Application No. 58290  
(Filed August 10, 1978)

OPINION AND ORDER

By this application, Bulk Transportation, a California corporation, requests authority to deviate from the provisions of Minimum Rate Tariff 7-A in connection with the transportation of silica sand for Kerr Glass Manufacturing Corporation from Oceanside to Santa Ana.

The application is based upon special conditions and circumstances, such as: bulk loading and unloading without carrier's assistance; volume movement with facilities operating 24 hours per day, seven days per week; and, cost reductions developed by the efficiencies of maximum equipment utilization.

The application was listed on the Commission's Daily Calendar of August 11, 1978. Applicant has served copies of the application on possible competing carriers. No objection to the granting of the application has been received.

Revenue and expense data submitted by the applicant indicate that the transportation involved may reasonably be expected to be profitable under the proposed rates.

In the circumstances, the Commission finds that the applicant's proposal is reasonable. A public hearing is not necessary. The Commission concludes that the application should be granted as set forth in the ensuing order. Because there is an immediate need for this rate relief, the effective date of this order should be the date hereof.

IT IS ORDERED that:

1. Bulk Transportation, a corporation, is authorized to perform the transportation shown in Appendix A attached hereto and by this reference made a part hereof at not less than the rates set forth therein.

2. The authority granted herein shall expire one year after the effective date of this order unless sooner canceled, modified or extended by further order of the Commission.

The effective date of this order is the date hereof.

Dated at San Francisco, California, this 17<sup>th</sup>  
day of OCTOBER, 1978.
