Decision No. 82348

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Investigation into the rates, rules, regulations, charges, allowances and practices of all common carriers, highway carriers and city carriers relating to the transportation of sand, rock, gravel and related items (commodities for which rates are provided in Minimum Rate Tariff No. 7).

Case No. 5437  
Petition for Modification No. 257  
(Filed November 19, 1973)

OPINION AND ORDER

By this petition, as amended, California Dump Truck Owners Association seeks revisions of various round-trip delivery times in Items 269 and 295-1 of Minimum Rate Tariff 7,<sup>1</sup> which are used to determine the applicable dump truck rates on sand, rock, gravel and related articles; also on asphaltic concrete and cold road oil mixture from Antelope Valley Production Area A to various Antelope Valley delivery zones.

According to the petition, Edwards Air Force Base on February 1, 1974, will impose a 5 ton per axle load limit restriction on through commercial truck traffic.

Attached to the petition as Exhibit A is a letter of October 27, 1973, from the Base Commander of Edwards Air Force

---

<sup>1</sup> The round trip delivery times will be set forth in Items 500 and 520 of Minimum Rate Tariff 7-A effective January 19, 1974.

Base which sets forth the above regulation to become effective February 1, 1974.

Round-trip delivery times between Antelope Valley Production Area A and various Antelope Valley delivery zones were established in Items 269 and 295-1 of the tariff by Decision No. 61051 in Case No. 5437 (Petition for Modification No. 58). They were premised on traverse data developed from Exhibits 58-4 and 58-5 in the above proceeding. Rates to the Antelope Valley delivery zones are determined by these delivery times and are contained in Items 262 and 295 of the tariff.

As a result of the load limitation on Edwards Air Force Base certain deliveries, by dump truck carriers, to delivery zones along State Highway 58 (U.S. 466) must be routed through Mojave and most of the delivery times will be substantially increased. These differentials have been computed and are as follows:

Round-Trip  
Delivery Times  
In Minutes

Antelope Valley Delivery Zone No.	MRT 7 Item 269 or MRT 7-A Item 520	MRT 7 Item 295-1 or MRT 7-A Item 500	Proposed Round-Trip Delivery Times In Minutes
15-023	182	192	193
15-024	178	188	203
15-025	167	177	213
15-026	166	176	223
15-027	173	183	230
15-028	181	191	238
15-029	189	199	246
15-030	197	207	254

The proposed round-trip delivery times have been developed from Exhibits 58-4 and 58-5. The dump trucks carry loads in excess of five tons per axle and the freight costs are predicated on such loads.

Petitioner believes that this is a noncontroversial matter and requests ex parte disposition.

Copies of the petition were mailed to various associations, shippers, carrier representatives and other interested parties on or about November 15, 1973. The petition was listed on the Commission's Daily Calendar of November 19, 1973. No objection to the granting of the petition has been received.

In the circumstances, the Commission finds that petitioner's proposal is reasonable and the resulting zone rates will be just, reasonable, and nondiscriminatory minimum rates for the transportation involved and, to the extent that said round-trip delivery times may result in increases, such increases are justified. A public hearing is not necessary. The Commission concludes that the petition should be granted.

IT IS ORDERED that:

1. Minimum Rate Tariff 7-A (Appendix B to Decision No. 82061, as amended) is further amended by incorporating therein to become effective February 1, 1974, First Revised Page 86; First Revised Page 87; First Revised Page 88 and First Revised Page 89 attached hereto and by this reference made a part hereof.

2. Common carriers subject to the Public Utilities Act, to the extent that they are subject to Decision No. 82061, as amended, are hereby directed to establish in their tariffs the increases necessary to conform with the further adjustments ordered herein.

3. Tariff publications required or authorized to be made by common carriers as a result of the order herein shall be filed not earlier than the effective date of this order and shall be made effective not earlier than February 1, 1974, on not less than one day's notice to the Commission and to the public; such tariff publications as are required shall be made effective not later

than February 1, 1974; and as to tariff publications which are authorized but not required, the authority shall expire unless exercised within sixty days after the effective date of this order.

4. Common carriers, in establishing and maintaining the amendments authorized hereinabove, are hereby authorized to depart from the provisions of Section 460 of the Public Utilities Code to the extent necessary to adjust long- and short-haul departures now maintained under outstanding authorizations, such outstanding authorizations are hereby modified only to the extent necessary to comply with this order, and schedules containing the amendments published under this authority shall make reference to the prior orders authorizing long- and short-haul departures and to this order.

5. In all other respects Decision No. 82061, as amended, shall remain in full force and effect.

This order shall become effective January 28, 1974.

Dated at San Francisco, California, this 15<sup>th</sup> day of January, 1974.
