O P I N I O N

By this petition the California Dump Truck Owners Association seeks increases in the zone rates in Minimum Rate Tariff 17 (MRT 17) which apply as minimum rates for the transportation of rock, sand, gravel, slag and decomposed granite in dump truck equipment by for-hire highway carriers from production areas in Los Angeles, Orange, Riverside, San Bernardino and Ventura Counties. Petitioner alleges that increases in said rates are necessary to compensate for increases in labor costs which the carriers have experienced since the rates were established at their present level on September 1, 1970, and for which no provision is included in the rates.

Public hearing on the petition was held before Examiner C. S. Abernathy at Los Angeles on January 5, 1972.

Evidence was submitted by petitioner's manager. According to exhibits and testimony of this witness, the labor contracts under which the carriers are currently operating were negotiated as of September 1, 1971, and as of December 13, 1971. The contract of September 1, 1971, applies to the transportation of rock, sand, gravel and slag, and provides for the payment of increased drivers' wage and fringe benefit costs as follows:

95 cents per hour, effective
November 13, 1971;

35 cents per hour, effective
May 1, 1972, and

85 cents per hour, effective
September 1, 1973.

The other contract applies to the transportation of decomposed granite, and provides for increased drivers' wage and fringe benefit costs as follows:

50 cents per hour from
August 1, 1971;

30 cents per hour from
November 1, 1971, and

5 cents per hour from
December 1, 1971.

It also specifies that additional increases in wage and fringe benefit costs are to become effective May 1, 1972, May 1, 1973, and November 1, 1973.

Petitioner's manager stated that the increase of 95 cents an hour in labor costs in connection with the transportation of rock, sand, gravel and slag had been approved by the Federal Wage Control Board. On February 9, 1972, he filed a certification to the effect that during the previous week the Federal Construction Industries Stabilization Commission had approved the above-enumerated labor increases in 1971, which total 85 cents an hour, for the transportation of decomposed granite.

The rate increases which petitioner is here seeking are those which would compensate for the increases in labor and related costs which have become applicable in 1971 pursuant to, or as a result of, the September 1, 1971, and December 13, 1971, labor contracts. Petitioner's manager estimated that, in terms of percent, these increases have increased the carriers labor costs for drivers by about 17 percent.

A statement in support of the sought rate increases was submitted at the hearing by the California Trucking Association.

Subsequent to the hearing the following described exhibits were filed by the Commission's staff and were received as part of the record in this matter:

2. A report showing the extent that the cost and rate formulae for calculating the zone rates for rock, sand, gravel and slag should be revised to reflect the increases in labor and related costs. This report was filed on February 23, 1972.

- b. A report showing the extent that the cost and rate formulae for calculating the zone rates for decomposed granite should be revised to reflect the increases in labor and related costs. This report was filed on March 20, 1972.
- c. A recommendation that zone rates should be canceled from certain production areas which have been abandoned. This recommendation was filed on February 23, 1972.

Discussion

The record is clear that pursuant to the labor agreements of September 1, 1971, and of December 13, 1971, the carriers have experienced increases in costs applicable to the transportation services which they provide under the zone rates. The record is also clear that the present rates contain no provision for said cost increases, and that increases in the zone rates should be effected if the carriers are to be compensated for their increases in costs.

The rates in MRT 17 were established pursuant to purposes of the Highway Carriers' Act, set forth in Section 3502 thereof, that adequate and dependable service for the public by necessary transportation agencies be maintained. As minimum rates, the rates in MRT 17 have been developed on the lowest costs of the transportation services subject thereto when performed in reasonably efficient circumstances. In view of the purposes and bases of the rates in MRT 17, it is evident that the maintenance of the services involved for the continued benefit of the public requires that increases in the rates be made towards offsetting the increases in costs.

However, other considerations which also must be taken into account are objectives and requirements of the Federal Economic Stabilization Act of 1970 and amendments thereto. In conformity with regulations of the Federal Price Commission in its operations under said Act, the increases in rates should be limited to those which would compensate for the cost increases without any increase

in the dollar amounts of the carriers' profits. In addition, those increases in rates which are based on increases in labor costs contracted for after November 8, 1971, should not contain provision for increases in labor costs in excess of 5½ percent. Accordingly, we are of the opinion that the increases which should be prescribed in the rates for rock, sand, gravel and slag are those which would average about 10½ percent. The increases in the rates for decomposed granite must be limited to those which would average about 3 percent.

The level of the present zone rates which are in issue herein was established by Decision No. 77522, dated July 21, 1970, in Case No. 5437. The formulae which were used in the development of said rates are set forth in Appendix A to said decision, and are incorporated herein by reference. The formulae to be used in the specific revision of the rates to incorporate rate increases as stated above are set forth in Appendix A hereof.

The staff recommendations concerning the cancellation of zone rates from certain production areas should be adopted. It appears that the production of rock products at these production areas has been terminated, and that no useful purpose would be served by the continuation of zone rates in MRT 17 for these production areas. Said production areas are those identified as Los Angeles County Production Areas 19-E and 19-L, Orange County Production Areas 30-F and 30-M and Riverside County Production Area 33-G.^{1/}

^{1/} The staff recommendations with respect to Riverside County Production Area 33-G do not apply to zone rates for asphaltic concrete. It appears that the production of this commodity at said production area is continuing. Accordingly the references hereinafter to the cancellation of the rates from Production Area 33-G do not include the zone rates for asphaltic concrete.

Findings

Upon consideration of the record we find that:

1. Since the development of the cost data upon which the present zone rates in MRT 17 for the transportation of rock, sand, gravel, slag and decomposed granite from production areas in Los Angeles, Orange, Riverside, San Bernardino and Ventura Counties were established, the costs of providing the transportation subject to said zone rates have been increased by increases in the costs of labor which the carriers have experienced pursuant to labor agreements of September 1, 1971, and of December 13, 1971, and which are identifiable as those increases listed in said agreements with 1971 effective dates.

2. Increases averaging about 10½ percent in the zone rates for rock, sand, gravel and slag and about 3 percent in the zone rates for decomposed granite:

- a. Are cost justified and not reflective of future inflationary expectations;
- b. Are not more than those sufficient to return to the carriers increases in operating costs which the carriers have experienced and which are not reflected in the present minimum rates;
- c. Will not result in an increase in the level of earnings which this Commission has heretofore determined to be the minimum level of earnings required to maintain adequate and safe transportation for the public by the carriers involved;
- d. Will not increase the carriers' over-all rate of return on capital over that earned in 1970;
- e. Do not reflect labor costs in excess of those allowed by policies of the Federal Price Commission.

3. The evidence does not show that there are carriers available who are willing and capable of providing service at the existing rates.

4. The rate increases which are specified in paragraph 2 above are required to assure continued, adequate and safe service by dump truck carriers subject to the provisions of MRT 17.

5. The dollar amount of increased revenues which the increased rates are expected to produce over a year's period is \$1,796,000.

6. Increases in the rates in MRT 17 in accordance with the formulae set forth in Appendix A hereof will result in the increases found justified in paragraph 2 above.

7. The production of rock products and related materials at Los Angeles County Production Areas 19-E and 19-L, Orange County Production Areas 30-F and 30-M and Riverside County Production Area 33-G (with the exception of asphaltic concrete as referred to in footnote 1, above) has been terminated. The cancellation of the zone rates (also area-to-point rates) which are set forth in MRT 17 to apply from said production areas is justified.

Conclusions

We conclude that:

1. The zone rates in MRT 17 to which reference is made in paragraph 1 of the findings above should be increased to the extent specified, and pursuant to the formulae specified, in paragraphs 2 and 6, respectively, of said findings.

2. Zone rates and related provisions which are set forth in MRT 17 for transportation from Los Angeles County Production Areas 19-E and 19-L, Orange County Production Areas 30-F and 30-M and Riverside County Production Area 33-G should be canceled.

3. In view of the extensive revisions to be made in Minimum Rate Tariff 17 pursuant to the findings herein, including the cancellation of various zone rates, it appears desirable to reissue completely the tariff at this time. We, therefore, conclude that the rates, charges, accessorial charges and rules set forth in Minimum Rate Tariff 17-A, which is designated as Appendix C of the order herein, are and will be for the future just, reasonable and nondiscriminatory minimum rates, charges and accessorial charges to be assessed, charged and collected, and just, reasonable and nondiscriminatory rules to be observed in applying such rates, charges and accessorial charges, by any and all radial highway common carriers, highway contract carriers and dump truck carriers for transportation and other services, including accessorial services rendered incident thereto, for which rates, charges, accessorial charges and rules are provided in said Minimum Rate Tariff 17-A.

4. Any and all radial highway common carriers, highway contract carriers and dump truck carriers should be required to assess, charge and collect, for the transportation and other services, including accessorial services, to which said Minimum Rate Tariff 17-A is applicable, rates, charges and accessorial charges no lower in volume or effect than those set forth or referred to in said tariff, and to observe rules no lower in volume or effect than those set forth or referred to therein.

5. Minimum Rate Tariff 7 should be amended to reflect the correct references to the new tariff.

O R D E R

IT IS ORDERED that:

1. The rates and rules set forth in Minimum Rate Tariff 17-A, which is designated as Appendix C of the order herein and by this reference is incorporated in and made a part of this order, are hereby established and approved, effective November 15, 1972, as the just, reasonable and nondiscriminatory minimum rates, charges and accessorial charges to be assessed, charged and collected and the rules and regulations to be observed by any and all radial highway common carriers, highway contract carriers and dump truck carriers for the transportation and other services, including accessorial services rendered incident thereto, for which rates, charges and rules are provided in said Minimum Rate Tariff 17-A.

2. All radial highway common carriers, highway contract carriers and dump truck carriers are hereby ordered and directed to cease and desist on November 15, 1972, and thereafter abstain from assessing, charging or collecting rates, charges or accessorial charges lower in volume or effect than those set forth or referred to in said Minimum Rate Tariff 17-A and from observing rules lower in volume or effect than those set forth therein.

3. Minimum Rate Tariff 7 (Appendix A of Decision No. 32566, as amended) is further amended by incorporating therein, to become effective November 15, 1972, the revised pages attached hereto and listed in Appendix B, also attached hereto, which pages and appendix by this reference are made a part hereof.

4. Common carriers are authorized to depart from the provisions of Article XII, Section 21, of the Constitution of the State of California to the extent necessary to assess or otherwise to apply the minimum rates which are established pursuant to this order.

The effective date of this order shall be twenty-four days after the date hereof.

	ALTERNATIVE APPLICATION OF COMMON CARRIER RATES SECTION 17-1-7A Common carrier rates may be applied in lieu of the rates provided in this tariff, when such common carrier rates produce a lower aggregate charge for the same transportation, from the same point of origin to the same point of destination, than results from the application of the rates herein provided. For charges for loading and unloading, see Note 1, Item 220. (See Notes) NOTE 1.--When a rail carload rate is subject to varying minimum weights, dependent upon the size of the car ordered or used, the lowest minimum weight obtainable under such minimum weight provisions may be used in applying the basis provided in this item. When the rail carload weight is subject to a specified minimum weight, subject to the condition that, if the car is loaded to full visible or weight-carrying capacity, actual weight will apply, for actual weight but not less than a lesser carload minimum weight, the actual weight will apply subject to the lesser carload minimum weight, if any. NOTE 2.--In applying the provisions of this item, a rate no lower than the common carrier rate and a weight no lower than the actual weight or published minimum weight (whichever is the higher) applicable in connection with the common carrier rate shall be used. NOTE 3.--When rail switching charges are applicable in connection with line-haul movements by rail and the gross weight of the shipment exceeds the applicable carload minimum weight, only one rail switching charge shall be assessed.	200
	NOTE 4.--In the event the common carrier rate which is used for the transportation of a rate for highway transportation does not include loading and unloading charges, and in the event that said charges are provided in a separate tariff in connection with the transportation involved, the following charges shall be added to the common carrier rate: For loading & unloading charges per carload: NOTE 5.--When the rail carload rate is subject to varying minimum weights, dependent upon the size of the car ordered or used, the lowest minimum weight obtainable under such minimum weight provisions may be used in applying the basis provided in this item. SECTION 1--RULES (CONTINUED)	ITEM
ALTERNATIVE APPLICATION OF COMBINATIONS WITH COMMON CARRIER RATES When lower aggregate charges result, rates provided in this tariff may be used in combination with common carrier rates for the same transportation as follows: (a) When point of origin is located beyond railhead and point of destination is located at railhead, add to the common carrier rate applying from any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, to point of destination the rate provided in this tariff, applicable to the weight of entire shipment, from point of origin to any such team track or private railhead from which the common carrier rate used applies. (See Notes 1, 2 and 3) (b) When point of origin is located at railhead and point of destination is located beyond railhead, add to the common carrier rate applying from point of origin to any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, 5 cents per ton per mile for each mile or fraction thereof traversed from any such team track or private railhead to which the common carrier rate used applies to point of destination. (See Notes 1, 2 and 3) (c) When both point of origin and point of destination are located beyond railhead, add to the common carrier rate applying between any railheads (A) the rate provided in this tariff, applicable to the weight of the entire shipment, from point of origin to any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, from which the common carrier rate used applies, and (B) 5 cents per ton per mile for each mile or fraction thereof traversed from any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, to which the common carrier rate used applies to point of destination. (See Notes 1, 2 and 3) NOTE 1.—In the event the common carrier rate which is used for the construction of a rate for highway transportation does not include loading and/or unloading services, and in the event that said services are provided by a highway carrier in connection with the transportation involved, the following charges shall be added to the common carrier rate: For loading 9 cents per ton; for unloading 9 cents per ton. NOTE 2.—When the rail carload rate is subject to varying minimum weights, dependent upon the size of the car ordered or used, the lowest minimum weight obtainable under such minimum weight provisions may be used in applying the basis provided in this item. NOTE 3.—In applying the provisions of this item, a rate no lower than the common carrier rate and a weight no lower than the actual weight or published minimum weight (whichever is the higher) applicable in connection with the common carrier rate shall be used.	220

(See Exception) (d) Freight bills for all transportation and accessorial charges shall be presented to the debtors within 4 days after the last calendar day of the month in which transportation was performed. (See Exception) (e) Debtors may elect to have their freight bills presented by means of the United States mail, and when the mail service is so used the time of mailing by the carrier, as evidenced by the postmark, shall be deemed to be the time of presentation of the freight bills. (See Exception) (f) The mailing by the debtor of valid checks, drafts, or money orders, which are satisfactory to the carrier, in payment of freight charges within the credit period allowed such debtor may be deemed to be the collection of the charges within the credit period for the purpose of these rules. In case of dispute as to the time of mailing, the postmark shall be accepted as showing such time. (g) This item not applicable to charges for transportation performed for the United States, state, county or municipal governments.
