Decision No. 86027

ORIGINAL

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application of William E. Manning, an individual, doing business as HORNUNG'S TRUCKING SERVICE, for a Certificate of Public Convenience and Necessity authorizing the transportation of General Commodities between points within San Francisco Territory.

Application No. 56140
(Filed December 23, 1975)

O P I N I O N

Applicant Manning now holds a radial highway common carrier permit to transport general commodities statewide. He now applies pursuant to Sections 1063 and 1064 of the Public Utilities Code and Section 206(a)(6) of the Interstate Commerce Act for a certificate of public convenience and necessity for the transportation of general commodities with the usual exceptions in the San Francisco Territory.

Applicant proposes to publish and use MRT 2 rates and those set forth in other applicable tariffs.

Applicant now operates as a radial carrier in said territory; he claims that the needs of his regular customers have grown and that he has acquired numerous new accounts that require daily service. Further, many regular shippers have moved from the city of San Francisco to peninsula or transbay locations. He contends that movements to satisfy those shippers' requirements are increasing in frequency and may cross the difficult-to-define boundary between permitted and common carriage.

The application was properly served. No protests have been received. Notice of the application was published in the Federal Register of January 21, 1976. That publication has not resulted in any protests. A public hearing is not necessary.

Public convenience and necessity require that applicant be authorized to engage in operations in intrastate commerce as proposed in the application and also require that applicant be authorized to engage in operations in interstate and foreign commerce within limits which do not exceed the scope of the intrastate operations authorized by this decision. It can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.

The Commission concludes that the application should be granted as set forth in the ensuing order. The territorial description or routes of the authority granted reflect the names of redesignated highways and roads and do not in any way exceed the geographical scope of the proposed operation as published in the Federal Register.

Applicant is placed on notice that operative rights, as such, do not constitute a class of property which may be capitalized or used as an element of value in rate fixing for any amount of money in excess of that originally paid to the State as the consideration for the grant of such rights. Aside from their purely permissive aspect, such rights extend to the holder a full or partial monopoly of a class of business. This monopoly feature may be modified or canceled at any time by the State, which is not in any respect limited as to the number of rights which may be given.

O R D E R

IT IS ORDERED that:

1. A certificate of public convenience and necessity is granted to William E. Manning, doing business as Hornung's Trucking Service, authorizing him to operate as a highway common carrier, as defined in Section 213 of the Public Utilities Code, between the points set forth in Appendix A of this decision.

2. In providing service pursuant to the authority granted by this order, applicant shall comply with the following service regulations. Failure so to do may result in cancellation of the authority.

- (a) Within thirty days after the effective date of this order, applicant shall file a written acceptance of the certificate granted. Applicant is placed on notice that if he accepts the certificate he will be required, among other things, to comply with the safety rules administered by the California Highway Patrol and the insurance requirements of the Commission's General Order No. 100-Series.
- (b) Within one hundred twenty days after the effective date of this order, applicant shall establish the authorized service and file tariffs, in triplicate, in the Commission's office.
- (c) The tariff filings shall be made effective not earlier than thirty days after the effective date of this order on not less than thirty days' notice to the Commission and the public, and the effective date of the tariff filings shall be concurrent with the establishment of the authorized service.
- (d) The tariff filings made pursuant to this order shall comply with the regulations governing the construction and filing of tariffs set forth in the Commission's General Order No. 80-Series.
- (e) Applicant shall maintain his accounting records on a calendar year basis in conformance with the applicable Uniform System of Accounts or Chart of Accounts as prescribed or adopted by this Commission and shall file with the Commission, on or before April 30 of each year, an annual report of his operations in such form, content, and number of copies as the Commission, from time to time, shall prescribe.

- (f) Applicant shall comply with the requirements of the Commission's General Order No. 84-Series for the transportation of collect on delivery shipments. If applicant elects not to transport collect on delivery shipments, he shall make the appropriate tariff filings as required by the General Order.

The effective date of this order shall be twenty days after the date hereof.

Dated at San Francisco, California, this 29th day of JUNE, 1976.
