Decision No. 83335

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Investigation )  
into the rates, rules, regulations, )  
charges, allowances and practices of )  
all common carriers, highway carriers )  
and dump truck carriers relating to )  
the transportation of sand, rock, )  
gravel and related items (commodities )  
for which rates are provided in )  
Minimum Rate Tariffs Nos. 7-A and )  
17-A).

Case No. 5437  
Petition No. 274  
(Filed May 24, 1974)

OPINION AND ORDER

Minimum Rate Tariff 17-A (MRT 17-A) names minimum zone rates and rules for transportation by dump truck carriers of property including rock, sand, gravel, and related commodities, as described in Item 60. The zone rates apply from defined production areas to designated delivery zones, which are described in Southern California Production Area and Delivery Zone Directory I (Directory I).

By this petition Conrock Co., a Delaware corporation, seeks publication of additional zone rates for Item 60 commodities from San Bernardino County Production Areas 36-A and 36-E. At present zone rates are published from those production areas to certain delivery zones in San Bernardino and Riverside counties. Petitioner seeks extension of the zone rates to include all delivery zones in Los Angeles, Orange, Riverside, and San Bernardino counties.

Petitioner is engaged in the production of rock, sand, and gravel at several locations in southern California, including Production Areas 36-A and 36-E. It asserts that its marketing area has expanded since the subject zone rates were established, and

that the marketing area continues to expand and is expected to expand in the future.

Petitioner states that when deliveries are made to zones for which no specific zone rates are published it applies the additive of five cents per ton mile in Item 320 of MRT 17-A from the last rated zone through which the shipment passes en route to destination. It is asserted that charges computed in this manner for numerous individual shipments to many separate points within nonrated delivery zones is inconvenient, time consuming, expensive, and unsatisfactory. Petitioner states that when it is asked to quote a delivered price for a single shipment to a construction site within a nonrated delivery zone no accurate delivery price can be quoted with certainty without first making an actual physical traverse of the distance beyond the last rated zone in order to determine the ton-mile additive provided by Item 320. Even if physical traverse was not made for bidding purposes prior to actual transportation of shipment, petitioner explained that a traverse would be necessary after transportation services are performed in order to audit the carrier's freight bill. The cost incurred by petitioner in making such actual traverses for bidding and auditing purposes assertedly becomes prohibitive on small shipments to widely scattered and distant points. Petitioner feels that establishment of zone rates for Production Areas 36-A and 36-E to all delivery zones in the four counties will eliminate the need for it to incur costs associated with conducting physical traverses and will enable it to better serve its customers in the marketing of its products.

Petitioner asserts that the petition is noncontroversial in character and may be disposed of properly by ex parte procedure. A copy of the petition was served upon known carrier and shipper organizations on or about May 24, 1974. The petition was listed on the Commission's Daily Calendar of May 30, 1974. There are

no protests. By letter dated June 7, 1974, California Dump Truck Owners Association supports the petition and joins in the request for ex parte handling. The Transportation Division also recommends that the petition be granted.

The times, distances, costs, and resulting zone rates have been prepared by the Transportation Division based upon the established formula and procedures. The computer printouts of those data are included in the file in this petition as Exhibit 274-1.

It is clear that extension of the existing system of zone rates from Production Areas 36-A and 36-E to include all delivery zones in Los Angeles, Orange, Riverside, and San Bernardino counties is justified. The zone rates sought in the petition should be established. The petition should be granted. A public hearing is not necessary.

IT IS ORDERED that:

1. Minimum Rate Tariff 17-A (Appendix C to Decision No. 80578, as amended) is hereby further amended by incorporating therein, to become effective September 1, 1974, the revised pages in Appendix A attached hereto, and by this reference made a part hereof.

2. Common carriers subject to the Public Utilities Act, to the extent that they are subject to Decision No. 80578, as amended, are directed to establish in their tariffs the amendments necessary to conform with the further adjustments ordered herein.

3. Tariff publications required to be made by common carriers as a result of this order shall be filed not earlier than the effective date of this order and may be made effective not earlier than the tenth day after the effective date of this order on not less than ten days' notice to the Commission and to the public and shall be made effective not later than September 1, 1974.

4. Common carriers, in establishing and maintaining the amendments authorized hereinabove, are hereby authorized to depart from the provisions of Section 460 of the Public Utilities Code to the extent necessary to adjust long- and short-haul departures now maintained under outstanding authorizations; such outstanding authorizations are hereby modified only to the extent necessary to comply with this order; and schedules containing the amendments published under this authority shall make reference to the prior orders authorizing long- and short-haul departures and to this order.

5. In all other respects Decision No. 80578, as amended, shall remain in full force and effect.

The effective date of this order is the date hereof.

Dated at San Francisco, California, this 20<sup>th</sup>  
day of AUGUST, 1974.
