OPINION AND ORDER ON PETITION FOR  
MODIFICATION OF DECISION 82-10-069

The Pacific Telephone and Telegraph Company, General Telephone Company of California (General), Continental Telephone of California (Continental), and Western Burglar and Fire Alarm Association and collectively, applicants, petition the Commission for modification of Decision (D.) 82-10-069 in which the Commission issued General Order 152 (GO 152). The proposed modifications are set forth below.

Applicants are the only parties who actively participated in the phase of these proceedings which culminated in D.82-10-069 and the promulgation of GO 152. Applicants state they have met on numerous occasions since D.82-10-069 was issued, and all agree that the revisions set forth below should be made to pages 11-12 of the decision and GO 152 for the following reasons: (1) revisions 1, 3, and 4 are necessary to establish separate reporting units for General and Continental which conform to their respective operational and administrative configurations; (2) revision 2 is necessary because the affected telephone utilities now have two different systems to measure average duration. Each system, due to differences in hardware and software, measures duration differently, and thus the standards for each system must be different. Applicants agree that the proposed standards are equivalent.

Revision 1. Applicants request that Section 1.3.11 of GO 152 be revised to state:

"Regional Reporting Entity. See Figure A for The Pacific Telephone and Telegraph Company. See Figure B for the General Telephone Company of California. See Figure C for the Continental Telephone Company of California."

Revision 2. Applicants request that Sections 3.5.3 and 3.5.4 of GO 152 be deleted entirely and replaced with the following:

"3.5.3 Standard Service Range

"Six-hour average duration for private line alarm service measured by Pacific Telephone's SSS measurement system or comparable system. Ten-hour average duration for private line alarm service measured by Pacific Telephone's TREAT measurement system or comparable system.

More than 48 hours in  
duration

Less than 2% of total  
service trouble  
reports.

"3.5.4 Reporting Service Level

"Eight-hour average duration for private line alarm service measured by Pacific Telephone's SSS measurement system or comparable system. Fourteen-hour average duration for private line alarm service measured by Pacific Telephone's TREAT measurement system or comparable system.

More than 48 hours in duration	More than 5% of total service trouble reports."
-----------------------------------	---

Revision 3. Applicants request that Section 4.1 of GO 152 be revised to state:

"Reporting Units. Service measurements shall be maintained by reporting units. Reporting units will be regional reporting entities. A description of the reporting units for Pacific Telephone, General Telephone and Continental is shown on Figures A, B and C respectively. Telephone utilities with more than 100 but less than 500 service links shall file one statewide report."

Revision 4. Applicants request that Attachments I and II be adopted as Figures B and C to GO 152.

There have been no protests to Applicants' request and no one has requested a hearing. Applicants request the revisions to GO 152 be made as soon as possible.

Findings of Fact

1. Applicants are the only parties who actively participated in the phase of these proceedings which culminated in the issuance of GO 152.
2. Applicants request revisions in GO 152 because of differences in operational and administrative configurations of the telephone companies involved.
3. A public hearing is not necessary.
4. Because the revisions requested will improve the reporting required by GO 152, this decision should be effective on the date signed.

Conclusion of Law

Applicants' request should be granted.

IT IS ORDERED that:

1. Sections 1.3.11, 3.5.3., 3.5.4, and 4.1 of GO 152 are amended as requested by applicants and as detailed in the body of this decision.

2. Attachments I and II to this decision are adopted as Figures B and C to GO 152.

This order is effective today.

Dated DEC 7 1983, at San Francisco, California.
