

ORIGINAL

Decision No. 86988

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Investigation
for the purpose of considering and
determining minimum rates for trans-
portation of rock, sand, gravel, and
related items in bulk, in dump truck
equipment in Southern California as
provided in Minimum Rate Tariff 17-A
and Southern California Production
Area and Delivery Zone Directory 1,
and the revisions or reissues thereof.

Case No. 9819
Petition for Modification
No. 9
(Filed May 12, 1975)
Petition for Modification
No. 16
(Filed April 29, 1976)

J. Grant Vincent, for Southern California Rock
Products Association, petitioner in Petition
No. 9.
E. O. Blackman, for California Dump Truck Owners
Association, petitioner in Petition No. 16,
interested party in Petition No. 9.
James R. Footc, for Associated Independent Owner
Operators, Inc.; C. D. Gilbert, H. Hughes,
and J. C. Kaspar, for California Trucking
Association; Harry C. Phelan, Jr., for
California Asphalt Pavement Association; and
Lee Jones, for Purchasing and Stores Depart-
ment, County of Los Angeles; interested parties.
J. S. Shafer, Jr., for Trucking by J. S. Shafer,
respondent.
Raymond Toohey and Joel Anderson, for the Commission
staff.

O P I N I O N

By Petition No. 9 Southern California Rock Products Association (SCRPA) requests that a number of revisions be made in the time and distance traverse network which underlies the zone rates in Minimum Rate Tariff 17-A (MRT 17-A) applicable to transportation of rock, sand, gravel, asphaltic concrete, slag, and related commodities in dump truck equipment in southern California. The zone rates apply from defined production areas to designated delivery zones which are described in Southern California Production Area and Delivery Zone Directory 1 (Directory 1). The purpose of the proposed traverse network changes is to include approximately 200 miles of new freeway segments and important street changes which have affected times and distances from production areas to delivery zones since the traverse network was last updated.^{1/} The recommended network changes are in portions of Los Angeles, Orange, Riverside, and San Bernardino Counties. The overall effect of the proposed network changes, by themselves, would be numerous reductions in zone rates from a number of production areas to many delivery zones.

By Petition No. 16 California Dump Truck Owners Association (CDTOA) seeks incorporation of the revised traverse data as sought by SCRPA in Petition No. 9. In addition, CDTOA seeks increases in the zone rates in Sections 4 through 16 of MRT 17-A to offset increases in wages, fringe benefits, allied payroll costs, and fuel and oil costs which have occurred since those rates were last adjusted.

^{1/} The traverse network underlying the present zone rates was first adopted by Decision No. 68543 (1965), 64 CPUC 30. Subsequent major revisions of the traverse network were made by Decisions Nos. 73256 (1967) and 74654 (1968).

Appendix B sets forth major decisions of the Commission since 1970 affecting MRT 17-A which have kept the rates, rules, and cost formulae of the tariff current.

Public hearing in these matters was held on a common record before Examiner Norman Haley at Los Angeles on August 3, 1976. The matters were submitted on November 30, 1976 with receipt of late-filed staff Exhibits 9 and 10.

Petition No. 9

Evidence concerning the proposed traverse network changes sought in Petition No. 9 was presented by a consulting engineer for SCRPA. The witness explained that in the planning stage of the study meetings were held with representatives of aggregate producers, for-hire carrier associations, and the Commission staff. Assertedly all of the parties concurred on the need for the study. As the study progressed additional meetings were held to keep the parties advised as to the progress made and as to the methods utilized in the development of the project. The consulting engineer testified that the procedures utilized in determining the proposed changes, additions, and deletions were essentially the same as employed in previous traverse studies. The existing time and distance traverses were made by recording operations of laden and empty dump truck equipment over specific segments of highways from production areas to delivery zones. The en route times (round-trip minutes) and distances (one-way miles) between all points in the traverse network are stored on computer tapes. Changes in times and distances between specific points are entered on computer cards. These cards are substituted in the card deck, where required, and a new tape is prepared covering a major segment of the total network. The computer applies a particular commodity rate formula to all routes from a production area to a delivery zone, and selects and prints out

the least cost per ton considering the combinations of time costs and mileage costs for each highway segment.^{2/}

The proposed network changes are embodied in Exhibit 1.^{3/} The locations of the changes are identified by freeways, cross streets, point numbers (numbers identifying county, zone, and location within each zone), proposed revised one-way miles, and proposed revised round-trip times. The preponderance of the sought changes in freeway segments are reduced times and miles. However, some of the surface street changes would result in greater times and miles. It is not possible to estimate precisely the overall effect the proposed traverse changes would have on zone rates or revenue. The introduction of one new freeway segment can reduce times, distances, and rates to numerous delivery zones. To estimate reasonably precisely the dollar impact of the proposed changes would require a comprehensive rerating of freight bills at both present and revised rates covering actual shipments of commodities from each production area to the various delivery zones involved.

^{2/} This is known as the least-cost method or formula. Different cost components are used in the formula to develop separate rates for the several commodity groups. By Decision No. 85515 (1976), the Commission adopted the least-cost formula for the area involved to replace a generally less efficient (least-time) formula. All zone rates in MRT 17-A are now developed by the least-cost formula.

^{3/} Exhibit 1 contains the following types of network changes: New freeway segments; new non-freeway segments; existing segments divided into two segments by new freeway; additional zone entry segments; segments deleted from the network; and existing route segments modified to reflect current conditions.

An assistant transportation engineer of the Commission staff testified concerning review made by the staff of the proposed traverse network changes. He said that staff members checked observer trip reports and summaries and also made field investigations. Approximately 87 percent (158.7 miles) of the proposed changes in times and miles were checked using a calibrated state car. This check included review of legal speed limits over the highway segments involved. Differences between data gathered by petitioner and the staff were resolved. The staff considers the proposed revisions in round-trip times and one-way miles to be accurate. Data relative to the network segments involved were put on computer cards by the staff. The resulting computer printouts showing production areas, delivery zones, times, miles, costs, rates, and related data were received as late-filed Exhibit 9. The revised traverse maps showing round-trip times and one-way miles from each production area to each delivery zone, and related data, were received as late-filed Exhibit 10.^{4/}

^{4/} The traverse network maps which underlie zone rates in MRT 17-A (including revisions of some of those maps) have been received as exhibits in prior proceedings. The traverse maps (other than San Diego County) are listed below:

<u>Map Number</u>	<u>Area</u>
1	San Bernardino - Corona
2	Riverside, Perris Valley
3	Orange County, Southern
4	Orange County, Northern
5	Los Angeles, Southwestern
6	Los Angeles, Eastern
7	Los Angeles, San Fernando Valley
8	Saugus - Newhall
9	Ventura County
10	Santa Barbara County

Exhibit 10 consists of revisions of Maps 1, 3, 4, 5, 6, 7, and 8. Exhibit 10 does not include revisions of Maps 2, 9, or 10 or traverse maps of San Diego County because no network changes are proposed in Exhibit 1 in those areas.

The staff called the executive director of the California Asphalt Pavement Association to testify concerning the need to eliminate asphaltic concrete zone rates from 14 production areas which no longer originate that commodity.^{5/} The witness pointed out that elimination of the obsolete zone rates will conserve computer time and eliminate the printing of numerous tariff pages.

Petition No. 16

The general manager of CDTOA testified in support of Petition No. 16. She said that since the zone rates in MRT 17-A were last adjusted by Decision No. 85515 dump truck carriers have experienced increased costs due to inflationary factors and also due to a reduction in use factor. She asserted that although Petition No. 16 seeks rate adjustments for increases in costs of labor, fuel, and oil the carriers have experienced increases in other costs as well.

Counsel for CDTOA stated that an increase of six to eight percent in zone rates would be required to offset the increased wage costs alone.^{6/} He stated that the present labor agreement between SCRPA and the Teamsters Union (not including San Diego County) expired September 1, 1976. He said he expects CDTOA to file another petition in the future to include the additional labor costs which became effective on that date.

Evidence of the effect of increased costs for transporting property at zone rates was introduced by another assistant transportation engineer of the Commission staff. According to his findings, increased costs of labor, fuel, and oil have increased

^{5/} Exhibit 3 lists the following production areas no longer originating asphaltic concrete: Los Angeles County Production Areas 19-B, 19-CC, 19-D, 19-DD, 19-GG, 19-I, 19-JJ, and 19-U; Orange County Production Area 30-K; San Bernardino County Production Area 36-DD; and Ventura County Production Areas 56-G, 56-J, 56-K, and 56-M.

^{6/} Minimum Rates established by Decision No. 85515 became effective April 1, 1976. They were based on labor costs effective in the latter part of 1974 and 1975. Labor costs effective in the latter part of 1975 and 1976 were not considered in Decision No. 85515.

total transportation costs by amounts varying from 6.6 to 7.8 percent for rock, sand, gravel,^{7/} and slag; from 7.3 to 8.3 percent for decomposed granite; from 7.7 to 8.8 percent for asphaltic concrete; and from 9.6 to 10.9 percent for rock, sand, and gravel in San Diego County. The cost engineer revised the respective zone rate formulae^{8/} to reflect the increased costs.

Discussion

The new freeway segments, surface street changes, and other changes identified by SCRPA in Exhibit 1 have resulted mostly in reductions in vehicle running times and distances between production areas and delivery zones. Corresponding adjustments should be made in the traverse network so that these efficiencies can be reflected in the zone rates in MRT 17-A.

The record shows that since the zone rates in MRT 17-A were last increased by Decision No. 85515, cost factors for labor, fuel, and oil which underlie those rates have increased. The revised cost formulae developed by the staff cost engineer reasonably reflect the increased costs which have occurred in connection with dump truck transportation performed under MRT 17-A by efficient means.

All asphaltic concrete zone rates from the 14 production areas identified in Footnote 5 above should be canceled from MRT 17-A. Nine of the production areas are totally abandoned and should be canceled from Directory 1. Three of the abandoned production areas also formerly produced rock, sand, and gravel. Those zone rates also should be canceled.

^{7/} Transportation of rock, sand, and gravel in the counties of Los Angeles, Orange, Riverside, San Bernardino, Ventura, and Santa Barbara. A separate formula applies to transportation of rock, sand, and gravel in San Diego County.

^{8/} The current zone rate formulae are set forth in Appendix B of Decision No. 85515.

The impact of the proposed changes cannot be gauged accurately because of the numerous specific reductions in rates resulting under Petition No. 9, coupled with the general increases resulting from Petition No. 16. Many individual increases and reductions will result. On a long run over a new freeway segment the net reduction can be substantial. However, it can be seen from the record that the overall change would be a revenue increase of approximately four percent, or \$1 million.

Findings

1. By Petition No. 9 SCRPA requests that the time and distance traverse network which underlies the minimum zone rates in MRT 17-A. be updated by inclusion of approximately 200 miles of new freeway segments and certain surface street changes.

2. The time and distance traverse network was last generally revised by Decision No. 74654 (1968).

3. The traverse network changes sought in Petition No. 9 would, by themselves, result principally in reductions in zone rates from certain production areas to a number of delivery zones in Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties.

4. The traverse network changes sought in Petition No. 9 are necessary in order that the minimum zone rates will reflect the shortest, fastest, and lowest cost routes from production areas to delivery zones.

5. The traverse times, distances, and other data shown on the maps in Exhibit 10 reflect actual transportation conditions in the areas involved by dump truck carriers engaged in hauling commodities subject to the rates in MRT 17-A.

6. The zone rates in MRT 17-A are developed by computer programs in which the inputs are the one-way mileages and round-trip times of traverses on all highways and roads utilized by dump truck carriers transporting property from prescribed production areas to designated delivery zones, and rate formulae containing cost factors for distance, en route time, and terminal-end time. The computer program applies the rate formulae to all routes from a production area to a delivery zone and selects the lowest rate calculated as the minimum rate (least-cost method).

7. The network segments and related time and distance factors presently contained in the computer program for MRT 17-A should now be updated to reflect the new freeway segments and other alignments identified in Exhibit 1 that have been constructed in southern California.

8. The network segments and related time and distance factors sought by SCRPA in Petition No. 9 are reasonable and justified as bases for relating zone rates in MRT 17-A to the various lengths of haul involved.

9. By Petition No. 16 CDTOA seeks increases in zone rates in MRT 17-A to offset increased costs of labor, fuel, and oil which have occurred since the minimum zone rates were last adjusted by Decision No. 85515 (1976).

10. Cost data developed by the staff disclose that cost factors relative to labor, fuel, and oil which underlie the present zone rates have increased total costs from 6.6 to 10.9 percent depending upon the commodity and area involved.

11. In the aggregate the present rates in MRT 17-A fail to cover total cost of transporting property subject to those rates.

12. The rate formulae set forth in Appendix A hereof reflect the costs of a reasonably efficient dump truck carrier engaged in the transportation of commodities to which those formulae apply. The application of those formulae to the time and distance traverse network heretofore adopted by the Commission and amended by this decision will provide the just, reasonable, and nondiscriminatory minimum rates for transportation governed by MRT 17-A, and the increases resulting therefrom have been shown to be justified.

13. The revised tariff pages attached hereto in Appendices C and D contain the just, reasonable, and nondiscriminatory minimum rates described in Finding 10.

14. Zone rates in MRT 17-A for transportation of asphaltic concrete from Production Areas 19-B, 19-CC, 19-D, 19-DD, 19-GG, 19-I, 19-JJ, 19-U, 30-K, 36-DD, 56-G, 56-J, 56-K, and 56-M should be canceled from MRT 17-A.

15. Zone rates in MRT 17-A for transportation of rock, sand, and gravel should be canceled from Production Areas 19-CC, 56-G, and 56-M.

16. Production Areas 19-CC, 19-D, 19-DD, 19-GG, 19-U, 30-K, 36-DD, 56-G, and 56-M should be canceled from Directory 1.

17. The reductions in zone rates resulting from Petition No. 9 in conjunction with the rate increases resulting from Petition No. 16 will result in an overall increase of approximately four percent, or \$1 million.

18. The procedures of the Commission provided for reasonable opportunity for participation by all interested persons or their representatives. Copies of the petitions and notices of hearing were sent to known carrier and shipper organizations and to the State of California Department of Transportation. No one opposed the granting of the petitions. Petition No. 9 was supported by CDTOA and Associated Independent Owner Operators, Inc. Petition No. 16 was supported by the latter association.

Conclusions

1. Petitions for Modification Nos. 9 and 16 in Case No. 9819 should be granted and MRT 17-A should be amended accordingly.
2. The revisions to Directory 1 found reasonable above should be incorporated in Directory 1.

O R D E R

IT IS ORDERED that:

1. Southern California Production Area and Delivery Zone Directory 1 (Appendix A of Decision No. 69469, as amended) is further amended by incorporating therein, to become effective April 2, 1977, the revised pages in Appendix C attached hereto and by this reference made a part hereof. ✓
2. Minimum Rate Tariff 17-A (Appendix C to Decision No. 80578, as amended) is hereby further amended by incorporating therein, to become effective April 2, 1977, the revised pages in Appendix D attached hereto and by this reference made a part hereof. ✓
3. Common carriers subject to the Public Utilities Act to the extent that they are subject to Decisions Nos. 69469 and 80578, as amended, are directed to establish in their tariffs the amendments necessary to conform with the further adjustments ordered herein.

4. Tariff publications required to be made by common carriers as a result of this order shall be filed not earlier than the effective date of this order and may be made effective not earlier than the tenth day after the effective date of this order on not less than ten days' notice to the Commission and to the public and such tariff publications shall be made effective not later than April 2, 1977 and the tariff publications which are authorized but not required to be made by common carriers as a result of this order may be made effective not earlier than the tenth day after the effective date of this order, and may be made effective on not less than ten days' notice to the Commission and to the public if filed not later than sixty days after the effective date of the minimum rate tariff pages incorporated in this order. ✓

5. Common carriers, in establishing and maintaining the rates authorized by this order, are authorized to depart from the provisions of Section 461.5 of the Public Utilities Code to the extent necessary to adjust long- and short-haul departures now maintained under outstanding authorizations; such outstanding authorizations are hereby modified only to the extent necessary to comply with this order; and schedules containing the rates published under this authority shall make reference to the prior orders authorizing long- and short-haul departures and to this order.

C.9819, Pets. 9, 16 RF/km *

6. In all other respects, Decisions Nos. 69469 and 80578, as amended, shall remain in full force and effect.

The effective date of this order shall be twenty days after the date hereof.

Dated at San Francisco, California, this 23rd day of FEBRUARY, 1977.

I concur on the assumption that there will be a prompt examination of the possibility of tariff filings under

APPENDIX A

Rate Per Ton Formulae For The Computation
Of Zone Rates, Minimum Rate Tariff 17-A

From production areas in Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties to delivery zones other than those in San Diego County.

Asphaltic Concrete:

$$\frac{(O. W. Miles \times \$0.0261) + (96\% R.T. Min. \times \$0.01924) + \$0.562}{0.9197}$$

Rock, Sand, Gravel:

$$\frac{(O. W. Miles \times \$0.0170) + (R.T. Min. \times \$0.01067) + \$0.344}{0.9197}$$

Slag:

$$\frac{(O. W. Miles \times \$0.0174) + (R.T. Min. \times \$0.01099) + \$0.393}{0.9197}$$

Decomposed Granite:

$$\frac{(O. W. Miles \times \$0.0261) + (R.T. Min. \times \$0.01924) + \$0.317}{0.9197}$$

From production areas in Orange County to delivery zones in San Diego County.

(Asphaltic concrete, rock, sand, and gravel)

- a. Subtract from the present zone rates the current rates from corresponding Orange County production areas to Orange County Delivery Zone 30118.
- b. Increase the resulting differences in rates for
 - (1) asphaltic concrete by eight percent and
 - (2) rock, sand, and gravel by seven percent.
- c. Increase the rates which are used as subtrahends in paragraph (a) to correspond to the increased rates which are developed pursuant to the above cost and rate formulae for transportation from the same Orange County production areas to Orange County Delivery Zone 30118.
- d. Add to the increased rate differentials developed in paragraph (b) the corresponding rates developed in paragraph (c).

From production areas in San Diego County to Delivery Zones in San Diego and Orange Counties.

Rock, Sand, Gravel:

$$\frac{(O. W. Miles \times \$0.0206) + (R.T. Min. \times \$0.01102) + \$0.2080}{0.9197}$$

O.W. = One way

R.T. = Round trip

APPENDIX B

MAJOR DECISIONS IN CASE NO. 9819
UPDATING AND RESTRUCTURING DUMP TRUCK
RATES FOR MRT 17-A SINCE 1970

May 12, 1970	Decision No. 77204 completely changed rates and rules for rock, sand, and gravel in San Diego County, based on comprehensive cost and rate studies. Utilized least-cost formula for first time in MRT 17. Established new system of production areas and delivery zones. Canceled old zone rates in MRT 17.
October 11, 1972	Decision No. 80578 established MRT 17-A, canceling MRT 17. Many zone rates in southern California revised based on updated costs. Zone rates no longer used were canceled.
April 17, 1973	Decision No. 81298 added new portion of Moorpark Freeway, Ventura County, to traverse network. Resulted in reductions in numerous zone rates in the vicinity.
August 29, 1974	Decision No. 83377 restructured zone rate formulae for rock, sand, gravel, asphaltic concrete, and slag throughout the 7-county area of the tariff, based upon substantial changes in the applicable cost formulae.
March 2, 1976	Decision No. 85515 adopted least-cost formula to apply throughout southern California. Least-cost formula replaced generally less efficient least-time formula. All zone rates in MRT 17-A are now developed by the least-cost formula. Additionally revised rates are decomposed granite based on elements that affect costs of transporting asphaltic concrete. Also revised other zone rates based on updated costs.
Proposed Decision	Proposed decision in Petitions 9 and 16 would substantially revise traverse network underlying zone rates by including 200 miles of new freeway segments. Shorter running times would reduce many rates. Many zone rates no longer used would be canceled. Overall increase of 4 percent based on updated costs.
