fornia Rock Products Association,  
interested party.  
J. M. Jenkins and Leonard Diamond, for  
the Transportation Division of the  
Commission staff.

O P I N I O N

Petitioner, the California Trucking Association, seeks increases in the zone rates in Minimum Rate Tariff 17 which apply for the transportation of rock, sand, gravel, decomposed granite, asphaltic concrete, slag, and certain other commodities from designated production areas to defined delivery zones in southern California. Petitioner alleges that the sought increases in rates are necessary to compensate for increases in operating costs which the carriers who are involved in said transportation, i.e., carriers operating dump truck equipment, have experienced since February, 1969, when the zone rates in Minimum Rate Tariff 17 were last adjusted.

Public hearing on the petition was held before Examiner Abernathy at Los Angeles on July 10, 1969. The matter was taken under submission with the filing of briefs on August 11, 1969.

Petitioner presented evidence through its assistant director of research to the effect that as of May 1, 1969, the labor costs of the carriers engaged in the transportation of asphaltic concrete and decomposed granite were increased by about 4 percent; that increases were concurrently made in some of the so-called fringe-benefit costs of said carriers; that other fringe-benefit costs were increased on July 1, 1969; and that on September 1, 1969, the labor costs of carriers engaged in the transportation of rock, sand, gravel and slag were increased by about 5 percent. Petitioner's witnesses also presented data to show the carriers' present costs of service

(Pet. 183)

under the increased wage rates and related cost increases, and the changes which should be made in the rate formulae that underlie the zone rates in Minimum Rate Tariff 17 if said rates are to be revised to reflect present costs of service.

An engineer of the Commission's staff likewise presented data to show the carriers' present costs of service, and a Commission rate expert submitted and explained the manner in which the rates in Minimum Rate Tariff 17 should be adjusted to compensate for the increases in labor and related costs which the carriers have experienced.

The California Dump Truck Owners Association and the Association of Independent Owner-Operators, Inc., supported the petition to the extent that it seeks increases in the rates for the transportation of rock, sand, gravel, decomposed granite and slag. However, both associations opposed increases in the rates for asphaltic concrete and related commodities. A representative of the California Dump Truck Owners Association pointed out that the zone rates in Minimum Rate Tariff 17 for the transportation of asphaltic concrete were developed on the costs of operating 3-axle dump truck equipment. He said that carriers using such equipment must compete with carriers who operate larger equipment

and who, by reason of that fact, may assess rates which, depending on the circumstances in which the transportation is performed, can result in lesser charges than those which accrue under the zone rates.<sup>1/</sup> He asserted that increases in the zone rates for asphaltic concrete as proposed by petitioner would lessen the ability of the carriers operating 3-axle dump trucks to compete effectively with carriers operating the larger vehicular units. He asserted, furthermore, that many asphalt plants are located outside of production areas from which the zone rates apply; that said plants may ship at the hourly rates or at distance rates which have not been revised since 1953 and which, as a consequence, do not reflect increases in the costs of service which have become applicable since that time. Hence, said plants enjoy rate advantages which would be augmented if the sought increases in the rates for asphaltic concrete are established. He said that this competitive aspect of the petition, as well as the other matters involved, has been considered by the various chapters of the California Dump Truck Owners Association, and by Association's Board of Directors also, and that the chapters and the Board are in agreement that the rates for asphaltic concrete should not be increased.<sup>2/</sup>

- 
- 1/ Minimum Rate Tariff 17 also sets forth hourly rates, which rates apply in lieu of the zone rates when the transportation is performed by trucks with trailing equipment or by tractors and trailers.
  - 2/ Assertedly, for similar reasons, the Associated Independent Owner Operators, Inc. likewise opposes the increases sought in the rates for asphaltic concrete.

Discussion

The record shows that except in one respect both petitioner's witness and the Commission engineer followed essentially the same procedure and utilized essentially the same factors in their development of the costs of the transportation services involved herein under present levels of labor and related costs. The exception deals with the calculation of the extent that the increases in labor costs resulted in increases in indirect expense. Petitioner's witness computed increase in indirect expense in substantially the same manner as has been followed in prior matters of this kind. Utilizing as a base approximately the same level of indirect expense that had been developed in connection with the adjustment of the zone rates in Minimum Rate Tariff 17 in February, 1969, the witness calculated the increase by increasing 50 percent of said indirect expense in the same proportion that he had found the carriers' direct labor costs had been increased as a result of the recent labor increases.

On the other hand, the Commission engineer did not include in his calculations provision for any increase in indirect expenses. The engineer explained that, in not making any provision for an increase in indirect expense, he had been guided by a letter dated October 31, 1968, from the Commission to various interested parties to the effect that, "in wage offset proceedings, only labor costs specifically changed by labor agreements (including changes responsive to statutory requirements) which are identifiable in the cost development

should be measured for proposed rate adjustments."

In various prior proceedings involving adjustments in the rates in Minimum Rate Tariff 17, specific consideration has been given to the question of the extent that the carriers' indirect expenses are affected by increases in direct labor costs. Following representations by engineers of the Commission's staff that studies which they have made show that about 50 percent of carriers' indirect expenses are labor-related items and increase in proportion to increases in labor costs, the Commission has approved increased rates which include allowance for increases in indirect costs to the extent stated. In view of the specific and affirmative provision heretofore given to indirect expense increases in wage-offset proceedings involving the rates in Minimum Rate Tariff 17, we hold that the more general expression in the Commission's letter of October 31, 1968, is not applicable here. We are of the opinion that in order to give full and proper effect to the increases in labor and related costs the cost showing of the Commission engineer should be adjusted to reflect increases in indirect expense in the same manner as that which the Commission has heretofore approved in wage-offset proceedings pertaining to the rates in Minimum Rate Tariff No. 17. Subject to this adjustment, the cost showing <sup>3/</sup> will be adopted. Also subject to this adjustment, the recom-

---

3/ The adjusted cost formulae which are herein adopted are set forth in Appendix "A" attached hereto. Also shown in Appendix "A" are the rate formulae to be used in the development of increased rates on the basis of said cost formulae.

mendations of the Commission rate expert concerning the procedure in which the rates in Minimum Rate Tariff 17 should be increased to give effect to the increased costs will be adopted.

No increases will be made in the rates for asphaltic concrete and related commodities. Although the record is clear that the carriers who are engaged in the transportation of asphaltic concrete have experienced increases in their operating costs, as have the carriers of rock, sand, gravel and slag, we believe that much weight should be given to the desires of the carriers to forego increases in their rates in order that they may better meet the competition of other for-hire carriers who are also engaged in the transportation of asphaltic concrete but who are not subject to zone rates. In this respect it appears that the carriers who are transporting asphaltic concrete under the zone rates are peculiarly able to make an appropriate assessment of what limits are imposed on their charges by the necessity of meeting the charges of their competitors.

Findings:

Upon consideration of the record we find that:

1. Since the development of the cost data upon which the present zone rates in Minimum Rate Tariff 17 were established, the costs of providing the transportation subject to the zone rates in said tariff have increased.
2. The showing of costs by the Commission engineer, adjusted as explained hereinabove with respect to indirect expense fairly and reasonably shows (for minimum rate purposes) present costs of transportation services of for-hire dump truck carriers under the zone rates in Minimum Rate Tariff 17.

3. The cost formulae which are reproduced in Appendix "A" attached hereto, and by this reference made a part hereof, set forth (for minimum rate purposes) the costs of transportation services of for-hire dump truck carriers under the zone rates in Minimum Rate Tariff 17.
4. The conversion of the costs (as developed under the cost formulae set forth in Appendix "A") into rates in accordance with the rate formulae which are also set forth in Appendix "A" will result in reasonable and nondiscriminatory minimum rates for the transportation services to which they apply.

Conclusions:

We conclude that with the exception of the zone rates for asphaltic concrete and related commodities the zone rates in Minimum Rate Tariff 17 should be increased to conform to the rates found reasonable and nondiscriminatory in Paragraph 4 of the Findings above. The zone rates for asphaltic concrete and related commodities should not be increased for the reasons discussed above.

Other:

By Petition No. 184 in Case No. 5437, Pacific Western Industries, Inc., C.Z.C. Corporation and Gillibrand Company seek modifications in the zone rates in Minimum Rate Tariff 17 so that said rates reflect certain changes in transportation conditions which have occurred since the rates were first established. The requested modifications are being authorized by separate decision which is being issued today. In order to avoid the creation of an unwarranted diversity between the increased rates herein-after established and the rates resulting from the modifications sought by Petition No. 184, the latter rates will be made subject to the same increases as those which are effected herein.

O R D E R

IT IS ORDERED that:

1. Minimum Rate Tariff 17 (Appendix B to Decision No. 69469) is hereby amended by incorporating therein, to become effective January 31, 1970, the revised pages attached hereto and listed in Appendix B, also attached hereto, which pages and appendix are made a part hereof.
2. In all other respects said Decision No. 69469 shall remain in full force and effect.
3. Except as is otherwise provided through this order, Petition No. 183 in Case No. 5437 is denied.
4. Common carriers are authorized to depart from the provisions of Article XII, Section 21, of the Constitution to the extent necessary to assess or otherwise to apply the minimum rates which are established pursuant to this order.
5. The rates which are established pursuant to Petition No. 184 in Case No. 5437 shall incorporate therein the same

C. 5437 - NW/HW \*  
(Pet. 183)

increases as those by which similar zone rates in Minimum Rate Tariff 17 are being increased pursuant to the provisions of this order.

The effective date of this order shall be twenty-four days after the date hereof.

Dated at San Francisco, California, this 23rd day of DECEMBER, 1969.

William J. Sprouse  
President  
Augustine J. Murphy

Case 5437 - NW/HW \*  
(Pet. 183)

## Appendix A

### Cost Formulae

Rock, Sand and Gravel:

$$\text{Cost per ton} = (\text{one-way miles} \times \$0.0135) + (\text{round-trip minutes} \times \$0.00554) + \$0.182$$

Slag: Cost per ton = (one-way miles x \$0.0137) + (round-trip minutes x \$0.00570) + \$0.207

Asphaltic Concrete:

$$\text{Cost per ton} = (\text{one-way miles} \times \$0.0234) + (\text{96% round-trip minutes} \times \$0.01121) + \$0.385$$

Decomposed Granite:

From all Production Areas Except Production Area 19-L  
Cost per ton = (one-way miles x \$0.0234) + (round-trip minutes x \$0.01121) + 0.188

From Production Area 19-L

$$\text{Cost per ton} = (\text{one-way miles} \times \$0.0139) + (\text{round-trip minutes} \times \$0.00693) + \$0.224$$

### Rate Formulae:

For zone rates other than from Orange County Production Areas to San Diego Delivery zones:

$$\text{Rate per ton} = \frac{\text{Cost per ton}}{0.9085}$$

For zone rates from Orange County Production Areas to San Diego County Delivery zones:

- a. Subtract from the present zone rates the current rates from corresponding Orange County production areas to Orange County delivery zone No. 30118.
- b. Increase the resulting differences in rates by 2.2 percent for rock, sand and gravel products.
- c. Increase the rates which are used as subtrahends in paragraph (a) to correspond to the increased rates which are developed pursuant to the above cost and rate formula for transportation from the same Orange County production areas to Orange County Delivery zone No. 30018.
- d. Add to the increased rate differentials developed in paragraph (b) the corresponding rates developed in paragraph (c).

(End)
