existing minimum rates.

4. The cost offset method for adjusting rates should not be utilized or otherwise treated with the same degree of particularity and definitiveness generally accorded to full-scale cost and rate economic studies.

5. The Commission should not adopt any particular cost offset method for adjusting its minimum rates; and thereby preclude

-20-

the use of other offset procedures which may be shown to be justified and preferable under the circumstances.

6. The three cost offset methods, previously employed for adjusting the minimum rates and described herein as (1) Direct Wage Offset, (2) Wage Offset, and (3) Wage (cost) Offset, have been shown to be acceptable procedures. The selection and employment of any one of said methods, or such other cost offset procedure for adjusting the minimum rates deemed appropriate, must be fully justified by relevant and competent evidence.

7. The for-hire carriers engaged in transportation subject to Minimum Rate Tariffs Nos. 1-B, 2, 9-B, 15 and 19, respectively, have experienced increased costs, effective generally as of April 1, 1969, greater than the cost offset increases in rates granted by Decisions Nos. 75516 (MRT 1-B), 75520 (MRT 2), 75511 (MRT 9-B), 75492 (MRT 15), and 75518 (MRT 19).

8. The existing provisions of Minimum Rate Tariffs Nos. 1-B, 2, 9-B, 15 and 19 do not reflect the additional increases in costs experienced by for-hire carriers as of April 1, 1969, not otherwise offset by increases in minimum rates as indicated in Finding 7, above.

9. The sought rate increases, as further amended herein, fairly reflect the increased costs experienced by for-hire carriers as of April 1, 1969.

10. The evidence submitted as justification for a tax cost offset additional rate increase fails to prove that, under the existing level of minimum rates and current federal and state tax levels, the for-hire carriers' equality of competitive opportunity to earn a reasonable margin of profit has been impaired or otherwise reduced to an unreasonable degree.

-21-

ľ

11. The direct wage offset interim increase in Minimum Rate Tariff No. 2 rates, granted by Decision No. 75520, should now be further revised to reflect the increase in rates that would have resulted had the wage (cost) offset method for adjusting said rates been originally applied as proposed by petitioner.

12. The direct wage offset interim increase in rates contained in Minimum Rate Tariff No. 15, granted by Decision No. 75492, should now be further increased by .5 of 1 percent; thereby reflecting the wage (cost) offset method for adjusting said rates.

13. The direct wage offset increases in rates contained in Minimum Rate Tariffs Nos. 1-B, 9-B and 19, granted by Decisions Nos. 75516, 75511 and 75518, respectively, should be revised to reflect the increases in rates that would have resulted had the wage offset method for adjusting such rates been originally applied thereto.

14. To the extent that the original proposed increase in rates named in Minimum Rate Tariff No. 5 exceeds the interim increase granted by Decision No. 75521, such differentially higher sought increase in rates has not been shown to be justified.

15. The proposed increase in the minimum rates and charges, as further amended herein, has been shown to be justified, and the resulting increased rates and charges established in the order which follows are the just, reasonable and nondiscriminatory minimum rates for the transportation governed thereby.

16. To the extent that the provisions of Minimum Rate Tariffs Nos. 1-B, 2, 9-B, 15 and 19 have been found heretofore to constitute reasonable minimum rates and rules for common carriers as defined in the Public Utilities Act, said provisions, as hereinafter adjusted, are, and will be, reasonable minimum rate provisions for said common carriers. To the extent that the existing rates and charges of

-22-

said common carriers for the transportation involved are less in volume or effect than the minimum rates and charges herein designated as reasonable for said carriers, to the same extent the rates and charges of said carriers are hereby found to be, now and for the future, unreasonable, insufficient, and not justified by the actual competitive rates of competing carriers or by the costs of other means of transportation.

17. The increase in rail rates and charges, as proposed in Application No. 50757, and further amended herein, is justified.

18. Where common carriers have been heretofore authorized to depart from the so-called long- and short-haul prohibitions of Article XII, Section 21, of the Constitution of the State of Califormia and of Section 460 of the Public Utilities Code, such outstanding authorities should be modified, as requested by petitioner, to the extent necessary to carry out the effect of the order herein. Conclusions

The Commission concludes that:

1. Interested parties have the right to come before this Commission and the subsequent responsibility to assume the burden of proof as to any alleged changes in the cost factors underlying the established minimum rates; and, in the light of such alleged changes, recommend remedial cost offset minimum rate adjustments.

2. The additional increases sought in Petition for Modification No. 523, as amended, in Case No. 5432, and Application No. 50757 should be granted, in part, and Minimum Rate Tariff No.2 amended accordingly.

3. The additional increases sought in Petitions for Modification Nos. 83, 154 and 17, as amended, in Cases Nos. 5439, 5441 and 7783, respectively, should also be partially granted, and Minimum Rate Tariffs Nos. 1-B, 9-B, 15 and 19 amended accordingly.

-23-

4. The additional increases sought in Petitions for Modification Nos. 524 and 114, as amended, in Cases Nos. 5432 and 5435, respectively, should be denied.

In order to avoid duplication of tariff distribution, Minimum Rate Tariff No. 2 will be amended by the ensuing order and Minimum Rate Tariffs Nos. 1-B, 9-B, 15 and 19 will be amended by separate orders.

<u>O R D E R</u>

IT IS ORDERED that:

1. Minimum Rate Tariff No. 2 (Appendix D to Decision No. 31606, as amended) is further amended by incorporating therein, to become effective December 1, 1969, the revised pages attached hereto and listed in Appendix A, also attached hereto, which pages and appendix by this reference are made a part hereof.

2. Common carriers subject to the Public Utilities Act, to the extent that they are subject also to said Decision No. 31606, as amended, are hereby directed to establish in their tariffs the increases necessary to conform with the further adjustments ordered herein.

3. Common carriers maintaining rates on a level other than the minimum rates for transportation for which rates are prescribed in Minimum Rate Tariff No. 2 are authorized to increase such rates by the same amounts authorized for Minimum Rate Tariff No. 2 rates herein.

4. Common carriers maintaining rates on the same level as Minimum Rate Tariff No. 2 rates for the transportation of commodities and/or for transportation not subject to Minimum Rate Tariff No. 2 are authorized to increase said common carrier rates by the same amounts authorized for Minimum Rate Tariff No. 2 rates herein.

-24-

A.50757, C.5432 Pets. 523, 524 et al. NB

5. Common carriers maintaining rates at levels other than the minimum rates for the transportation of commodities and/or for transportation not subject to Minimum Rate Tariff No. 2 are authorized to increase said common carrier rates by the same amounts authorized for Minimum Rate Tariff No. 2 rates herein.

6. In addition to the increases hereinbefore authorized or required, common carriers by railroad be and they are authorized to increase their rates and charges of record in this proceeding to the levels of the comparable rates, charges and provisions of Minimum Rate Tariff No. 2 established pursuant to ordering paragraph 1 hereof.

7. Common carriers maintaining, under outstanding authorizations permitting the alternative use of rail rates, rates below the specific minimum rate levels otherwise applicable on the commodities and between the points for which increases are authorized in ordering paragraph 6 hereof are hereby anthorized and directed to increase such rates, on not less than five days' notice to the Commission and to the public, to the level of the rail rates established pursuant to ordering paragraph 6 hereof, or to the level of the specific minimum rates, whichever is lower. To the extent such common carriers have maintained such rates at differentials above previously existing rail rates, they are authorized to increase such rates by the amounts authorized in paragraph 6 hereof; provided, however, that such increased rates may not be lower than the rates established by the rail lines pursuant to the authority granted in paragraph 6 hereof, nor higher than the otherwise applicable minimum rates. Such adjustments shall be made effective not later than thirty days after effectiveness of the increased rail rates.

-25-

8. Except for tariff publications required to be made by ordering paragraph 7 hereof, tariff publications required or authorized to be made by common carriers as a result of the order herein shall be filed not earlier than the effective date of this order and may be made effective not earlier than the tenth day after the effective date of this order, on not less than ten days' notice to the Commission and to the public; such tariff publications as are required shall be made effective not later than December 1, 1969; and as to tariff publications which are authorized but not required, the authority herein granted shall expire unless exercised within sixty days after the effective date hereof.

9. Common carriers, in establishing and maintaining the rates authorized hereinabove, are hereby authorized to depart from the provisions of Section 460 of the Public Utilities Code to the extent necessary to adjust long- and short-haul departures now maintained under outstanding authorizations; such outstanding authorizations are hereby modified only to the extent necessary to comply with this order; and schedules containing the rates published under this authority shall make reference to the prior orders authorizing long- and short-haul departures and to this order.

10. The additional increases sought in Petitions for Modification Nos. 523 and 524, as amended, in Case No. 5432; Petition for Modification No. 114, as amended, in Case No. 5435; and Application No. 50757, as amended, not otherwise granted herein, are hereby denied.

-26-

1.7

11. In all other respects said Decision No. 31606, as amended, shall remain in full force and effect.

The effective date of this order shall be twenty-four days after the date hereof.

| SECTION 1-RULES OF GENERAL APPLICATION (Continued) | ITEM |
|---|--------------|
| APPLICATION OF RATES Rates in this tariff, and common carrier rates applied under the provisions of Items 200, 210, 220 and 230, subject to minimum weights of less than 10,000 pounds, include loading into and unloading from the carrier's equipment. When the carrier picks up or delivers a shipment subject to a minimum weight of less than 10,000 pounds and weighing more than 100 pounds, at a point not at street level, and no vehicular elevator service or vehicular ramp is provided and made available to the carrier, an additional charge of 12 cents per 100 pounds, minimum additional charge 090 cents per shipment, shall be assessed for the service of handling shipment beyond the carrier's equipment. Rates in this tariff, subject to minimum weights of 10,000 pounds or more, include loading into and unloading from carrier's equipment at established depots. At points of origin or points of destination other than established depots, rates in this tariff (other than common carrier rates, applied under the provisions of Items 200, 210, 220 and 230), subject to minimum weights of 10,000 pounds the services of one man (driver or helper) for loading or unloading of the carrier's equipment, subject to the provisions of Item 140. | ≠ 120 |
| CHARGES FOR ESCORT SERVICE In addition to all other applicable rates and charges named in this tariff, the following charges shall be assessed on shipments requiring escort service: (a) A charge of 058.50 per hour, plus 8 ² / ₂ cents per mile computed in accordance with the provisions of Item 100, shall be made for each escort vehicle and driver furnished, for the time and distance said vehicle and driver are engaged in such service (See Note). (b) A charge shall be made equal to the actual cost of any bridge or ferry tolls incurred for each escort car. (c) A charge of 57.25 per twenty-four (24) hour period shall be assessed for subsistence for each escort driver if service requires over-night delay.
