OPINION AND ORDER

Minimum Rate Tariff 17-A (MRT 17-A) names minimum rates for the transportation by dump truck carriers of property including rock, sand, and gravel. These rates include zone rates which apply from defined production areas to designated delivery zones, which are described in Southern California Production Area and Delivery Zone Directory 1 (Directory 1). By these petitions California Dump Truck Owners Association seeks establishment of two new production areas in San Diego County, and new minimum zone rates therefrom to delivery zones in San Diego County.

Petition No. 246 states that C. R. Stevens, an individual doing business as C. R. Stevens Trucking, Route 1, Box 844, Escondido, subleases property in the vicinity of the upper end of Lake Hodges from Consolidated Rock Company. The proposed production area in Petition No. 246 is described, as follows:

"All points northerly of Highland Valley Road and within a one mile radius of the intersection of said Highland Valley Road and an unnamed road leading southerly from Highland Valley Road approximately 2½ miles easterly of Pomerado Road. This area is in the vicinity of the upper end of Lake Hodges."

Petition No. 250 states that Consolidated Rock Company leases property in the vicinity of Willow Glen and Dehesa Road in San Diego County. The proposed production area in Petition No. 250 is described, as follows:

"All points southerly of Dehesa Rd. and private road leading to the Consolidated Rock Company production plant approximately 1.2 miles east of the intersection of Willow Glen and Dehesa Rd. in San Diego County."

According to the petitions, C. R. Stevens and Consolidated Rock Company produce several thousand tons of sand per month from each of the above-described areas and transport it to various locations in San Diego County in their own dump trucks and in for-hire dump trucks. At present the transportation of shipments of sand from points in the proposed production areas by dump truck carriers is subject to hourly rates in Minimum Rate Tariff 7. Petitioner states that hourly rates result in variable amounts per ton even between the same points because of varying capacities and performance of five-axle units of equipment. It is explained that sales are on a fixed price per ton basis, and that hourly rates make quotations for sales purposes difficult because of the variations in transportation costs. Minimum rates which apply for the transportation of rock, sand, and gravel by for-hire dump truck carriers from most commercial rock products plants in San Diego County are zone rates which are set forth in MRT 17-A. Petitioner requests establishment of zone rates from the proposed production areas on the same bases as zone rates from other San Diego County production areas to eliminate possible discrimination with respect to competing sources of the same commodity now subject to zone rates.

The petitions set forth tie-in times and mileages which were run in five-axle trucks from the proposed production areas to the existing traverse network. The petitions also include sections of the basic traverse maps of the respective areas showing the

existing adjacent delivery zones and nodes. Petitioner requests that new nodes, times, and distances be adopted for use in tying the new production areas into the traverse network. Petitioner stated that it does not have the facilities to recommend node numbers or to run new zone rates which assertedly are procedural matters involving computer work normally performed by the Commission staff.

Revised traverse map sections were prepared by the Commission's Transportation Division to show the necessary nodes, round trip times, and one-way distances between the proposed production areas, and the existing traverse network. They are attached hereto in Appendix A. Utilizing these data, cost figures have been calculated and corresponding rates developed in accordance with the established formulae. The times, distances, costs, and resulting zone rates are included in the respective files in these petitions as Exhibits Nos. 246-1 and 250-1.

Petitioner explains that it was directed to file these petitions by its San Diego chapter. It states that Petition No. 246 was supported by C. R. Stevens and Consolidated Rock Company, and that the San Diego County Rock Producers Association has no objection to it. Petitioner states that Petition No. 250 was supported by Consolidated Rock Company and the San Diego County Rock Producers Association. Petitioner believes that these are noncontroversial matters and requests ex parte disposition.

Copies of verified Petitions Nos. 246 and 250 were served on known organizations and other interested parties on or about April 19 and June 26, 1973, respectively. Petitions Nos. 246 and 250 were listed on the Commission's Daily Calendars of April 24 and June 29, 1973, respectively. No objection to the granting of the petitions has been received.

It is clear that the establishment of the zone rates which are sought by petitioner would produce rates for the transportation of shipments from the proposed production areas which are the same, in kind and character, as the zone rates in MRT 17-A which apply from other production areas to delivery zones in San Diego County. In the circumstances the Commission finds that designations of the properties involved as production areas and the establishment of zone rates therefrom as hereinafter provided will result in just, reasonable, and nondiscriminatory minimum rates for the transportation to which said rates would apply. The two production areas (modified to reflect certain corrections in boundary descriptions) and zone rates therefrom should be established. The petitions should be granted. A public hearing thereon is not necessary.

IT IS ORDERED that:

(1) Directory 1 (Appendix A of Decision No. 69469, as amended) is further amended by incorporating therein, to become effective November 24, 1973, First Revised Page 252.3 and First Revised Page 252.4, attached hereto and by this reference made a part hereof.

(2) Minimum Rate Tariff 17-A (Appendix C of Decision No. 80578, as amended) is further amended by incorporating therein to become effective November 24, 1973, First Revised Page 8-PP, Original Page 8-QQ, First Revised Page 8-R, and Original Page 8-RR, attached hereto and by this reference made a part hereof.

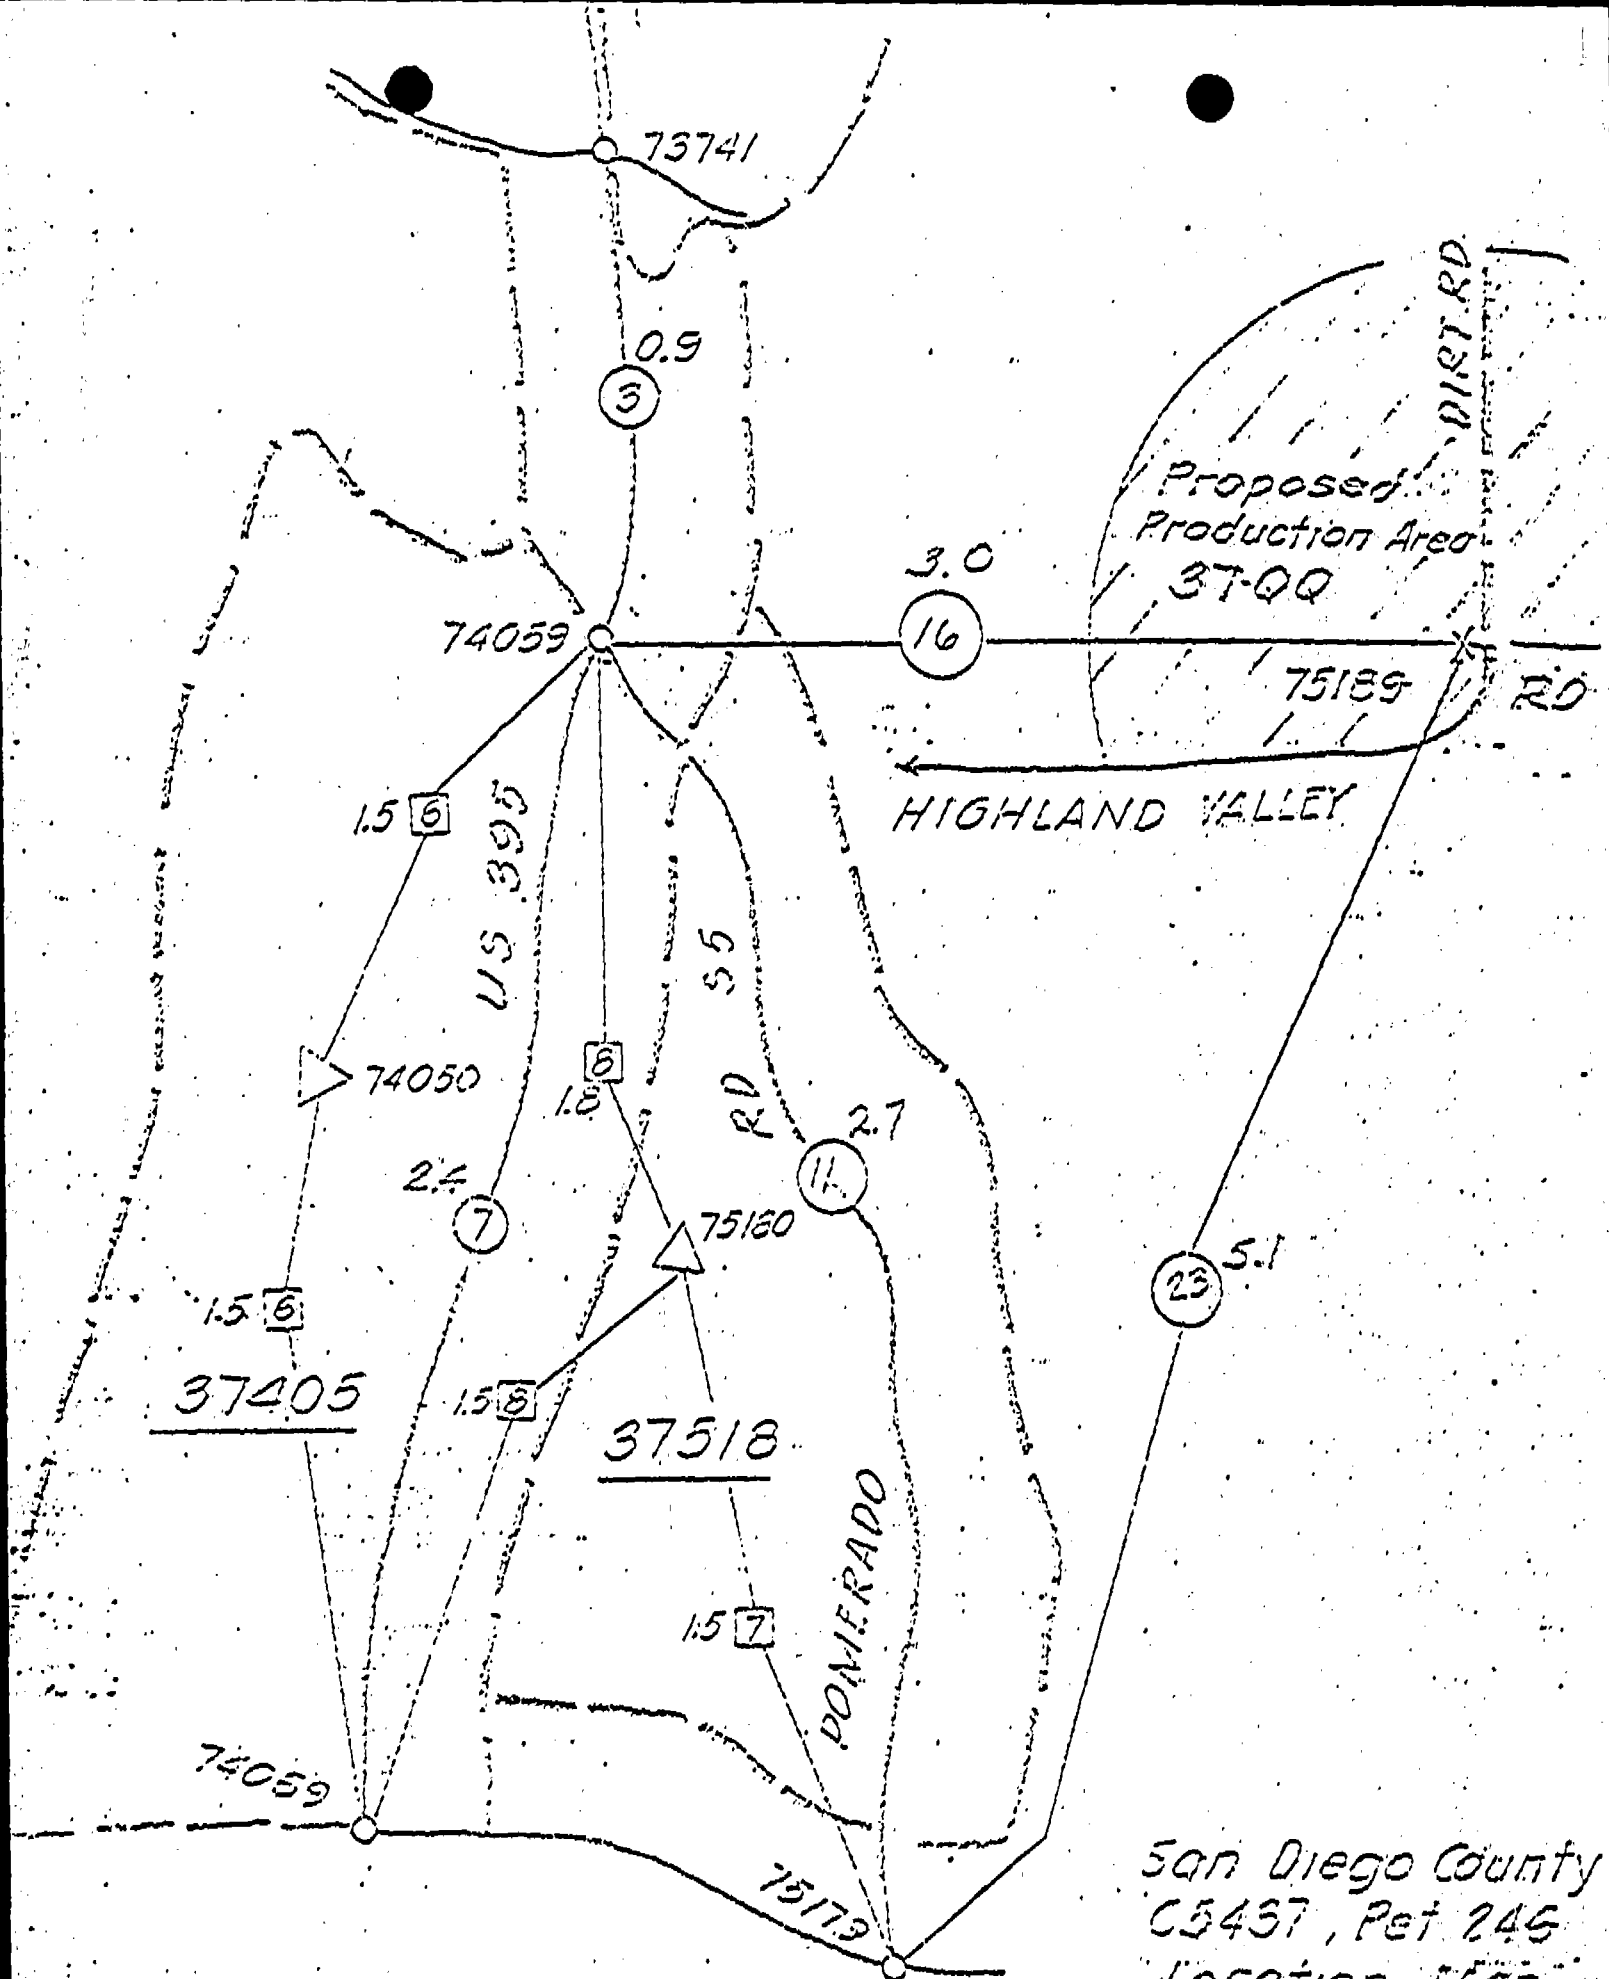

C. 5437, Pet. 246, et al. af \*

(3) In all other respects Decisions Nos. 69469 and 80578, as amended, shall remain in full force and effect.

The effective date of this order shall be twenty days after the date hereof.
