O P I N I O N

By this application, Wycoff Company (Wycoff), Incorporated, a Utah Corporation, authorized to do business in California, seeks authority to increase certain of its rates for small shipments published in Item 75 of its Small Shipment Tariff No. 2 , Cal. P.U.C. No. 2. Applicant operates as a highway common carrier of small shipments (maximum 500 pounds).

Wycoff's proposal would amend its intrastate California rate structure and bring its California intrastate rates into conformity with its interstate rates between all points in California. This will allow applicant to fully computerize its rating and billing system throughout its entire system.

1/ The new rates are shown on pages 11, 12, 13, 14, and 15 of Exhibit "B" attached to the application.

Applicant avers that with the exception of California intrastate rates, all of Wycoff's other intra- and interstate rates are identical.

Wycoff states that in the event this application is granted it would increase its California intrastate gross revenue by less than one percent.

The application was listed on the Commission's Daily Transportation Calendar of May 23, 1984. No objection to the granting of the application has been received.

Applicant indicates that the proposal is not considered to be a major action significantly affecting energy efficiency within the meaning of Public Utilities (PU) Code Sections 3502.1 and 3502.2.

Findings of Fact

1. The increases resulting from this proposal are justified.
2. The proposal will result in increasing Wycoff's California intrastate gross revenue by less than one percent.
3. The following order has no reasonably foreseeable impact on the energy efficiency of highway carriers.
4. A public hearing is not necessary.

Conclusion of Law

The application should be granted.
