Application 84-03-19  
(Filed March 5, 1984)

O P I N I O N

Cartel Carriers, a California corporation, seeks authority as a highway common carrier to transport general commodities to and from all points in the State of California.

No Commission operating authority has been held by applicant. One of applicant's principals "has in excess of 15 years of experience in the transportation industry, and until recently forming his own company, was director of operations and vice president of a California common carrier." Applicant asserts that it "has the knowledge, desire, capability, personnel and equipment to meet the needs of supporting shippers and the general shipping public..."

There are seven supporting shippers. Applicant's balance sheet as of March 2, 1984 shows total assets of \$23,600, total liabilities of \$7,000, and a net worth of \$16,600.

Notice of the filing of this application appeared in the Commission's Daily Transportation Calendar of March 12, 1984. No protests have been received.

Findings of Fact

1. Applicant possesses satisfactory fitness and financial responsibility to conduct the proposed transportation services.
2. Public convenience and necessity require the service proposed by applicant.
3. It can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.
4. The following order has no reasonably foreseeable impact upon the energy efficiency of highway carriers.
5. A public hearing is not necessary.
6. Intrastate service by applicant should be commenced as soon as possible.

Conclusion of Law

The application should be granted.

Only the amount paid to the State for operative rights may be used in rate fixing. The State may grant any number of rights and may cancel or modify the monopoly feature of these rights at any time.
