

Decision No. 84073

ORIGINAL

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application
of JAMES P. STEWART, an individual,
doing business as JIM'S
TRANSPORTATION, for a certificate
of public convenience and necessity
authorizing the transportation of
general commodities between points
within San Francisco Territory.

Application No. 55329
(Filed November 20, 1974)

O P I N I O N

James P. Stewart, doing business as Jim's Transportation, requests authority to operate as a highway common carrier for the transportation of general commodities, with certain exceptions, between points in the San Francisco Territory. Applicant also requests corresponding interstate authority. Copies of the application were served upon 74 existing carriers with which the proposed service might compete, and an appropriate notice was published in the Federal Register on December 11, 1974. No protest has been received.

Applicant is presently operating as a permitted carrier. His main place of business is located in San Bruno. Applicant operates 18 units of equipment and as of September 30, 1974 indicated a net worth in the amount of \$28,940.

Applicant proposes a daily service Monday through Friday with on-call service available on Saturdays, Sundays, and holidays. The proposed rates would be comparable to those set forth in Minimum Rate Tariff 2.

It is alleged that applicant has been engaged in the for-hire transportation by motor carrier in the San Francisco Territory since 1962 as a permitted carrier; that over the years applicant's operations have continuously grown; that as a result of the increased traffic and the number of shippers being served, additional units of equipment have been acquired; that the frequency of service and operations within the proposed area have experienced a consistent growth; that because of the change in the character of his service, applicant is concerned as to whether his permitted authorities continue to allow the frequency of operations he is presently experiencing; and that the requested authority will permit applicant to perpetuate his service and thereby meet the requirements of his customers.

After consideration the Commission finds that:

1. Applicant is presently providing service as a permitted carrier within the proposed certificated area.
2. Applicant's permitted operations within the proposed service area have materially grown and developed over the years because of an ever-increasing demand for service by applicant's customers.
3. Applicant possesses the necessary equipment and financial ability to provide the proposed service.
4. Notice of this application appeared in the Federal Register on December 11, 1974.
5. Public convenience and necessity require that applicant be authorized to engage in operations in intrastate commerce as proposed in the application, and also require that applicant be authorized to engage in operations in interstate and foreign commerce within limits which do not exceed the scope of the intrastate operations authorized by the order herein.
6. With reasonable certainty the project involved in this proceeding will not have a significant effect on the environment.

The Commission concludes that the application should be granted as set forth in the ensuing order. The territorial descriptions or routes of the authority granted reflect the names of redesignated highways and roads and do not in any way exceed the geographical scope of the proposed operation as published in the Federal Register. A public hearing is not necessary.

Applicant is placed on notice that operative rights, as such, do not constitute a class of property which may be capitalized or used as an element of value in rate fixing for any amount of money in excess of that originally paid to the State as the consideration for the grant of such rights. Aside from their purely permissive aspect, such rights extend to the holder a full or partial monopoly of a class of business. This monopoly feature may be modified or canceled at any time by the State, which is not in any respect limited as to the number of rights which may be given.

O R D E R

IT IS ORDERED that:

1. A certificate of public convenience and necessity is granted to James P. Stewart, doing business as Jim's Transportation, authorizing him to operate as a highway common carrier, as defined in Section 213 of the Public Utilities Code, between the points set forth in Appendix A, attached hereto and made a part hereof.
2. In providing service pursuant to the authority granted by this order, applicant shall comply with the following service regulations. Failure so to do may result in cancellation of the authority.

- (a) Within thirty days after the effective date of this order, applicant shall file a written acceptance of the certificate granted. Applicant is placed on notice that if he accepts the certificate he will be required, among other things, to comply with the safety rules administered by the California Highway Patrol and the insurance requirements of the Commission's General Order No. 100-Series.
- (b) Within one hundred twenty days after the effective date of this order, applicant shall establish the authorized service and file tariffs, in triplicate, in the Commission's office.
- (c) The tariff filings shall be made effective not earlier than thirty days after the effective date of this order on not less than thirty days' notice to the Commission and the public, and the effective date of the tariff filings shall be concurrent with the establishment of the authorized service.
- (d) The tariff filings made pursuant to this order shall comply with the regulations governing the construction and filing of tariffs set forth in the Commission's General Order No. 80-Series.
- (e) Applicant shall maintain his accounting records on a calendar year basis in conformance with the applicable Uniform System of Accounts or Chart of Accounts as prescribed or adopted by this Commission and shall file with the Commission, on or before March 31 of each year, an annual report of his operations in such form, content, and number of copies as the Commission, from time to time, shall prescribe.

- (f) Applicant shall comply with the requirements of the Commission's General Order No. 84-Series for the transportation of collect on delivery shipments. If applicant elects not to transport collect on delivery shipments he shall make the appropriate tariff filings as required by the General Order.

The effective date of this order shall be twenty days after the date hereof.

Dated at San Francisco, California, this 11th day of FEBRUARY, 1975.
