

ORIGINAL TB-5

Decision 84 05 095

MAY 16 1984

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Investigation
for the purpose of considering and
determining minimum rates for
transportation of sand, rock, gravel
and related items in bulk, in dump
truck equipment in Southern California
as provided in Minimum Rate
Tariff 17-A and Southern California
Production Area and Delivery Zone
Directory 1, and the revisions or
reissues thereof.

Case 9819, OSE 59
(Filed February 16, 1983)

And Related Matter.

Case 5437, OSE 319

O P I N I O N

Minimum rates for the transportation of asphaltic concrete from defined production areas to designated delivery zones in Southern California, are set forth in Minimum Rate Tariff (MRT) 17-A. When the transportation is performed by dump trucks without trailing equipment (2- and 3-axle dumps) the applicable minimum rates are those set forth in Sections 11 to 15 inclusive of MRT 17-A. When asphaltic concrete is transported by dump trucks with trailing equipment (4- and 5-axle transfer equipment) or tractors with trailers (5-axle double bottom dumps) MRT 17-A provides that the hourly rates and rules in MRT 7-A apply.

The instant OSH's were issued to provide a vehicle for making zone rates for the transportation of asphaltic concrete available to all dump truck carriers and shippers, and to forestall the need for the filing of carrier applications seeking authority to apply such zone rates on an individual carrier basis.

Public hearings were held at Los Angeles before Administrative Law Judge O'Leary on September 27, 28, and October 20, 1983. The matters were submitted on November 13, 1983 with filing of letter briefs by the parties.

Rate proposals were put forth by the Commission staff (staff), California Dump Truck Owners Association (CDTOA) and the California Carriers Association (CCA). A comparison of the rates proposed is set forth in Appendix A of this decision.

The staff's proposal was arrived at mathematically by using the historically accepted formula used by the Commission in past proceedings for the development of zone rates applying to the transportation of rock, sand and gravel in 5-axle equipment. The formula was modified to reflect terminal end time and annual usage applicable to the transportation of asphaltic concrete. The terminal end time factor was developed from limited data gathered in connection with this proceeding for the purpose of establishing interim rates.

The staff compared its rates with existing rates for the transportation of rock, sand and gravel and asphaltic concrete. (Exhibit 59-2.) It also compared its rates with the hourly rates. The comparison with the hourly rates was accomplished by converting the existing rate of \$46.87 (including 22½% surcharge) to a ton-per-minute rate of \$0.02929 assuming a truckload weight of 26.67 tons.¹ This rate was then multiplied by the round-trip running time plus a terminal end time factor of 38 minutes. CCA adopted these as its proposal for interim rates.

CDTOA's proposal is basically the same as the above. It differs in two respects: It assumes a truckload weight of 26.13 tons and a terminal end time of 25.3 minutes.² CDTOA's running times are the same as those developed by the staff.

¹ \$46.87 divided by 26.67 divided by 60 equals \$0.02929 per ton per minute.

² \$46.87 divided by 26.13 divided by 60 equals \$0.02990 per ton.

The proposals pertain to bottom dump truck equipment. All parties agree that when transfer type equipment is used to perform the transportation the rate scale should be higher than for use of bottom dump type equipment because of less carrying capacity and additional unloading time. The staff's additives for use of transfer type equipment are set forth in Exhibit 59-7. The additives range from a low of \$0.61 to a high of \$0.69 and average \$0.6392 per ton. CDTOA computed a cost-per-ton difference of \$0.68. CCA did not submit a proposal in connection with an additive for use of transfer type equipment.

The data gathered by the staff with respect to terminal end time shows that the average loading and unloading times are as follows:

<u>Type of Equipment</u>	<u>Loading Minutes</u>	<u>Unloading Minutes</u>	<u>Total Minutes</u>
Bottom Dump	16.8	8.5	25.3
Transfer Units	20.6	27.0	47.6

The rates proposed by the staff and CDTOA include compensation for loading and unloading based on the above time computations. The staff proposes that the maximum time allowances for unloading of carriers equipment be 30 minutes for bottom dumps and 45 minutes for truck and transfer type equipment. The staff recommends that time in excess of the 30 and 45 minutes be charged for increments of 1/10 per hour (six minutes) at a rate of \$2.30 for bottom dump equipment and \$2.41 for transfer type equipment. CDTOA recommends a 30-minute loading and unloading time allowance for all types of equipment and a rate of \$2.41 per 1/10 hour for time in excess of 30 minutes. CCA urges adoption of the staff proposal in this regard provided CCA's proposal is adopted. Should the zone rates proposed by either the staff or CDTOA be adopted CCA urges that the delay time provisions advocated by CDTOA be adopted.

All parties to the proceeding, but one, urge that the interim rates alternate with the hourly rates. We will provide for such alternations for the interim rates; however, the parties are placed on notice that once permanent rates are adopted there will be no alternation provision.

The carrier interests, namely Independent Owner Operators Inc., CCA, CDTOA, and California Trucking Association (CTA), proposed that rules be incorporated in MRT 17-A requiring carriers to keep additional records over and above those now required by the tariff. (Exhibit 59-9).

The proposed rules would require both overlying and underlying carriers to document and submit to the Commission actual operating experience when using interim rates.

California Asphalt Pavement Association, a statewide association which represents manufacturers of asphaltic concrete, participated in this proceeding and recommends adoption of the staff proposal with the exception that the allowable loading and unloading times should be 24 minutes for bottom dump type equipment and 52 minutes for transfer type equipment, which times were adopted in Decision (D.)90854 (C.5437, Petition for Modification Nos. 307 and 308).

CDTOA also recommends that the rates be effective for a 9-month period commencing no later than April 1, 1984. CDTOA contends that this would give the parties a full hauling season of experience under the interim rates which should be sufficient to provide data for the formulation of permanent rates. We believe CDTOA to be optimistic with respect to the time frame for formulating permanent rates. This decision will provide that the interim rates be effective for a two-year period. In this regard we expect the parties to come forward with their proposals after one full hauling season so that permanent rates may be established prior to the expiration of the interim rates authorized here.

Discussion

The concept of establishing zone rates for the transportation of asphaltic concrete is not a new one. Zone rates for the transportation of asphaltic concrete in 3-axle equipment have been in effect for some time. At the time the rates were established, zone rates were not proposed for 5-axle equipment because 5-axle equipment was rarely used for the transportation of asphaltic concrete. Recently there has been more use of 5-axle equipment which has a much larger carrying capacity than the 3-axle equipment.

All of the carrier interests oppose the proposal of the staff. The staff proposal is based upon the current zone formulas used in the development of rock, sand and gravel zone rates. The carrier interests point out that the transportation of asphaltic concrete is not comparable to that of rock, sand, and gravel because there are additional costs associated with the transportation of asphaltic concrete.

The carrier interests are also concerned that the interim rates be set at a level which will produce revenue comparable to what is being received under the hourly rates. They argue that the adoption of zone rates at a level which would result in carriers receiving significantly less compensation than they receive today would be patently unfair and unreasonable to those carriers. They are fearful that adoption of the staff proposal may lead to such a situation.

The main argument for setting zone rates is that shippers and contractors will have knowledge of what their transportation costs are or will be on a unit basis (per ton).

Interim rates are experimental rates which are used for a period of time in order that experience may be gained as to whether or not the system and/or level of the rates are appropriate.

The interim rates should be at a level which will encourage their use, because the experiment will be unsuccessful if no actual operating data is obtained which will aid in the development of permanent zone rates. From the evidence in this proceeding it is clear that the only proposal that will accomplish this is the proposal of CDTOA. The proposal of the staff appears to be so low that carriers would not realize a reasonable profit. The proposal of CCA would produce zone rates so high that shippers would choose the present hourly rates rather than use the interim zone rates. We will adopt CDTOA's proposal except that we will not provide for delay time at the point of origin. Few delays occur at origin because of efficient loading procedures at asphalt plants.

The only other issue that requires discussion is the proposal that rules be incorporated in MRT 17-A requiring carriers to keep additional records. The data that would be obtained from such record-keeping would be very helpful to all parties in any forthcoming study. However, we do not believe it appropriate that rules be incorporated in the tariff making it mandatory to keep such records. According to the evidence in this proceeding both carriers and shippers desire the establishment of zone rates for the transportation of asphaltic concrete. It would therefore behoove the carriers to keep the information on a voluntary basis. We urge the carrier associations to recommend to their membership that proper records be kept. We believe good business practice dictates that certain information that would be helpful should be voluntarily recorded. We do not believe it necessary or desirable to set forth regulations in this regard.

Findings of Fact

1. Zone rates for the transportation of asphaltic concrete set forth in MRT 17-A apply only to transportation performed in 3-axle equipment.

2. At the time zone rates were established 5-axle equipment was rarely used for the transportation of asphaltic concrete. Recently there has been a move to the use of 5-axle equipment for the transportation of asphaltic concrete.

3. Knowledge as to what transportation costs are on a unit basis such as cost-per-ton would be helpful to shippers and contractors.

4. Establishment of zone rates on a cents-per-ton basis for the transportation of asphaltic concrete in dump trucks is required to meet the needs of both shippers and carriers.

5. The rate proposal put forth by CDTOA appears to be the most reasonable except for the imposition of delay time provisions at the point of loading.

6. The rules proposed with respect to mandatory recordkeeping are not desirable.

The Commission concludes that zone rates for the transportation of asphaltic concrete should be adopted as set forth in the ensuing order and since there is an immediate need for such rates this order should be effective today.

O R D E R

IT IS ORDERED that:

1. Minimum Rate Tariff 17-A (Appendix C to D.80578, as amended) is further amended by incorporating in it, to become effective May 21, 1984, the revised pages attached here and listed in Appendix B also attached, which pages and appendix are by this reference made a part of this decision.

2. Common carriers subject to the Public Utilities Act, to the extent that they are subject also to D.80578, as amended, are directed to establish in their tariffs the increases necessary to conform to the further adjustment ordered by this decision.

3. Tariff publication required to be made by common carriers as a result of this order shall be filed on or after the effective date of this order and may be made effective not earlier than the

effective date of the tariff pages attached here on not less than one day's notice to the Commission and to the public.

4. Common carriers, in establishing and maintaining the rates authorized by this order, are authorized to depart from the provisions of Public Utilities Code § 461.5 to the extent necessary to adjust long- and short-haul departures now maintained under outstanding authorizations; such outstanding authorizations are here modified to the extent necessary to comply with this order; and schedules containing the rates published under this authority shall make reference to the prior orders authorizing long- and short-haul departures and to this order.

5. In all other respects, D.80578, as amended, shall remain in full force and effect.

6. The Executive Director shall serve a copy of this decision on every common carrier, or such carriers' authorized tariff publishing agents, performing transportation services subject to MRT 17-A.

7. The Executive Director shall serve a copy of the tariff amendment on each subscriber to MRTs 7-A and 17-A.

8. The rates established here are experimental in nature so that experience may be gained under actual operations for the establishment of reasonable minimum rates. We expect a petition to be filed as soon as practicable by one or more of the carrier associations for the establishment of permanent minimum rates. In the event no petition is filed within two years the rates authorized here are canceled.

This order is effective today.

Dated MAY 16 1984, at San Francisco, California.

SECTION 1--RULES (CONTINUED)		ITEM
APPLICATION OF TARIFF--COMMODITIES Rates in this tariff making specific reference to this item apply for the transportation of the following commodity: Decomposed Granite		70
APPLICATION OF TARIFF--COMMODITIES Rates in this tariff making specific reference to this item apply for the transportation of: SLAC, Blast Furnace and Open Hearth, air cooled (not expanded)		73
APPLICATION OF TARIFF--GENERAL Rates in this tariff do not apply to the transportation of: (a) Disaster Supplies, i.e., those commodities which are allocated to provide relief during a state of extreme emergency or state of disaster; and those commodities which are transported for a civil defense or disaster organization established and functioning in accordance with the California Disaster Act to ultimate point of storage or use prior to or during a state of disaster or state of extreme emergency. (b) Property of the United States or property transported under an agreement whereby the United States contracted for the carrier's service. (c) Property transported for a displaced person when the cost thereof is borne by a public entity as provided in Section 7262 of the Government Code.		80
APPLICATION OF TARIFF--RATES Except as otherwise provided, the rates in this tariff are zone rates and area-to-point rates. The rates apply from all points of origin within the designated production areas to all points of destination within the designated delivery zones, and to specifically named delivery points. If any portion of a shipment is physically delivered into or beyond more than one delivery zone, the minimum rate for the entire shipment shall be that rate from point of origin to the highest rated point where physical delivery is made. EXCEPTION.--When any portion of a shipment is delivered into more than one zone, and when no portion of such shipment is physically delivered beyond the boundaries of streets which are the boundaries between the zones involved, the minimum rate for the entire shipment shall be the lower or the lowest of the applicable rates between point of origin and the zones into which delivery is made.		100
APPLICATION OF TARIFF--RATES (RATES IN THIS ITEM ARE NOT SUBJECT TO SURCHARGE SUPPLEMENT 30) (a) When the transportation service is performed by 2-axle or 3-axle trucks with transfer type pull trailer or by 2-axle or 3-axle trucks with pup type trailing equipment and when in the course of accomplishing the delivery with such truck and pup equipment the operator disconnects and separates the trailer from the truck the rate shall be a twenty-eight cents (28 cents) per ton in addition to those rates provided for when transportation is performed at the rates in Sections 4, 5, 6, 7, 8, 9, 9.1, 9.2 and 10 in this tariff or at rates which are combined with such section rates. *(E)(b) When the transportation service is performed by dump trucks with transfer type pull trailers and when in the course of accomplishing the delivery the operator disconnects and separates the trailer from the truck, the rate shall be sixty-eight cents (68 cents) per ton in addition to those rates provided when transportation is performed at the rates in Sections 15.1, 15.2, 15.3, 15.4, and 15.5 of this tariff.		§120
* (E) Expires with o Change o Reduction) o Addition o Change, neither) Decision o Increase o Increase nor) 		

SECTION 1--RULES (CONTINUED)	ITEM
<p align="center">APPLICATION OF TARIFF--TERRITORIES</p> <p>Rates in this tariff apply for transportation from all points within the production areas to all points within the delivery zones described in Southern California Production Area and Delivery Zone Directory 1, and to specifically named delivery points as provided in Section 3 of this tariff. They apply also, to the extent specified elsewhere herein, for transportation from all points within said production areas to points outside of said delivery zones.</p>	140
<p align="center">APPLICATION OF OTHER MINIMUM RATE TARIFFS</p> <p>Except as otherwise provided, the rates in this tariff supersede, and apply to the exclusion of, rates applicable to the same transportation under other minimum rate tariffs of the Commission. (See Exception)</p> <p>*EXCEPTION.--The transportation charges for commodities described in Item 65 when transported in trucks with trailing equipment or tractors with trailers:</p> <p>*(E) 1. May be computed at the hourly rates and rules in Minimum Rate Tariff 7-A provided that, prior to the commencement of transportation, the debtor or his agent and the carrier or his representative enter into a written agreement that the hourly rate provisions apply. In the absence of such a written agreement, the zone rates in Sections 15.1, 15.2, 15.3, 15.4 or 15.5 of this tariff shall apply.</p> <p>*(A) 2. Shall be performed at the hourly rates and rules in Minimum Rate Tariff 7-A. For the purpose of this exception the written agreement provisions contained in Item 360 of Minimum Rate Tariff 7-A are not applicable.</p> <p>For rates for the transportation of commodities in dump truck equipment, other than as provided in this tariff, see Minimum Rate Tariff 7-A, or Transition Tariff 2 or 9-3 as the case may be.</p>	6160
<p align="center">ACCESSORIAL CHARGES</p> <p>*In addition to the charges provided under Sections 11, 12, 13, 14, 15, *(E) 15.1, *(E) 15.2, *(E) 15.3, *(E) 15.4, and *(E) 15.5, accessorial charges shall be assessed as provided in Item 90 of Minimum Rate Tariff 7-A.</p> <p>In addition to the charges provided under Sections 4, 5, 6, 7, 8, 9, 9.1, 9.2 and 10 and when, through no fault of the carrier, the unloading and release of carrier's equipment after arrival at destination is delayed beyond the time allowance shown herein, a charge of \$2.30 per unit of carrier's equipment shall be assessed for each six (6) minutes (one-tenth of an hour) or fraction thereof:</p> <p>When transportation is performed by dump truck and transfer trailer combination equipment--20 minutes;</p> <p>When transportation is performed by other than a dump truck and transfer trailer combination equipment--15 minutes.</p>	6280
<p align="center">* HANDLING OF CLAIMS FOR LOSS OR DAMAGE</p> <p>Claims for loss or damage shall be governed by the provisions of General Order No. 139.</p>	190

SECTION 1--RULES (CONTINUED)	ITEM
<p style="text-align: center;">CHARGE FOR TRACTOR AND DRIVER WITHOUT TRAILING EQUIPMENT</p> <p>Charges to be paid by a consignor, consignee or other person responsible for payment of freight charges (except an overlying carrier) to a carrier furnishing a tractor and driver without trailing equipment, but towing trailing equipment furnished by the debtor, consignee or consignor, shall be not less than 85 percent of the otherwise applicable charge. In assessing charges under the tonnage (zone) rates contained in Sections 3, 4, 5, 6, 7, 8, 9, 9.1, 9.2, 10, *(E)15.1, *(E)15.2, *(E)15.3, *(E)15.4, *(E)15.5 and 14 of this tariff, the carrier furnishing the tractor and driver, need not assess a charge for the amount of the unladen weight of the trailing equipment when under load, nor assess a charge for the empty return movement. (See Exception)</p> <p>EXCEPTION.--The provisions of this item shall not apply when trailing equipment is furnished by any party other than the debtor, consignee or consignor, of the specific transportation charges involved. (See Item 460)</p>	6250
<p style="text-align: center;">CHARGE FOR TRACTOR AND DRIVER WITHOUT TRAILING EQUIPMENT. (BY OVERLYING CARRIER)</p> <p>Except as provided in Note 1, charges to be paid by an overlying carrier to an underlying carrier furnishing a tractor and driver without trailing equipment, but towing trailing equipment furnished by the overlying carrier shall be not less than 80 percent of the charges applicable under the minimum rates prescribed in this tariff. In assessing charges under the tonnage (zone) rates contained in Sections 3, 4, 5, 6, 7, 8, 9, 9.1, 9.2, 10 and 16 of this tariff, the carrier furnishing the tractor and driver need not assess a charge for the amount of the unladen weight of the trailing equipment when under load, nor assess a charge for the empty return movement.</p> <p>NOTE 1.--The overlying carrier shall be entitled to deduct from the charges to be paid under this item any amount that the overlying carrier is entitled to retain under the application of Item 460.</p> <p>NOTE 2.--An overlying carrier shall not require that an underlying carrier use trailers owned or controlled by the overlying carrier as a condition precedent to the engagement of the underlying carrier's service.</p>	255

FIFTH REVISED PAGE....1-17

SECTION 1--RULES (CONTINUED)	ITEM
<p>METHOD OF DETERMINING WEIGHT OF SHIPMENT</p> <p>Actual weight of the shipment shall be used when furnished by the shipper or when obtained by the carrier at the shipper's direction and expense.</p> <p>Otherwise, charges for commodities listed in:</p> <p>a. Items 60, 70 and 75 shall be computed upon the basis of 2,000 pounds per cubic yard when loaded in dump truck equipment.</p> <p>b. Item 65 shall be computed on the basis of 3,200 pounds per cubic yard when loaded in dump truck equipment.</p> <p>EXCEPTION.--When rail rates are used under the provisions of Items 200 and 220 of this tariff, actual, estimated or agreed weights shall be used to compute charges in accordance with the provisions of the governing rail tariff.</p>	420
<p>MINIMUM CHARGE</p> <p>The minimum charge per shipment shall be the charge for:</p> <p>a. 14 tons at the applicable rate for commodities described in Item 60.</p> <p>b.1. 12 tons at the applicable rate for commodities described in Note 2 of Item 65 and Item 70. (See Exception)</p> <p>* (E)2. 26 tons for five-axle bottom dump equipment and 25 tons for transfer type pull trailers and trucks with pup type trailing equipment for commodities described in Item 65.</p> <p>c. 13 tons at the applicable rate for commodities described in Item 75.</p> <p>EXCEPTION.--When a shipment of asphaltic concrete or cold road oil mixture (also cold liquid asphalt in containers) is transported in a two-axle dump truck, and when the freight bill is so noted and the truck is identified on the freight bill, the minimum charge for the transportation of the shipment shall be the charge for transporting 10 tons at the applicable rate.</p>	440

ITEM	SECTION 1--RULES (CONTINUED)
460	<p>PAYMENTS TO UNDERLYING CARRIERS</p> <p>Except as provided in Item 255, charges paid by any overlying carrier to an underlying carrier and collected by the latter carrier from the former for the service of said underlying carrier shall be not less than 95 percent of the charges applicable under the minimum rates prescribed in this tariff, less the gross revenue tax applicable and required to be paid by an overlying carrier (See Notes 1 and 2). The underlying carrier may extend credit to the overlying carrier for a period not to exceed twenty days following the last day of the calendar month in which the transportation was performed, and payment to the underlying carrier must be made within that time. Freight bills for transportation and accessorial charges shall be presented by the underlying carriers to overlying carriers within three days after the last calendar day of the month in which the transportation was performed.</p> <p>NOTE 1.--As used in this item the term "gross revenue tax" means the fees payable to the California Public Utilities Commission under the Transportation Rate Fund Act.</p> <p>NOTE 2.--Nothing herein contained shall prevent an overlying carrier, in paying such charges, from deducting therefrom such liquidated amounts as may be due from the underlying carrier to the overlying carrier, providing such deductions have been authorized in writing by the underlying carrier. Any overlying carrier electing to employ this procedure shall itemize such amounts and maintain for the Commission's inspection all documents involved in the transaction. The term "liquidated amounts" as used in this item, shall not include, when the underlying carrier provides a tractor and driver without trailing equipment, charges pertaining to the operation and maintenance of trailing equipment such as: tires, tubes, parts, repairs, maintenance, painting, and cleaning.</p>
480	<p>RATES FOR DRY MIXTURES OF ROCK, SAND AND GRAVEL (WITH OR WITHOUT CEMENT) IN BATCHES</p> <p>Rates for the transportation of dry mixtures of two or more of the commodities listed in Item 60, in batches, shall be 17 cents per ton more than the rates otherwise provided in this tariff for the transportation of rock, sand and gravel between the same points.</p>
500	<p>REFERENCES TO ITEMS, OTHER TARIFFS AND GENERAL ORDERS</p> <p>Unless otherwise provided, references herein to item numbers in this or other tariffs include references to such numbers with letter suffix, and references to other tariffs or publications include references to amendments and successive issues of such other tariffs or publications and references to general orders include references to amendments or successive issues of such general orders.</p>

CHANGE, DECISION NO.

84 05 095

EFFECTIVE

MAY 21 1984

ISSUED BY THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA.

CORRECTION

SAN FRANCISCO, CALIFORNIA.

~~INTERIM~~ OPINION

Minimum rates for the transportation of asphaltic concrete from defined production areas to designated delivery zones in Southern California, are set forth in Minimum Rate Tariff (MRT) 17-A. When the transportation is performed by dump trucks without trailing equipment (2- and 3-axle dumps) the applicable minimum rates are those set forth in Sections 11 to 15 inclusive of MRT 17-A. When asphaltic concrete is transported by dump trucks with trailing equipment (4- and 5-axle transfer equipment) or tractors with trailers (5-axle double bottom dumps) MRT 17-A provides that the hourly rates and rules in MRT 7-A apply.

The instant OSH's were issued to provide a vehicle for making zone rates for the transportation of asphaltic concrete available to all dump truck carriers and shippers, and to forestall the need for the filing of carrier applications seeking authority to apply such zone rates on an individual carrier basis.

Public hearings were held at Los Angeles before Administrative Law Judge O'Leary on September 27, 28, and October 20, 1983. The matters were submitted on November 13, 1983 with filing of letter briefs by the parties.

Rate proposals were put forth by the Commission staff (staff), California Dump Truck Owners Association (CDTOA) and the California Carriers Association (CCA). A comparison of the rates proposed is set forth in Appendix A of this decision.

2. At the time zone rates were established 5-axle equipment was rarely used for the transportation of asphaltic concrete. Recently there has been a move to the use of 5-axle equipment for the transportation of asphaltic concrete.

3. Knowledge as to what transportation costs are on a unit basis such as cost-per-ton would be helpful to shippers and contractors.

4. Establishment of zone rates on a cents-per-ton basis for the transportation of asphaltic concrete in dump trucks is required to meet the needs of both shippers and carriers.

5. The rate proposal put forth by CDTOA appears to be the most reasonable except for the imposition of delay time provisions at the point of loading.

6. The rules proposed with respect to mandatory recordkeeping are not desirable.

The Commission concludes that zone rates for the transportation of asphaltic concrete should be adopted ~~on an interim basis~~ as set forth in the ensuing order and since there is an immediate need for such rates this interim order should be effective today. K2

INTERIM ORDER

IT IS ORDERED that:

1. Minimum Rate Tariff 17-A (Appendix C to D.80578, as amended) is further amended by incorporating in it, to become effective May 21, 1984, the revised pages attached here and listed in Appendix B also attached, which pages and appendix are by this reference made a part of this decision.

2. Common carriers subject to the Public Utilities Act, to the extent that they are subject also to D.80578, as amended, are directed to establish in their tariffs the increases necessary to conform to the further adjustment ordered by this decision.

3. Tariff publication required to be made by common carriers as a result of this order shall be filed on or after the effective date of this order and may be made effective not earlier than the

8. The rates established are experimental in nature so that experience may be gained under actual operations for the establishment of reasonable minimum rates, which may or may not be those established herein.

minimum rates in the future.

We expect a petition to be filed, as soon as practicable, by one or more of the carrier associations for the establishment of permanent minimum rates. In the event no petition is filed within two years of the effective date, the rates hereafter fixed are cancelled.

7. The Executive Director shall serve a copy of the tariff amendment on each subscriber to MRTs 7-A and 17-A.

This order is effective today.

Dated MAY 16 1984, at San Francisco, California.
