Application No. 52807
(Filed August 11, 1971;
Amended August 19, 1971)

O P I N I O N

Milton's Express, Inc., presently providing service as a highway common carrier for the transportation of commodities requiring the use of special refrigeration or temperature control in specially designed and constructed equipment in intrastate, interstate and foreign commerce between various points in southern California, requests authority to extend said service to points and places in that area bounded by Paso Robles, Bakersfield, Mojave and Barstow, on the north, and the California and Mexican border, on the south. Copies of the application were served upon all existing carriers serving the proposed extended area. Appropriate notice was filed in the Federal Register. The only protest to the application was filed by Cal-Canadian Motor Express. Said protest was subsequently withdrawn by letter dated October 13, 1971.

The proposed extended service would be provided on an "on-call" basis Monday through Saturday. Applicant owns and operates 76 units of equipment, including 52 refrigerated vans. As of June 30, 1971, applicant indicated a net worth in the amount of \$76,272.

It is alleged that applicant has served the proposed extended area as a permitted carrier for many years; that applicant has received numerous requests from various shippers to serve the purposed extended area as a highway common carrier so that they might avail themselves of the more advantageous split delivery rates; and that applicant is unable to properly meet the need of present interstate customers desiring to use applicant's service to the proposed extended area.

After consideration the Commission finds that public convenience and necessity require applicant's service as a highway common carrier on shipments moving in intrastate, interstate and foreign commerce as more specifically set forth in the order hereto. Applicant's operating authority will be restated in the form of a new certificate in loose leaf form. A public hearing is not necessary.

Milton's Express, Inc. is hereby placed on notice that operative rights, as such, do not constitute a class of property which may be capitalized or used as an element of value in rate fixing for any amount of money in excess of that originally paid to the State as the consideration for the grant of such rights. Aside from their purely permissive aspect, such rights extend to the holder a full or partial monopoly of a class of business over a particular route. This monopoly feature may be modified or canceled at any time by the State, which is not in any respect limited as to the number of rights which may be given.

O R D E R

IT IS ORDERED that:

1. A certificate of public convenience and necessity is granted to Milton's Express, Inc., a corporation, authorizing it to operate as a highway common carrier, as defined in Section 213

of the Public Utilities Code, between the points and over the routes particularly set forth in Appendices A, B and C attached hereto and made a part hereof.

2. In providing service pursuant to the certificate herein granted, applicant shall comply with and observe the following service regulations. Failure so to do may result in a cancellation of the operating authority granted by this decision.

- (a) Within thirty days after the effective date hereof, applicant shall file a written acceptance of the certificate herein granted. Applicant is placed on notice that, if it accepts the certificate of public convenience and necessity herein granted, it will be required, among other things, to comply with and observe the safety rules of the California Highway Patrol and the insurance requirements of the Commission's General Order No. 100-F.
- (b) Within one hundred twenty days after the effective date hereof, applicant shall establish the service herein authorized and amend its tariffs on file in the Commission's office to reflect the authority granted herein.
- (c) The tariff filings shall be made effective not earlier than thirty days after the effective date of this order on not less than thirty days' notice to the Commission and the public, and the effective date of the tariff filings shall be concurrent with the establishment of the service herein authorized.
- (d) The tariff filings made pursuant to this order shall comply with the regulations governing the construction and filing of tariffs set forth in the Commission's General Order No. 80-A.
- (e) Applicant shall maintain its accounting records on a calendar year basis in conformance with the applicable Uniform System of Accounts or Chart of Accounts as prescribed or adopted by this Commission and shall file with the Commission, on or before March 31 of each year, an annual report of its operations in such form, content, and number of copies as the Commission, from time to time, shall prescribe.

- (f) Applicant shall comply with the requirements of the Commission's General Order No. 84-Series for the transportation of collect on delivery shipments. If applicant elects not to transport collect on delivery shipments, it shall make the appropriate tariff filings as required by the General Order.

3. The certificate of public convenience and necessity granted in paragraph 1 of this order shall supersede the certificate of public convenience and necessity granted by Decision No. 62895, dated December 5, 1961, in Application No. 43403, which certificate is revoked effective concurrently with the effective date of the tariff filings required by paragraph 2(b) hereof.

The effective date of this order shall be twenty days after the date hereof.
