ALTERNATIVE APPLICATION OF COMBINATIONS
WITH COMMON CARRIER RATES

When lower aggregate charges result, tonnage rates provided in this tariff may be used in combination with the published rates of common carriers by land filed with the Commission for the transportation of shipments of the same kind of property between the same points, subject to the following conditions:

(a) When the point of origin is located beyond a railhead and the point of destination is located at a railhead, add to the common carrier rate applying from any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, to point of destination the tonnage rate provided in this tariff, applicable to the weight of entire shipment, from point of origin to any such team track or private railhead from which the common carrier rate used applies. (See Notes 1, 2 and 3)

(b) When the point of origin is located at a railhead and the point of destination is located beyond a railhead, add to the common carrier rate applying from point of origin to any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, the rate in cents per ton shown in Note 1 of Item 320 for each mile or fraction thereof from any such team track or private railhead to which the common carrier rate used applies to point of destination. (See Notes 1, 2 and 3)

(c) When both the point of origin and the point of destination are located beyond railhead, add to the common carrier rate applying between any railheads (A) the tonnage rate provided in this tariff, applicable to the weight of the entire shipment, from point of origin to any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, from which the common carrier rate used applies, and (B) the rate in cents per ton shown in Note 1 of Item 320 for each mile or fraction thereof, from any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, to which the common carrier rate used applies to point of destination. (See Notes 1, 2 and 3)

0220

NOTE 1.—If loading and unloading are not included in the rate of a common carrier which is applied or used to construct a rate for highway transportation, the following rates in cents per ton shall be added to the common carrier rates. (See Notes 2 and 3):

	Column A	Column B
<u>Service Provided</u>	A or B	A or B
Loading	15	13
Unloading	20	10

Column A.—Applies when shipment is transported by truck and transfer combination equipment.

Column B.—Applies when shipment is transported in equipment other than that described under Column A.

NOTE 2.—When a rail carload rate is subject to varying minimum weights, dependent upon the size of the car ordered or used, the lowest minimum weight obtainable under such minimum weight provisions may be used in applying the basis provided in this item, except that when no specific minimum weight is shown for a carload rate, it shall be not less than 30,000 pounds.

NOTE 3.—In applying the provisions of this item, a rate no lower than the common carrier rate and a weight no lower than the actual weight or published minimum weight (whichever is the higher) applicable in connection with the common carrier rate shall be used.
