BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application of)
DITTO FREIGHT LINES, a California)
corporation, to acquire a certifi-)
cate of public convenience and)
necessity from DANIEL GALLAGHER)
TEAMING, MERCANTILE AND REALTY)
COMPANY and to issue securities.)

Application No. 54396
(Filed October 23, 1973)

O P I N I O N

Daniel Gallagher Teaming, Mercantile and Realty Company, a corporation, requests authority to sell and transfer, and Ditto Freight Lines, a newly formed California corporation, requests authority to purchase and acquire, a certificate of public convenience and necessity authorizing operations as a highway common carrier. Applicant purchaser also requests authority to issue a promissory note in the amount of \$57,000, to issue 3,000 shares of its \$10 par value capital stock for cash, and to execute a security agreement on the operating authority.

The certificate was granted by Decision No. 62485 dated August 29, 1961 in Application No. 43052, as amended by Decision No. 63296 dated February 20, 1962 in Application No. 43052, and authorizes the transportation of general commodities between points within the San Francisco Territory and between points in an area from Sacramento, on the north, to Monterey, Salinas, and Merced, on the south. The certificate also authorizes the transportation of specified commodities between San Francisco and Santa Rosa and between Merced and Bakersfield. Corresponding interstate rights are also included within the proposed transfer. The agreed consideration for the intrastate and interstate rights as well as the goodwill of applicant seller is \$80,000. According to the terms of the sales agreement the consideration is to be paid as follows: \$23,000 in cash and the balance in

the form of a promissory note in the amount of \$57,000, which is to be paid in quarterly installments of \$7,125 with interest at the rate of 9 percent per annum.

David L. Ditto, president of applicant purchaser, both as an individual and as a corporate officer, is presently engaged in the transportation of property as a permitted carrier. It is alleged that the business has expanded and developed to the point where a substantial part thereof should be conducted as a highway common carrier; that equipment will be leased from David L. Ditto; and that personnel will be transferred to applicant purchaser from David L. Ditto.

Applicant purchaser proposes to issue 1,500 shares of its capital stock to David L. Ditto for \$15,000 and 1,500 shares to George A. Raney for \$15,000.

Copies of the application were served upon carriers serving within the area covered by the certificate and upon the California Trucking Association. No protest has been received.

After consideration the Commission finds that the proposed transfer would not be adverse to the public interest and concludes that it should be authorized. We further find with reasonable certainty that the project involved in this proceeding will not have a significant effect upon the environment. A public hearing is not necessary. The order which follows will provide for, in the event the transfer is completed, the revocation of the certificate presently held by Daniel Gallagher Teaming, Mercantile and Realty Company, a corporation, and the issuance of a certificate in appendix form to Ditto Freight Lines, a corporation. The certificate will be restated but this will not broaden the rights to be transferred.

We further find that the proposed issuance of stock and a promissory note are for proper purposes and that the money, property, or labor to be procured or paid for by the issue of the securities authorized by this decision are reasonably required for the purposes

specified, which purposes are not in whole or in part reasonably chargeable to operating expenses or to income.

The authorization granted shall not be construed as a finding of the value of the rights authorized to be transferred, nor of the stock of applicant purchaser.

In the event the transfer is consummated, David L. Ditto is placed on notice that any common carrier transportation within the scope of the highway common carrier certificate, performed by him, may be deemed to have been performed by Ditto Freight Lines, a corporation, subject to its tariffs and to the statutes and regulations governing highway common carriers.

Ditto Freight Lines is placed on notice that operative rights, as such, do not constitute a class of property which may be capitalized or used as an element of value in rate fixing for any amount of money in excess of that originally paid to the State as the consideration for the grant of such rights. Aside from their purely permissive aspect, such rights extend to the holder a full or partial monopoly of a class of business. This monopoly feature may be modified or canceled at any time by the State, which is not in any respect limited as to the number of rights which may be given.

O R D E R

IT IS ORDERED that:

1. On or before August 1, 1974, Daniel Gallagher Teaming, Mercantile and Realty Company may sell and transfer the operative rights referred to in the application to Ditto Freight Lines.
2. Within thirty days after the transfer the purchaser shall file with the Commission written acceptance of the certificate and a true copy of the bill of sale or other instrument of transfer.
3. Purchaser shall amend or reissue the tariffs on file with the Commission, naming rates and rules governing the common carrier operations transferred to show that it has adopted or established, as its own, the rates and rules. The tariff filings shall be made

effective not earlier than five days after the effective date of this order on not less than five days' notice to the Commission and the public, and the effective date of the tariff filings shall be concurrent with the transfer. The tariff filings made pursuant to this order shall comply in all respects with the regulations governing the construction and filing of tariffs set forth in the Commission's General Order No. 80-Series. Failure to comply with the provisions of General Order No. 80-Series may result in a cancellation of the operating authority granted by this decision.

4. On or before the end of the third month after the transfer the purchaser shall cause to be filed with the Commission, in such form as the Commission may prescribe, an annual report, or reports, related to the operations of the seller for the period commencing with the first day of the current year to and including the effective date of the transfer.

5. In the event the transfer authorized in paragraph 1 is completed, effective concurrently with the effective date of the tariff filings required by paragraph 3, a certificate of public convenience and necessity is granted to Ditto Freight Lines, a corporation, authorizing it to operate as a highway common carrier, as defined in Section 213 of the Public Utilities Code, between the points and over the routes set forth in Appendix A, attached hereto and made a part hereof.

6. The certificate of public convenience and necessity granted by Decision No. 62485 dated August 29, 1961 in Application No. 43052, as amended by Decision No. 63296 dated February 20, 1962 in Application No. 43052, is revoked effective concurrently with the effective date of the tariff filings required by paragraph 3.

7. Purchaser shall comply with the safety rules of the California Highway Patrol and the insurance requirements of the Commission's General Order No. 100-Series.

8. Purchaser shall maintain its accounting records on a calendar year basis in conformance with the applicable Uniform System of Accounts or Chart of Accounts as prescribed or adopted by this Commission and shall file with the Commission, on or before March 31 of each year, an annual report of its operations in such form, content, and number of copies as the Commission, from time to time, shall prescribe.

9. Purchaser shall comply with the requirements of the Commission's General Order No. 84-Series for the transportation of collect on delivery shipments. If purchaser elects not to transport collect on delivery shipments, it shall make the appropriate tariff filings as required by the General Order.

10. After the effective date hereof purchaser may issue 3,000 shares of its \$10 par value capital stock for the purposes specified in the application and may execute the security agreement as set forth in Appendix C attached to the application.

11. After the effective date hereof purchaser may execute a promissory note in an amount not to exceed \$57,000 for the purposes specified in the application.

12. Ditto Freight Lines, as the issuer of the stock and executor of the promissory note authorized by this order, shall file with the Commission a report, or reports, as required by General Order No. 24-Series.

The authority granted by this order to issue stock and a note will become effective when the issuer has paid the fees prescribed by Sections 1904.1 and 1904(b) of the Public Utilities Code, which fees are \$60 and \$114, respectively. In other respects the effective date of this order shall be twenty days after the date hereof.

Dated at San Francisco, California, this 07th day of DECEMBER, 1973.

Pipe, iron or steel, nickel plated, or nickel plated on
inside, with or without fittings;
Pipe, iron or steel, plate or sheet, wood lined;
Pipe, iron or steel, rubber or synthetic rubber lined.
Pipe, iron or steel, tin lined, noibn;
Pipe, lead, plain or wire covered;
Pipe, noibn, wrought iron, enameled;
Pipe, stove, block tin, chrome plated;
Pipe, stove, sheet iron, steel or tin plate;
Pipe, sub-irrigation, iron or steel, not exceeding 7/8
inch in diameter;
Pipe, surface irrigation, steel, 24 gauge or heavier, not
over 12 inches in diameter;
Pipe Coils, noibn, aluminum, brass, bronze or copper;
Pipe Coils, noibn, iron or steel;
Pipe Coils, noibn, lead;
Pipe Fittings, aluminum with or without covering or lining
of brass, copper or steel, nobin;
Pipe Fittings, metallic magnesium or magnesium alloy;
Pipe Fittings, noibn, brass, bronze or copper, not plated,
also fittings, lead covered or lead or tin lined;
Pipe Fittings, noibn, cupro-nickel or nickel copper, plated
or not plated;
Pipe Fittings, nobin, iron or steel, with or without metal
seats, not plated; also expansion joints, iron or
steel, or with iron or steel body; also pipe fittings,
noibn, having brass cleanout plugs;
Pipe Fittings, noibn, iron or steel, combined with brass,
bronze or copper, not plated; also expansion joints,
iron or steel, or with iron or steel body;
Pipe Fittings, noibn, iron or steel, lead covered or lead
lined, not plated;
