Mailed MAR 1 3 1992

Decision 92-03-037 March 11, 1992

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application of Suburban Water Systems (U 339-W) for an order authorizing it to increase its rates for water service in its San Jose District.

Application 91-07-001 (Filed July 1, 1991)

Steefel, Levitt & Weiss, by Lenard G.

Weiss, Attornéy at Law, for Suburban
Water Systems, applicant.

Maxine Leichter, for Sierra Club 
Angeles Chapter, interested party.

Lawrence Q. Garcia, Attorney at Law, for
the Division of Ratepayer Advocates.

Daniel Páige, for the Commission Advisory
and Compliance Division.

#### OPINION

#### Summary

Suburban Water Systems filed its application for an order authorizing it to increase its rates for water service in its San Jose District by \$3,102,000 (29.6%) over present rates for test year 1992, \$655,000 (4.8%) over 1992 proposed rates for 1993, and \$694,000 (4.8%) over 1993 proposed rates for 1994. The requested rate of return on equity is 12.75% for test years 1992 and 1993. The requested rate of return on rate base is 10.33%.

This decision authorizes Suburban Water Systems to increase rates in its San Jose District by \$2,480,100 (23.1%) over present rates for 1992, \$432,500 (3.3%) over 1992 proposed rates for 1993, and \$343,600 (2.5%) over 1993 proposed rates for 1994. The authorized rate of return on equity is 11.65% for test years 1992 and 1993. The authorized rate of return on rate base is 9.78%.

In reaching this decision, the Commission accepts and adopts a Stipulation for Settlement of all disputed issues which was jointly prepared and presented by Suburban Water Systems and the Commission staff (Staff) represented by the Commission Advisory and Compliance Division.

#### **Procedure**

Suburban Water Systems, a Class A water utility, tendered a Notice of Intention to File General Rate Increase Application on May 20, 1991 in accordance with the Commission's Revised Rate Case Plan (Decision (D.) 90-08-045, August 8, 1990.) The notice was filed on the same date.

A public participation hearing (PPH) was held in West Covina on August 14, 1991. Sixty-two customers attended the hearing, most objecting to the magnitude of the sought rate increase. Additionally, eight letters of protest were received from customers not able to attend the PPH, but wishing to express opposition to Suburban Water Systems' general rate increase application.

A duly noticed evidentiary hearing was held before Administrative Law Judge Orville I. Wright in Los Angeles on October 24, 1991, at which time Staff and Suburban Water Systems offered a Stipulation for Settlement of the many reasonableness issues between these two parties.

Also filing an appearance and testifying at the October 24, 1991 hearing was Maxine Leichter, for the Sierra Club - Angeles Chapter, interested party. Leichter's testimony, both oral and in prepared form, was the subject of a Motion to Strike filed by Suburban Water Systems. Further, Leichter had no knowledge of the proffered Stipulation for Settlement.

With respect to the Motion to Strike, Leichter was given 15 days to mail a response. On November 5, 1991 Leichter mailed her rebuttal. On November 20, 1991 Suburban Water Systems filed a reply to Leichter's rebuttal, and, on November 29, 1991 Leichter

filed a further document in opposition to Suburban Water Systems' Motion to Strike.

With respect to the Stipulation for Settlement, Suburban Water Systems mailed a copy to Leichter on October 24, 1991. In accordance with Rule 51.4, Rules of Practice and Procedure, Leichter had 30 days from the date of mailing of the stipulation to file comments, and no comments were filed.

In order that the record may include the response, rebuttal, and surrebuttal between Leichter and Suburban Water Systems following Suburban Water Systems' Motion to Strike, we accept these documents as briefs of the parties.

This matter was submitted on November 12, 1991.

### Historical Background

Suburban Water Systems, a California corporation, was originally formed on April 15, 1907 as the San Jose Hills Water Company intending to function as a mutual water company providing water service for agricultural use. San Jose Hills Water Company was incorporated under the laws of the State of California on June 27, 1944 as a public utility water company. By early 1947, San Jose Hills Water Company was supplying water to 11 customers. By year end 1947, the company had acquired or joined forces with several other nearby water companies, including Firestone, Sunkist, Leibacher, Garvey Mutual, Ashmun Mutual, and Rivera, and was providing water service to approximately 500 customers.

In 1953, Whittier Water Company was purchased by San Jose Hills Water Company. The name was officially changed to Suburban Water Systems on October 23, 1953. As of that date, service was being provided in the areas of La Puente, Whittier, La Mirada, Santa Pe Springs, and Pico Rivera. In 1968, its facilities in the cities of Santa Fe Springs and Pico Rivera were sold under threat of condemnation to the City of Santa Fe Springs. On September 23, 1976, Suburban Water Systems was purchased by Southwest Water Company and its name was changed to Southwest Suburban Water.

Southwest Water Company was a public utility water company operating in the areas of Santa Fe Springs, La Mirada, La Sierra, and Etiwanda. In 1968, services and facilities in Santa Fe Springs were condemned and sold to the City of Santa Fe Springs. In 1974, its La Sierra District was sold to the City of Riverside under a condemnation proceeding. Following its purchase of Suburban Water Systems, Southwest Water Company transferred its La Mirada and Etiwanda system to Southwest Suburban Water, thus, consolidating all California utility operations into one operating company and transforming Southwest Water Company into a holding company.

In 1977, Southwest Suburban Water sold its Etiwanda District to the Cucamonga County Water District under threat of condemnation. On August 17, 1982, its name was again officially changed to Suburban Water Systems. In 1986, Suburban Water Systems sold facilities and transferred 97 customers in La Habra to the City of La Habra.

In its history, Suburban Water Systems under this name and others has served many cities in the Southern California area. Today, it serves approximately 64,000 customers in its San Jose, Whittier, and La Mirada Districts. Communities served are Glendora, Covina, West Covina, La Puente, Valinda, Industry, Hacienda Heights, Whittier, La Mirada, La Habra, and Buena Park as well as unincorporated Los Angeles and Orange County areas. Since the late 1960's, Suburban Water Systems has grown little beyond its saturated areas of certification. Additional growth has come through extensions into new subdivisions along the periphery of the company's widespread service area, or through redevelopment in existing service areas from single to multi-user services. Future expansion of the service areas on a large scale is improbable.

The district for which this rate application pertains is the San Jose District; essentially the successor of the San Jose Hills Water Company. The San Jose District serves approximately 33,000 customers in the cities of Glendora, Covina, West Covina, La Puente, Valinda, Industry, Hacienda Heights, and unincorporated Los Angeles County.

Stipulation for Settlement

Staff and Suburban Water Systems, desiring to avoid the expense, inconvenience, and uncertainty attendant to litigation of issues in dispute between them, have agreed upon a settlement, the results of which were presented in exhibit form and introduced into evidence at the evidentiary hearing on October 24, 1991.

The Stipulation for Settlement was entered into between the parties, circulated to the interested party not joining in the agreement, and submitted for Commission approval pursuant to Rules of Practice and Procedure 51 through 51.10. No comments have been received.

A comparison exhibit included in the Stipulation for Settlement follows as Table 1, consisting of four pages. We find that the Stipulation for Settlement is reasonable in light of the whole record, consistent with law, and in the public interest.

(END OF TABLE 1)

#### Attrition Allowance

An attrition allowance is needed when increases in revenue and productivity to offset increases in expenses (including the effect of cost of capital) are insufficient, thereby causing a decline in the rate of return for the following year. Since the Commission expects water utilities to file for a general rate increase not more than once in a three-year period according to the rate case processing plan, an attrition allowance to compensate for possible revenue shortfall in the year following the latest test year is, usually, allowed by the Commission.

Attrition consists of two parts: financial and operational. Financial attrition occurs when there is a change in the utility's cost of money. Operational attrition is the result of changes in operating categories: revenues, expenses, and rate base.

The adopted operational attrition part for 1994 agreed to by the Company and Staff is the rate increase of 2.58% required in Test Year 1993 over Test Year 1992 adopted rates to produce the adopted rate of return in Test Year 1993.

With adopted capitalization ratios, cost of debt and return on equity being the same for 1994 as adopted for Test Year 1993, financial attrition for 1994 is zero.

Adopted total attrition for 1994 is therefore equal to operational attrition which provides for a 2.58% rate increase in 1994 over Test Year 1993 adopted rates.

#### Rate Design

The Commission issued D.86-05-064, on May 28, 1986, as a result of Investigation 84-11-041, Order Instituting Investigation (Rulemaking) into Water Rate Design Policy, filed November 21, 1984. The order specifically addresses the following aspects of rate design:

 Service charges as a percentage of fixed costs.

- b. Number of commodity blocks.
- c. Phasing-out lifeline.
- d. Seasonal rates.
- e. Addressing of water conservation in rate applications.

Commission policy requires that service charges be set to recover up to 50% of fixed costs. The recovery of up to 50% of fixed cost should be done, if it is possible to do so, without burdening any class of customers with an increase significantly more than the average overall percentage increase.

The utility's present and proposed rates are composed of a meter service charge and a single commodity block in compliance with D.86-05-064. Staff and Suburban Water Systems recommend that the service charge should be increased not to exceed either 50% of the fixed costs or the system percentage increase, whichever is lower. The parties also recommend increasing rates for different meter-sized customers proportionally in accordance with the rate design policy memo dated January 18, 1991 issued by the Water Utilities Branch.

These rate design recommendations are adopted in this decision.

## Customer Service and Conservation

Staff reports that the Commission's Consumer Affairs Branch received 15 informal complaints in 1990, all of which were satisfactorily resolved.

A field inspection of the utility's facilities conducted in July 1991 found plant and service to be generally satisfactory.

The State Department of Health Services most recently inspected Suburban Water Systems in January 1991; a short list of deficiencies was presented to the utility, and corrective action was taken.

The utility's conservation effort is to discourage the wasteful use of water and promote the use of water-saving devices. The utility makes available, without cost to the customer, water-saving kits. Furthermore, the utility includes in its regular bill mailing inserts and slogans to promote water conservation. Water conservation pamphlets are available in the utility's lobby where many customers pay their bills in person.

Suburban Water Systems in Application 91-03-003 submitted a Water Management Program applicable to the San Jose District as ordered by the Commission in D.90-08-055. This program was certified as complete by the Water Utilities Branch as listed in Appendix A of D.91-10-042 dated October 23, 1991.

We find that Suburban Water Systems is providing satisfactory water service to its customers, is taking reasonable measures to meet applicable federal and state water quality standards, and is making appropriate efforts to improve water conservation.

### Leichter's Testimony

Leichter appeared at the PPH on August 14, 1991 on her own behalf to present a statement in opposition to the Commission's approval of the full amount of assessments made by an entity known as Watermaster.

Watermaster is described by Suburban Water Systems, in an attachment to its application, as follows:

"The source of the district's groundwater production, the Main San Gabriel Basin, was adjudicated in the Los Angeles County Superior Court action known as 'Upper San Gabriel Valley Municipal Water District vs. City of Alhambra, et al, No. 924128,' and a Stipulated Judgment was entered in this case on January 4, 1973. This basin had been in overdraft for many years. The court-appointed watermaster manages local supplies and spreading of imported water in the basin to assure adequate supplies for all producers. Production from company wells is subject to assessments levied by the watermaster to cover expenses incurred in the

program of administering and replenishing the water supply in this basin."

Leichter's opposition to the level of Watermaster charges for ratemaking purposes was endorsed by the Sierra Club - Angeles Chapter, and she prepared testimony and presented evidence at the evidentiary hearing in Los Angeles on October 24, 1991.

Leichter testified, in part, as follows:

"I have for the past one and one-half years been advocating on behalf of the Sierra Club for the cleanup of the San Gabriel Valley Superfund (groundwater contamination) Site. In connection with this I have made an extensive study of Watermaster, and the operation of the Main San Gabriel Groundwater Basin.

"The Sierra Club Angeles Chapter is requesting that the Commission disallow from the rate base of Suburban Water Systems, that portion of the assessments levied by the Main San Gabriel Basin Watermaster that are being spent for lobbying and other unnecessary expenses. These expenditures include, but are not necessarily limited to, expenditures for legislative advocacy, payments to a Suburban employees [sic] and a retiree of Suburban Water Systems, reimbursed expenses to these individuals, and payments for public relations activities.

"Watermaster policy is made by its nine member board. Three of these board members are appointed by the municipal water districts. The other six are elected by a vote of the water rights holders which is weighted by amount of water rights held, (see Upper San Gabriel Valley Municipal Water District vs. City of Alhambra, 1973). Suburban Water Systems is the largest single holder of water rights in the Main San Gabriel Groundwater Basin (see Main San Gabriel Watermaster Annual Report 1989-90) and therefore has the largest single block of votes for directors of Watermaster.

"We contend that the above factors indicate that Suburban has a substantial voice in determining Watermaster policy, the nature and size of Watermaster expenses and the assessments necessary to repay these expenses. As will be seen by the evidence which is attached, these expenses are being made with the approval and concurrence of the representatives of Suburban. Therefore these expenses are not non-discretionary and should be evaluated as if they were expenses made by Suburban.

Leichter seeks to have the Commission, for ratemaking purposes only, assume jurisdiction over Watermaster assessments made to Suburban Water Systems and to all other private utilities served by Watermaster. Leichter argues that the Commission should apply the same standard of reasonableness to Watermaster assessments as its does to other costs incurred by Suburban Water Systems.

Suburban Water Systems filed a Motion to Strike Leichter's testimony together with the Declaration of Daniel M. Conway which stated, in part, as follows:

Suburban owns 12-1/2% or one-eighth of the water entitlement of the Watermaster. However, Suburban is only one of nine votes on the Watermaster. Suburban does not control the votes of the other eight members of the Watermaster.

Suburban Water Systems' testimony that it does not control Watermaster is not contradicted in the record and seems decisive against Leichter's position. Leichter does not dispute that the great majority of Watermaster expenditures are reasonable and necessary to the supply of water to Suburban Water Systems. Thus, before we examine every element of Watermaster's costs making up its assessment to Suburban Water Systems, we must first know that Suburban Water Systems has sufficient control of these elements to be accountable for them.

As our policy is to encourage public participation in our proceedings, we will deny the Motion to Strike. However, there is

sufficient evidence in the record to find Watermaster charges to Suburban Water Systems to be reasonable.

#### Comments

Pursuant to the Commission's Rules of Practice and Procedure, the proposed decision of the assigned administrative law judge for this proceeding was filed with the Commission and mailed to the parties on January 27, 1992.

Nonsubstantive comments were filed by Suburban Water Systems and approved by Staff. Applicant's suggested revisions are adopted by the Commission.

#### Findings of Fact

- 1. Suburban Water Systems is providing satisfactory water service to its customers in its San Jose District, taking reasonable measures to meet applicable federal and state water quality standards, and is making appropriate efforts to improve water conservation.
- 2. Suburban Water Systems' rate base and results of operation for test years 1992 and 1993 at proposed rates, as stipulated to by Staff and itself, as shown in Table 1 of this decision, are reasonable in light of the whole record, consistent with law, and in the public interest.
- 3. The revenue requirement for attrition year 1994 should be calculated by use of the stipulated attrition allowance which provides for a 2.58% rate increase to become effective January 1, 1994.
  - 4. Rate of return on rate base of 9.78% is reasonable.
  - 5. Rate of return on common equity of 11.65% is reasonable.
- 6. Rate design recommendations of Staff and Suburban Water Systems are reasonable.
- 7. The increased rates and charges authorized by this decision are justified and reasonable; present rates and charges insofar as they differ from those prescribed herein are for the future unjust and unreasonable.

- 8. The effective date of this order should be the date of signature as the authorized rates were designed to take effect at the beginning of calendar year 1992.
- 9. Suburban Nater Systems' motion to strike the testimony of Leichter should be denied.
- 10. There is insufficient evidence in the record to find Watermaster charges to Suburban Water Systems to be unreasonable. Conclusion of Law

The application should be granted to the extent provided by the following order, the adopted rates and charges being just, reasonable, and nondiscriminatory.

#### ORDBR

#### IT IS ORDERED that!

- 1. Suburban Water Systems, San Jose District, is authorized to file the revised schedules attached as Appendix A. This filing shall comply with General Order 96-A. The effective date of the revised schedules shall be 5 days after the date of filing. The revised schedules shall apply to service rendered on or after the effective date.
- 2. On or after November 5, 1992 and 1993, Suburban Water Systems should be authorized to file an advice letter, with appropriate supporting workpapers, requesting step rate increases for 1993 and 1994 attached as Appendix B or to file a lesser increase in the event that the rate of return on rate base adjusted to reflect the rates then in effect and normal ratemaking adjustments for the 12 months ending September 30, 1992 and 1993, exceed the later of (a) the rate of return found reasonable by the Commission for Suburban Water Systems for the corresponding period in the then most recent rate decision, or (b) the rate of return found reasonable in this case. This filing should comply with General Order 96-A. The requested step rates should be reviewed by

the Staff to determine their conformity with this order and should go into effect upon the Staff's determination of conformity. The Staff should inform the Commission if it finds that the proposed rates are not in accord with this decision, and the Commission should then modify the increase. The effective date of the revised tariff schedules for 1993 and 1994 should be no earlier than January 1, 1993 and January 1, 1994, respectively, or 40 days after filing, whichever is later. The revised schedules should apply to service rendered on and after their effective date.

3. Suburban Water Systems' motion to strike the testimony of Maxine Leichter is denied.

This order is effective today. Dated March 11, 1992, at San Francisco, California.

#### PRIVATE FIRE PROTECTION SERVICE

#### APPLICABILITY

Applicable to all water service furnished to privately owned fire protection systems.

#### TERRITORY

All tariff areas.

#### RATES

|          | District |                  | · (T) |
|----------|----------|------------------|-------|
| San Jose | Whittier | <u>La Mirada</u> |       |

For each inch of diameter of service connection, per month ..... \$ 8.35 (1) \$ 6.95 \$ 5.69

#### SPECIAL CONDITIONS

- 1. The facilities for service to a privately owned fire protection system shall be installed by the Utility or under the Utility's direction. Cost for the entire installation, excluding the connection at the main, shall be paid for by the applicant. Such payment shall not be subject to refund.
- The expense of maintaining the private fire protection facilities on the applicant's premises (including the vault, meter and backflow device) shall be paid for by the applicant.
- 3. All facilities paid for by the applicant shall be the sole property of the applicant. The Utility and its duly authorized agents shall have the right to ingress to, and egress from the premises for all purposes relating to said facilities.
- 4. The minimum diameter for the service pipe to fire protection service shall be four inches, and the maximum diameter shall be not more than the diameter of the main to which the service is connected.
- fire protection system in addition to all other normal service does not exist in the street or alley adjacent to the premises to be served, then a main extension from the nearest existing main of adequate capacity shall be installed by the Utility. The cost of such main extension attributable to the fire protection requirement shall be paid to the Utility as a contribution in aid of construction. (L)

Schedule No. 4

## PRIVATE FIRE PROTECTION SERVICE (Continued)

### SPECIAL CONDITIONS (Continued)

- 6. Service hereunder is to private fire protection systems to which no connections for other than fire protection purposes are allowed and which are regularly inspected by the underwriters having jurisdiction. All facilities are to be installed according to the Utility's specifications and maintained to the Utility's satisfaction. The Utility may require the installation of a backflow prevention device and a standard detector type meter approved by the Insurance Service Office for protection against theft, leakage, or waste of water.
- 7. No structure shall be built over the service pipe serving fire protection facilities and the customer shall maintain and safeguard the area occupied by the service pipe from traffic and other hazardous conditions. The customer will be responsible for any damage to the service facilities.
- 8. Subject to the approval of the Utility, any change in the location or construction of the service for the fire protection facilities requested by public authority or the customer will be made by the Utility following payment to the Utility of the entire cost of such change.
- 9. Any unauthorized use of water through the service to fire protection facilities will be charged for at the applicable tariff rates and may be grounds for discontinuance of service by the Utility to the privately owned fire protection system without liability to the Utility.
- 10. The Utility will supply to the privately owned fire protection system only such water at such pressure as may be available from time to time in the operation of Utility's system.
- 11. All bills are subject to the reimbursement fee set (N) forth on Schedule No. UP. (N)

SUBURBAN WATER SYSTEMS

Schedule No. TRA-1

TAX REFORM ACT OF 1986 REFUND SURCREDIT

#### **APPLICABILITY**

This surcredit applies to customers' total water bills rendered under all tariff rate schedules authorized by the Commission, with the exception of surcharge for the repayment of Safe Drinking Water Bond Act loans and the PUC reimbursement fee surcharge.

#### TERRITORY

Throughout all tariff areas.

#### RATES

The surcredits set forth below shall be applied to customers' bills for the districts indicated:

|           | (D) |
|-----------|-----|
| Whittier  | *   |
| La Mirada | *   |

Note: The Tax Reform Act of 1986 Refund Surcredit schedule submitted herewith is for the purpose of reflecting the rate reduction necessary to keep our rates in line with the current tax rates and is developed using the estimated 1988 estimated revenue of the Act. This schedule applies to all bills rendered on or after January 1, 1989, is made pursuant to Resolution No. W-3424, and will be in effect until the next general or attrition rate adjustment is approved for each of the above districts.

#### SUBURBAN WATER SYSTEMS San Jose District

Each of the following increases in rates may be put into effect on the indicated date by filing a rate schedule which adds the appropriate increase to the rate which would otherwise be in effect on that date.
